Pass Guaranteed Quiz 2026 Newest Microsoft GH-900 Valid Study Plan

Dumps4PDF's training product for Microsoft certification GH-900 exam includes simulation test and the current examination. On Internet you can also see a few websites to provide you the relevant training, but after compare them with us, you will find that Dumps4PDF's training about Microsoft Certification GH-900 Exam not only have more pertinence for the exam and higher quality, but also more comprehensive content.

Microsoft GH-900 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Privacy, Security, and Administration: This domain measures skills of Security Administrators and Organization Managers in securing and administering GitHub environments. It covers ensuring repository security through branch protection rules, using security tools like Dependabot, managing access and permissions at repository and organization levels, creating and managing organizations, setting up organization-level security, and overseeing teams and members.
Topic 2	<ul style="list-style-type: none">• Working with GitHub Repositories: This domain targets Repository Administrators and Content Managers, focusing on managing repository settings and permissions. Candidates learn to configure repositories, use templates, and effectively manage files by adding, editing, and deleting. The domain also addresses versioning of files and the use of GitHub Desktop for streamlined file management tasks within repositories.

Topic 3	<ul style="list-style-type: none"> • Collaboration Features: This section measures skills of Software Engineers and Team Leads and covers collaborative workflows using GitHub. It includes forking repositories, creating and managing pull requests, reviewing and merging code changes, and using GitHub Actions to support CI • CD pipelines. Candidates also explore project management features such as creating and managing issues, using labels, milestones, and project boards, and tracking progress through GitHub Projects.
Topic 4	<ul style="list-style-type: none"> • Introduction to Git and GitHub: This section of the exam measures skills of Junior Developers and Platform Support Specialists and covers the basic understanding of Git and GitHub. It explains what Git is and why it is used, the fundamental Git workflow, and concepts related to repositories including their local and remote distinctions. Candidates learn essential Git commands such as initializing and cloning repositories, adding and committing changes, pushing and pulling updates, and branching and merging. It also covers navigating GitHub by creating accounts, managing repositories, understanding its interface, and working with issues and pull requests.
Topic 5	<ul style="list-style-type: none"> • Modern Development: This domain assesses abilities of DevOps Engineers and Continuous Integration Specialists in implementing modern development practices. It emphasizes understanding DevOps principles and leveraging GitHub Actions for automation and CI • CD pipeline implementation. Candidates also learn GitHub's tools and best practices for conducting and managing code reviews.
Topic 6	<ul style="list-style-type: none"> • Project Management: This section is designed for Project Coordinators and Product Managers and focuses on using GitHub Projects for project management. Candidates learn to create and manage GitHub Projects, utilize project boards for organizing tasks, and integrate project workflows with issues and pull requests to maintain project visibility and progress.

Microsoft GitHub Foundations Sample Questions (Q88-Q93):

NEW QUESTION # 88

What folder is the definition files stored in when creating custom issue forms?

- A. `.issues/ISSUE_TEMPLATE`
- B. `.github/ISSUE_TEMPLATE`
- C. `.issues`
- D. `.GitHub`

Answer: B

Explanation:

When creating custom issue forms on GitHub, the definition files are stored in the `.github/ISSUE_TEMPLATE` folder. This directory is used to define issue templates and forms that help standardize the information collected when users open new issues in the repository. The `.github` folder is a special directory used for various repository configurations and workflows.

NEW QUESTION # 89

Which of the following features does GitHub provide to enhance collaboration within teams?

- A. code review and discussion through issues and pull requests
- B. real-time collaboration through pair programming
- C. git repositories hosting and sharing capabilities
- D. automated testing and code quality analysis

Answer: A

NEW QUESTION # 90

What are advantages of GitHub Projects over GitHub Projects Classic? (Choose two.)

- A. GitHub Projects can be connected to third-party tools.

- B. GitHub Projects are Copilot enabled.
- C. GitHub Projects has multiple layout views.
- D. GitHub Projects has Insights.

Answer: C,D

Explanation:

GitHub Projects is a newer, more powerful version of project management within GitHub, offering enhanced features over the classic version.

Multiple Layout Views:

Option A is correct because GitHub Projects supports multiple views, such as board, table, and timeline views, allowing users to visualize their work in different ways according to their needs.

Insights:

Option B is correct because GitHub Projects provides insights and analytics, enabling teams to track progress and make data-driven decisions.

NEW QUESTION # 91

For which of the following does GitHub provide hosted runners?

- A. Kubernetes
- B. AWS, Azure, and GCP
- C. Docker
- D. Linux, Windows, and macOS

Answer: D

NEW QUESTION # 92

Which GitHub tools or features is best to quickly modify a batch of files in a repository?

- A. Use `github.dev` from a web browser.
- B. Create and use a new GitHub Codespace.
- C. Install and use GitHub Mobile.
- D. Install and use the `git` CLI.
- E. Install and use GitHub Desktop.

Answer: E

Explanation:

GitHub Desktop: This is a graphical desktop application that provides an easy-to-use interface for managing your repositories. It allows you to perform bulk actions like staging multiple files or commits, which is useful for batch modifications.

Incorrect:

[Not B] Scripting is more time consuming.

GitHub CLI (Command Line Interface): The command line interface allows you to use powerful scripting to automate modifications across multiple files. For example, using commands like `git add` and `git commit` can help you stage and commit all changes at once.
