

# 2V0-16.25시험대비덤프데모다운 - 2V0-16.25최신시험

Itcertkr 2V0-16.25 최신 PDF 버전 시험 문제집을 무료로 Google Drive에서 다운로드하세요:  
<https://drive.google.com/open?id=1hKNjJNzacyvIhJPwDoZR8C149HQ6QxEV>

성공으로 향하는 길에는 많은 방법과 방식이 있습니다. VMware인증 2V0-16.25시험을 패스하는 길에는 Itcertkr의 VMware인증 2V0-16.25덤프가 있습니다. Itcertkr의 VMware인증 2V0-16.25덤프는 실제 시험 출제방향에 초점을 두어 연구제작한 시험준비공부자료로서 높은 시험적중율과 시험패스율을 자랑합니다. 국제적으로 승인해주는 IT자격증을 취득하시면 취직 혹은 승진이 쉬워집니다.

자기한테 딱 맞는 시험준비공부자료 마련은 아주 중요한 것입니다. Itcertkr는 2V0-16.25업계에 많이 알려져 있는 덤프제공 사이트입니다. Itcertkr덤프자료가 여러분의 시험준비자료로 부족한 부분이 있는지는 구매사이트에서 무료샘플을 다운로드하여 덤프의 일부분 문제를 우선 체험해보시면 됩니다. Itcertkr에서 2V0-16.25제공해드리는 퍼펙트한 덤프는 여러분이 한방에 시험에서 통과하도록 최선을 다해 도와드립니다.

>> 2V0-16.25시험대비 덤프데모 다운 <<

## 2V0-16.25시험대비 덤프데모 다운 최신 덤프샘플문제 다운

Itcertkr에서는 IT인증 시험에 관한 모든 덤프를 제공해드립니다. 우선 시험센터에서 정확한 시험코드를 확인하시고 그 코드와 동일한 코드로 되어있는 덤프를 구매하셔서 덤프에 있는 문제와 답을 기억하시면 시험을 쉽게 패스하실 수 있습니다. 2V0-16.25시험은 IT인증 시험중에서 많은 인기를 가지고 있는 시험입니다. 2V0-16.25시험을 패스하여 자격증을 취득하시면 취업이나 승진에 많은 가산점이 되어드릴 것입니다.

## VMware 2V0-16.25 시험요강:

주제	소개
주제 1	<ul style="list-style-type: none"><li>VMware vSphere Foundation Fundamentals: This section of the exam measures the skills of Virtualization Engineers and focuses on the essentials of virtualization technology. It introduces the principles of virtualization, explores use cases, and highlights the value it brings to businesses. Candidates are expected to demonstrate knowledge of VMware compute components such as vCenter and ESX, cluster configuration, and lifecycle management of virtual machines. It also covers secure workload operations, encryption, and managing resources with content libraries. In addition, storage fundamentals are examined through configuring vSphere storage, deploying VMware vSAN clusters, defining storage policies, and ensuring data availability. Networking fundamentals are also introduced, requiring the ability to differentiate between VMware vSphere networking components.</li></ul>
주제 2	<ul style="list-style-type: none"><li>Plan and Design the VMware by Broadcom Solution: This section of the exam measures the ability of VMware Solution Architects to plan and design solutions. While there are no specific testable objectives included, the focus is on preparing professionals to design VMware-based solutions that align with organizational goals and best practices.</li></ul>

주제 3	<ul style="list-style-type: none"> <li>Troubleshoot and Optimize the VMware Solution: This section of the exam measures the ability of Systems Engineers to troubleshoot and optimize VMware-based environments. While no explicit testable objectives are listed, candidates are expected to apply their problem-solving skills to diagnose, resolve, and enhance VMware solutions for improved reliability and performance.</li> </ul>
주제 4	<ul style="list-style-type: none"> <li>Deploy, Configure, and Operate VMware vSphere Foundation (VVF): This section of the exam measures the expertise of Data Center Administrators and emphasizes hands-on skills in deploying and configuring VMware vSphere Foundation environments. Candidates must understand the components of a VVF deployment, configure Supervisors within clusters, and manage identity, access control, licensing, and certificate management. The objectives also extend to lifecycle management within the vSphere Foundation. Furthermore, it explores operational tasks including monitoring and analyzing logs, configuring alerting, managing dashboards, and integrating with VMware Cloud Foundation (VCF) Operations. Candidates will also be tested on cost and pricing configuration, compliance monitoring, and security hardening practices. Finally, automation skills are validated through deploying services with Supervisors, running Kubernetes workloads, using VM services, and integrating VCF Operations Orchestrator to support enterprise automation.</li> </ul>
주제 5	<ul style="list-style-type: none"> <li>IT Architectures, Technologies, Standards: This section of the exam measures the understanding of IT Infrastructure Architects and covers foundational concepts of architectures, emerging technologies, and industry standards. Although no testable objectives are listed here, it establishes the baseline knowledge needed to interpret and design VMware-related environments effectively.</li> </ul>

## 최신 VCP-VVF Admin 2V0-16.25 무료 샘플문제 (Q51-Q56):

### 질문 # 51

An administrator is following the concept of least privilege and must configure permissions in a vSphere environment granting members of the group corp\VM-Managers the following abilities:

- \* Power on/off virtual machines
- \* Open consoles
- \* Create snapshots

Which out-of-the-box role satisfies these access control requirements?

- A. Administrator
- B. Virtual Machine Console User
- C. Virtual Machine User
- D. Virtual Machine Power User

정답: D

### 설명:

The requirement is to follow least privilege while granting specific VM operations:

- \* Power on/off virtual machines
- \* Open consoles
- \* Create snapshots

The Virtual Machine Power User role is the correct out-of-the-box role, as it includes all these privileges without granting unnecessary administrative access.

Other roles:

- \* Administrator (A): Grants full environment control # too broad.
- \* Virtual Machine Console User (B): Limited to console access, cannot power on/off or snapshot.
- \* Virtual Machine User (C): Can interact with VMs but lacks snapshot privileges.

References:

VMware vSphere 9.0 Documentation -Default Roles and Permissions

VMware KB 1033138 -Privileges for VM Roles

### 질문 # 52

What is the benefit of enabling lockdown mode on VMware ESX hosts?

- A. Improves network performance.
- B. **Restricts direct access to the ESXi host, enhancing security.**
- C. Simplifies the management of virtual machines.
- D. Increases CPU and memory resources available to virtual machines (VMs).

**정답: B**

**설명:**

Lockdown Mode on ESXi hosts is a security feature that restricts direct logins to the ESXi host.

\* Once enabled, administrators must manage the host through vCenter Server instead of direct DCUI/SSH access (except for exception users).

\* This prevents unauthorized local access and improves overall security compliance.

Other options:

- \* A. Improves network performance# Not related.
- \* C. Increases CPU/memory for VMs# Not related.
- \* D. Simplifies VM management# It actually makes direct management more restricted.

VMware vSphere 9.0 -ESXi Lockdown Mode Overview

VMware Docs: Lockdown Mode in ESXi

**질문 # 53**

An administrator is tasked with creating dashboards to track system performance metrics for both the IT department and executive leadership. The requirements for this task are:

- \* The IT team needs detailed, technical metrics across all of the infrastructure components in the environment.
- \* The executives need high-level summaries that highlight Key Performance Indicators (KPIs) across the environment in a single dashboard.
- \* The executives need to access the dashboard via a shared URL.
- \* The dashboards must be capable of being shared, and always display the latest data collected when the link is used.

What two steps should the administrator perform to meet these requirements? (Choose two.)

- A. Create a Custom dashboard in VCF Operations for Logs to display the Key Performance Indicators.
- B. Use Out-of-the-Box dashboards in VCF Automation to highlight Key Performance Indicators.
- C. **Create a Custom dashboard in VCF Operations to highlight Key Performance Indicators.**
- D. Use Out-of-the-Box dashboards in VCF Operations to display detailed technical metrics.

**정답: C,D**

**설명:**

To satisfy both IT and executive requirements:

\* IT team# Needs detailed technical metrics, which are available through Out-of-the-Box dashboards in VCF Operations. (A)

\* Executives# Need a custom KPI-focused dashboard, with summaries and high-level visibility. This can be shared via a URL link that always shows the latest data. (B) Why others are incorrect:

\* C. Custom dashboard in VCF Operations for Logs# Logs are not KPI-focused performance metrics.

\* D. Out-of-the-Box dashboards in VCF Automation# VCF Automation is not designed for KPI reporting.

**질문 # 54**

How does an administrator configure VMware Cloud Foundation (VCF) Operations for logs to send Notifications and Metrics to VCF Operations?

- A. Configure the Integration through VCF Operations for Logs.
- B. Launch the wizard from VCF Operations.
- C. Launch the wizard from VCF Operations for Logs.
- D. **Configure the Integrations through VCF Operations.**

**정답: D**

### 설명:

To configure VMware Cloud Foundation (VCF) Operations for logsso that it can send notifications and metrics, administrators must use the Integrations workflow inside VCF Operations.

- \* You configure integrations centrally from the Administration > Integrations page in VCF Operations.
- \* Here you add the VCF Operations for Logs data source, configure credentials, and set up Webhooks for alerts.
- \* Once integration is completed, VCF Operations for Logs data can be consumed in VCF Operations dashboards and used for notifications and metrics.

This process is not launched directly from "VCF Operations for Logs," but rather from VCF Operations itself, where all integrations (vCenter, vSAN, NSX, and Logs) are centrally managed.

### 질문 # 55

An administrator needs to enable the enhanced capabilities of Storage Operations for vSAN 9.0 in VMware Cloud Foundation (VCF) Operations.

What three prerequisite steps must be completed in order to enable the advanced Diagnostic Troubleshooting, Benchmarking and Optimizing?

(Choose three.)

- A. Assign the credentials configured in the vCenter Integration instance have access to vSAN objects.
- B. Configure a vSAN account for the vCenter Integration Instance.
- C. Open port 5989 on each VCF Operations node on which the vSAN adapter exists.
- D. Enable and start the vSAN Performance service in the target vCenter.
- E. No configuration required, Run New Diagnostics is enabled automatically.
- F. Assign the VCF Operations Service Account administrative rights to vSAN Objects.

정답: A,B,D

### 설명:

To enable enhanced capabilities of Storage Operations for vSAN 9.0 in VCF Operations (Diagnostic Troubleshooting, Benchmarking, and Optimizing), administrators must complete several prerequisites that ensure vSAN health, performance, and permissions are properly set up.

- \* Enable and start the vSAN Performance service in the target vCenter (B):  
The vSAN Performance Service must be enabled for cluster-level monitoring.  
This provides the telemetry data needed for diagnostic and benchmarking capabilities in VCF Operations.  
Without enabling this service, no performance metrics can be collected.
- \* Configure a vSAN account for the vCenter Integration Instance (C):  
A dedicated vSAN service account must be configured so that VCF Operations can communicate with vCenter for vSAN data collection.  
This ensures secure and role-specific access for monitoring operations.
- \* Assign the credentials configured in the vCenter Integration instance to have access to vSAN objects (E):  
The credentials used in the vCenter integration must have the required privileges to access vSAN objects (such as datastore, cluster objects, and health checks).
- \* This ensures that VCF Operations can run diagnostics, benchmarking, and optimization functions without permission errors.

Why the other options are incorrect:

- \* A. No configuration required, Run New Diagnostics is enabled automatically:#Incorrect.

Configuration is required before these advanced features can be enabled.

- \* D. Assign the VCF Operations Service Account administrative rights to vSAN Objects:#Too broad and not a best practice.  
Instead, specific rights via the vCenter integration account (option E) are recommended.

- \* F. Open port 5989 on each VCF Operations node on which the vSAN adapter exists:#Not required for enabling vSAN advanced diagnostics in VCF 9.0. vSAN operations rely on vCenter connectivity, not direct port 5989.
