Our company has successfully created ourselves famous brands in the past years, and all of the CDCS-001 valid study guide materials from our company have been authenticated by the international authoritative institutes and cater for the demands of all customers at the same time. We are attested that the quality of the [CDCS-001 Test Prep](#) from our company have won great faith and favor of customers. We persist in keeping creating the best helpful and most suitable CDCS-001 study practice question for all customers.

Individuals who hold the GAQM CDCS-001 certification are in high demand and can expect to earn a competitive salary. Certified Data Centre Specialist (CDCS) certification is recognized globally and demonstrates an individual's commitment to continuous learning and professional development in the data center industry. The CDCS certification is an excellent choice for IT professionals who want to enhance their skills, increase their earning potential, and advance their careers in the field of data center management.

The CDCS certification is highly valued by employers and is recognized globally, making it an excellent addition to any data centre professional's resume. Certified Data Centre Specialist (CDCS) certification demonstrates the candidate's dedication and expertise in data centre design and management, and provides them with a competitive edge in the job market. Additionally, the certification is a gateway to higher-level certifications, such as the Certified Data Centre Expert (CDCE) and the Certified Data Centre Professional (CDCP), allowing professionals to further specialize and advance their careers in the data centre industry.

## CDCS Test Simulator Online & CDCS Latest Test Prep

There are three versions of CDCS training materials for the candidate of you, and different versions have different advantages, you can use it in accordance with your own habit. Free update for each version for one year, namely, you don't need to buy the same

version for many times, and the update version will send to you automatically. You will get the latest version of CDCS Training Materials.

## EXIN CDCS Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Designing and Implementing a Data Centre: In this module, the exam assesses the knowledge of Exin data center professionals tasked with the design and implementation of data centers. Candidates will learn the key principles of creating an efficient data center layout, including considerations for scalability, redundancy, and security.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Data Centre Life Cycle and Standards: This section of the exam measures the skills of data center professionals and covers the various stages involved in the life cycle of a data center, from planning and design to implementation and decommissioning.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Data Centre Environmental Considerations and Efficiency: This section evaluates the proficiency of data center professionals in addressing environmental factors and promoting efficiency within data center operations. The target audience, including data center managers and engineers, will be tested on their ability to identify and implement measures that enhance energy efficiency, cooling management, and sustainable practices.</li></ul>

## EXIN EPI Certified Data Centre Specialist Sample Questions (Q56-Q61):

### NEW QUESTION # 56

You are allowed to use a calculator for this question.

A computer room has a net volume of approximately 2,500 m<sup>3</sup> / 88,287 ft<sup>3</sup>.

The temperature is 20 °C / 68 °F.

The required design concentration is 7%.

The S-Factor is 0.1359 (metric) / 1.885 (imperial).

Calculate the amount of gas required for this computer room based on FM200. What is the correct weight?

- A. Approximately 820 kg / 1,800 lbs
- B. Approximately 1,640 kg / 3,600 lbs
- C. Approximately 1,390 kg / 3,000 lbs
- D. Approximately 410 kg / 900 lbs

**Answer: A**

Explanation:

The amount of FM200 gas required can be calculated using the formula:

Weight of Gas = Net Volume × Design Concentration × S-Factor  
 $\text{Weight of Gas} = \text{Net Volume} \times \text{Design Concentration} \times \text{S-Factor}$

Weight of Gas = Net Volume × Design Concentration × S-Factor

Using metric units:

\* Net Volume: 2,500 m<sup>3</sup>

\* Design Concentration: 7% (or 0.07)

\* S-Factor: 0.1359

Calculation:

$2,500 \text{ m}^3 \times 0.07 \times 0.1359 = 821.325 \text{ kg}$
