

C1000-173 Actual Exam & C1000-173 Study Materials & C1000-173 Test Torrent

What's more, part of that TestSimulate C1000-173 dumps now are free: <https://drive.google.com/open?id=1esfde31wkuh3MxzoN0bOYQdARDaU1kyI>

IBM C1000-173 certifications are thought to be the best way to get good jobs in the high-demanding market. There is a large range of C1000-173 certifications that can help you improve your professional worth and make your dreams come true. Our IBM Cloud Pak for Data v4.7 Architect C1000-173 Certification Practice materials provide you with a wonderful opportunity to get your dream certification with confidence and ensure your success by your first attempt.

IBM C1000-173 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Architect with AI Series: This section measures the skills of an AI Solution Architect and includes designing architectures for solutions involving various IBM Watson AI services. Architecting with Watson Assistant involves creating conversational AI interfaces. Watson Discovery solutions focus on building cognitive search and content analytics applications. Watson Pipelines solutions involve orchestrating data science workflows. Watson OpenScale architectures enable AI model monitoring and governance. Architecting with Match 360 supports personalized engagement by integrating multi-channel customer insights.
Topic 2	<ul style="list-style-type: none"> Plan for a Cloud Pak for Data Implementation: This section of the exam measures the skills of an Implementation Consultant and covers determining which Cloud Pak for Data services to deploy based on organizational needs. It involves sizing the Kubernetes OpenShift cluster appropriately for workload demands and planning backup and restore strategies to ensure data protection. Planning for high availability and disaster recovery is essential to maintain uninterrupted service. Multi-tenancy requirements must be understood to support multiple user groups securely on shared infrastructure. Migration requirements need assessment to transition existing data and workloads smoothly.
Topic 3	<ul style="list-style-type: none"> Architect with Data Source Services: This domain measures expertise of a Data Integration Architect and includes architecting solutions with data replication technologies to synchronize data across systems. IBM Data Virtualization architecture enables access to and querying of disparate data sources without data movement. Architecting with watsonx.data focuses on building intelligent data lakes and query engines. Architecting with Db2-related services involves designing scalable data management and processing architectures using IBM's Db2 platforms.

Topic 4	<ul style="list-style-type: none"> • Security Requirements: This domain targets a Security Architect and focuses on planning security for a Cloud Pak for Data deployment. It includes managing certificates that secure communications, identity management systems, and access and authorization controls to enforce secure and compliant user and service interactions. The auditing features and their integration with enterprise audit systems are crucial to ensure traceability and accountability. Asset interchange security involves safeguarding data movement between services.
Topic 5	<ul style="list-style-type: none"> • Architect with Data Governance Services: This section evaluates skills of a Data Governance Specialist, covering the architecture of knowledge catalogs to enable data discovery and management. Data Privacy architectures ensure compliance with regulatory requirements around data protection. Knowledge Accelerators involve designing solutions that speed up data governance processes through predefined policies and templates.

C1000-173 Exam Resources & C1000-173 Best Questions & C1000-173 Exam Dumps

We provide a free sample before purchasing IBM C1000-173 valid questions so that you may try and be happy with its varied quality features. Learn for your IBM certification with confidence by utilizing the TestSimulate C1000-173 Study Guide, which is always forward-thinking, convenient, current, and dependable.

IBM Cloud Pak for Data v4.7 Architect Sample Questions (Q119-Q124):

NEW QUESTION # 119

Which components of IBM Cloud Pak for Data are essential for implementing an end-to-end data science workflow?

- A. Data Refinery and Watson Studio
- B. Watson Knowledge Catalog and DataStage
- C. Decision Optimization and Streams
- **D. Watson Studio and Watson Machine Learning**

Answer: D

NEW QUESTION # 120

In Db2 services, why is it important to establish routes effectively when exposing REST APIs?

- A. To ensure APIs are unreachable for enhanced security
- B. To prevent any external access to the APIs
- **C. To provide predictable and organized access paths**
- D. To increase the complexity of the API structure

Answer: C

NEW QUESTION # 121

What scenario best illustrates the effective use of Db2 Graph services?

- A. For basic CRUD operations without relationships
- B. Simple data aggregation without the need for graph theory
- C. When handling flat, tabular data
- **D. Managing complex relationships and pattern recognition**

Answer: D

NEW QUESTION # 122

How do Metro-DR and Regional-DR differ in terms of disaster recovery planning?

- A. Regional-DR requires less data synchronization
- B. Metro-DR is less concerned with geographic diversity
- **C. Metro-DR typically has lower latency and faster recovery times than Regional-DR**
- D. Metro-DR operates over longer distances than Regional-DR

Answer: C

NEW QUESTION # 123

Which statement describes MPP (Massively Parallel Processing) Database architecture?

- A. A data warehouse that needs all compute nodes to access a shared data store simultaneously.
- B. A transactional system which uses multiple nodes for maximum availability.
- C. Two or more databases kept in sync via two-phase commit.
- **D. An analytics environment that improves performance by dividing the data across many nodes.**

Answer: D

Explanation:

MPP, or Massively Parallel Processing, is a database architecture model where data is divided and processed across multiple compute nodes in parallel. Each node works independently on a portion of the data, dramatically improving query performance and throughput for analytics workloads. This model is ideal for big data and analytical queries, not transactional workloads. It differs from shared-disk models or replication strategies like two-phase commit. The correct definition involves distributed data and parallel query execution, as described in option C.

NEW QUESTION # 124

.....

Furthermore, it is our set of C1000-173 brain dumps that stamp your success with a marvelous score. The dumps include C1000-173 study questions that likely to be set in real C1000-173 exam. They provide you a swift understanding of the key points of C1000-173 covered under the syllabus contents. Going through them enhances your knowledge to the optimum level and enables you to ace exam without any hassle. No need of running after unreliable sources such as free courses, online C1000-173 courses for free and C1000-173 dumps that do not ensure a passing guarantee to the C1000-173 exam candidates.
