SAP C_WME_2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Getting Started with Building WalkMe Solutions: This section of the exam evaluates the capabilities of WalkMe implementers and focuses on the practical aspects of creating and configuring WalkMe solutions. It includes understanding the WalkMe Editor, planning solution flows, creating Smart Walk-Thrus, Launchers, and ShoutOuts, and managing end-user guidance effectively. Candidates should be comfortable building initial WalkMe experiences that improve SAP usability and provide contextual help for users navigating SAP applications.
Topic 2	<ul style="list-style-type: none">Advancing your Skills in Building WalkMe Solutions: This section of the exam tests the advanced competencies of functional and business analysts in designing more complex and customized WalkMe solutions within SAP platforms. It requires a deeper understanding of user segmentation, advanced rules and triggers, performance optimization, and the use of analytics to refine user experiences. Candidates are expected to demonstrate their ability to design scalable and impactful guidance that aligns with SAP business processes and drives user adoption across the enterprise.

Topic 3	<ul style="list-style-type: none"> • Starting your Digital Adoption Journey: WalkMe Fundamentals: This section of the exam measures the skills of SAP project managers and covers the foundational concepts of digital adoption within SAP environments using WalkMe. Candidates are expected to understand the value of digital adoption platforms, the basic components of WalkMe, and how these tools align with business goals. The section emphasizes knowledge of the user experience within SAP and the ability to identify opportunities for improving digital workflows through in-app guidance and automation.

During the whole year after purchasing, you will get the latest version of our C_WME_2506 Study Materials for free.

SAP Certified Associate - WalkMe Digital Adoption Consultant Sample Questions (Q40-Q45):

NEW QUESTION # 40

Which two types of WalkMe content can make up an Onboarding Task?

- A. SmartTips and Launchers
- B. Resources and Shuttles
- C. Smart Walk-Thrus and Shuttles
- D. Smart Walk-Thrus and Resources

Answer: D

Explanation:

An Onboarding Task in WalkMe is a collection of steps or content designed to guide users through a set of actions to complete an onboarding process. The two types of WalkMe content that can be included in an Onboarding Task are Smart Walk-Thrus, which provide step-by-step guidance through processes, and Resources, which link to help articles or external documentation to support onboarding. These content types are versatile and align with the goal of guiding users through critical tasks.

The other options are incorrect:

- * SmartTips and Launchers (A) are not part of Onboarding Tasks; SmartTips are field-specific, and Launchers trigger other content.
- * Resources and Shuttles (C) are partially correct, but Shuttles only navigate to pages, not guide through tasks.
- * Smart Walk-Thrus and Shuttles (D) are also partially correct, but Shuttles are not task components.

Extract from Official WalkMe Documentation:

According to the WalkMe Editor User Guide (SAP WalkMe Digital Adoption Consultant Study Guide, Section 1.8: Onboarding Tasks):

"Onboarding Tasks consist of Smart Walk-Thrus, which guide users through processes, and Resources, which provide supplementary help content to complete onboarding." The course Getting Started with Building WalkMe Solutions states: "Build Onboarding Tasks using Smart Walk-Thrus for process guidance and Resources for additional support, ensuring users have the tools to complete onboarding." Option B, Smart Walk-Thrus and Resources, is the correct answer.

NEW QUESTION # 41

You're having trouble with a Smart Walk-Thru. Many users are activating this Smart Walk-Thru from the Menu when they are halfway through the process, and the flow begins from the first step every time.

What is this Smart Walk-Thru missing?

- A. Start Points
- B. Splits
- C. A Goal
- D. Wait For Conditions

Answer: A

NEW QUESTION # 42

The ShopMe team wants to put a Launcher on every product page. Example URLs of the product pages are as follows:

<http://shopme.walkme.com/product/taylor-swift-1989/>

<http://shopme.walkme.com/product/nicki-minaj-the-pinkprint/>

<http://shopme.walkme.com/product/beyonce-beyonce/>

How would they build the Current URL rule for when this should appear with best practices in mind?

- A. Current URL > contains > shopme.walkme.com
- B. Current URL > is like > shopme.walkme.com/product
- C. Current URL is like > walkme.com
- D. **Current URL > contains > /product**

Answer: D

NEW QUESTION # 43

While doing Quality Assurance for a SmartTip, you notice that when you scroll up and down the page, the SmartTip appears to scroll up and down as well before snapping back to its proper location next to your element. Which configuration should you adjust to fix this?

- A. Display Condition
- B. **Lock to Element**
- C. Selected Element # Appears and disappears as a result of end user action
- D. Z-Index

Answer: B

Explanation:

The issue described—where a SmartTip scrolls with the page before snapping back to its intended position—indicates that the SmartTip is not properly anchored to its associated element. The Lock to Element configuration ensures that the SmartTip remains fixed relative to the selected element, even during scrolling or dynamic page changes. Enabling this setting in the WalkMe Editor prevents the SmartTip from moving independently and ensures it stays aligned with the target element.

The other options are incorrect:

* Display Condition(A) controls when the SmartTip appears based on rules, not its positioning behavior.

* Z-Index(B) affects stacking order, not scrolling alignment.

* Appears and disappears as a result of end user action(C) relates to element visibility triggers, not anchoring during scrolling.

Extract from Official WalkMe Documentation:

According to the WalkMe Editor User Guide (SAP WalkMe Digital Adoption Consultant Study Guide, Section 2.5: SmartTips): "The 'Lock to Element' setting ensures that a SmartTip remains anchored to its selected element, preventing it from scrolling independently or misaligning during page interactions like scrolling." The course Advancing Your Skills in Building WalkMe Solutions advises:

"If a SmartTip moves with page scrolling before snapping back, enable 'Lock to Element' in the Editor to maintain consistent positioning relative to the target element." Option D, Lock to Element, resolves the scrolling issue observed during Quality Assurance.

NEW QUESTION # 44

There is a new process on your site that is crucial for all employees to complete. Users need to navigate to the time submission page,

log their time for the quarter, and submit it in the platform. You have created a Smart Walk-Thru for this process. What should be the Goal?

- A. User is on the time submission pages and clicks the submit button.
 - B. User inputs time into input fields
 - C. User is on the site and clicks a submit button
 - D. User navigates to the time submission page

Answer: A

NEW QUESTION # 45
