- B. Create a Lookup Relationship on opportunities.
- C. Create a Master-Detail Relationship on opportunities.
- **D. Create a Master-Detail Relationship field on adjustment**

Answer: D

NEW QUESTION # 128

The administrator at Cloud Kicks has been requested to provide access to the Leads object to a contractor. The contractor currently has a profile that has access to a project management app within Salesforce. The contractor should only have View access to all of the Lead records.

What should the administrator handle this request?

- **A. Assign a permission set that has View All on Leads.**
- B. Assign the contractor a public group with Lead access.
- C. Create a profile with Read Only for all Leads.

- D. Add an app with the Leads tab to the user's profile.

Answer: A

Explanation:

Permission sets are collections of settings and permissions that give users access to various tools and functions without changing their profile or requiring multiple profiles for users who perform different tasks across apps in your org. By assigning a permission set that has View All on Leads to the contractor, Cloud Kicks can grant them view access to all lead records without modifying their profile or creating a new one. NEW QUESTION # 129

Which two tools should an administrator use to required data to be entered in a field and improve data quality on a record in Salesforce?

Choose 2 answers

- A. Page Layouts
- B. Workflow Rules
- C. validation Rules
- D. Dashboards

Answer: A,C

Explanation:

Validation rules and page layouts are two tools that can be used to require data to be entered in a field and improve data quality on a record in Salesforce. Validation rules are a way to enforce data quality and integrity by checking the values of fields before a record is saved and displaying an error message if the values do not meet the specified criteria. Page layouts are a way to control the layout and organization of fields, buttons, related lists, and other components on a record page. Page layouts can also make fields required so that users must enter a value before saving a record.
