New CPC-CDE-RECERT Test Answers, CPC-CDE-RECERT Book Free

Have you ever used Actual4test CyberArk CPC-CDE-RECERT Dumps? The braindump is latest updated certification training material, which includes all questions in the real exam that can 100% guarantee to pass your exam. These real questions and answers can lead to some really great things. If you fail the exam, we will give you FULL REFUND. Actual4test practice test materials are used with no problem. Using Actual4test exam dumps, you will achieve success.

CyberArk CDE-CPC Recertification Sample Questions (Q90-Q95):

NEW QUESTION # 90

When installing PSM on a Windows 2019 Server, under which circumstances should the PSMConnect and PSMAAdminConnect users be moved to the domain? (Choose two.)

- A. When you want to extend PSM sessions beyond one hour
- B. When you want to load balance the PSM installation
- C. When you need to enable PSM for Web Support
- D. When RDS CAL Per User licenses are in use
- E. When the RDS session broker has a value > 1

Answer: A,D

Explanation:

CyberArk explicitly states that you must move PSM application users (PSMConnect/PSMAAdminConnect) to domain users on Windows 2019/2022 when:

- * you are using RDS CAL per-user licensing, and
- * you want to extend PSM sessions beyond one hour.

NEW QUESTION # 91

When installing the PSM and CPM components on the same Privilege Cloud Connector, what should you consider when hardening?

- A. PSM settings override the CPM settings when referring to the same parameter.
- B. CPM settings override the PSM settings when referring to the same parameter
- C. They can only be installed on the same Privilege Cloud Connector when installed 'out of Domain'.
- D. They can only be installed on the same Privilege Cloud Connector when installed 'in Domain'.

Answer: A

Explanation:

When installing the PSM and CPM components on the same Privilege Cloud Connector and considering the hardening process, it's important to note that PSM settings override the CPM settings when referring to the same parameter. This hierarchy is crucial in ensuring that the more stringent security settings required by PSM, which typically handles direct interaction with end-user sessions, take precedence over CPM settings.

This setup helps maintain robust security practices by applying the most restrictive configuration where conflicts occur.

NEW QUESTION # 92

What creating a new safe, what is the default number of password versions stored if using 'Save latest account versions' within version management settings?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: D

Explanation:

CyberArk's Safe creation documentation explains that when you choose "Save the last <number> account versions" (also shown as "Save latest account versions" in some UIs), the Safe retains the most recent password versions indefinitely by keeping a fixed number of versions and rolling off the oldest. It also states that by default, the last five password versions are stored.

NEW QUESTION # 93

You want to improve performance on the CPM by restricting accounts for the CYBRWINDAD platform to only the WINDEMEA and WINDEMEA_ADMIN Safes. How do you set this in CyberArk?

- A. In the CYBRWINDAD platform, under UI & Workflows > Properties > Optional, configure AllowedSafes and set it to (WINDEMEA)|(WINDEMEA_ADMIN).
- B. Modify cpm.ini on the relevant CPM(s) and add AllowedSafesCYBRWINDAD and set it to (WINDEMEA)|

(WINDEMEAADMIN).

- C. In the CYBRWINDAD platform, under Automatic Password Management > General, configure AllowedSafes and set it to (WINDEMEA)(WINDEMEA_ADMIN).
- D. In the settings for Configuration/CPM assigned to the WINDEMEA and WINDEMEAADMIN Safes, configure AllowedSafes and set it to (WINDEMEA)(WINDEMEAADMIN).

Answer: C

Explanation:

CyberArk's official guidance for restricting a platform to specific Safes is to set the AllowedSafes platform parameter in the General section of the platform under Automatic Password Management.

AllowedSafes uses a regular expression to match Safe names, which is why a pattern such as (WINDEMEA)|(WINDEMEA_ADMIN) is used to allow exactly those two Safe names.

NEW QUESTION # 94

Which statement best describes a PSM server's network requirements?

- A. It requires limited outbound connectivity to Ports 1858 and 443 only.
- B. It must reach the target system using its native protocols.
- C. It requires broad inbound firewall rules and outbound traffic should be limited to Port 1858.
- D. It requires direct access to the internet.

Answer: B

Explanation:

For a Privilege Session Manager (PSM) server, the network requirements primarily focus on its ability to interact with target systems securely and efficiently. The most accurate statement regarding these requirements is:

* It must reach the target system using its native protocols (Option B). This is essential for the PSM to manage sessions effectively, as it needs to communicate using the protocols that the target systems are configured to accept, such as SSH for Linux servers or RDP for Windows servers.

Reference: CyberArk's PSM documentation typically outlines the need for PSM servers to have network paths configured to communicate directly with target systems using the relevant protocols to ensure secure and controlled session management.

NEW QUESTION # 95

.....

Nowadays passing the test CPC-CDE-RECERT certification is extremely significant for you and can bring a lot of benefits to you. Passing the CPC-CDE-RECERT test certification does not only prove that you are competent in some area but also can help you enter in the big company and double your wage. Buying our CPC-CDE-RECERT Study Materials can help you pass the test easily and successfully. And at the same time, you don't have to pay much time on the preparation for our CPC-CDE-RECERT learning guide is high-efficient.

New CPC-CDE-RECERT Test Answers: https://www.actual4test.com/CPC-CDE-RECERT_examcollection.html

And we provide a series of the core content of CPC-CDE-RECERT exam dumps files and convenience for many of the examinees participating in the qualification certification exams except the pass rate of 100%, CyberArk CPC-CDE-RECERT Latest Exam Question We build long-term cooperation with a large quantity of companies owing to our best customer service, If you want to advance in this fast-growing technological world, CyberArk CPC-CDE-RECERT certification is a must.

Most clearly, however, visibility is only a precursor to reputation, This CPC-CDE-RECERT is likely good news for the people who rent Airbnb spaces, but likely not good news for individuals who rent out rooms/apartments part time.
