## 156-315.81 Dump Check - Reliable 156-315.81 Braindumps

The customers can immediately start using the Check Point Certified Security Expert R81 (156-315.81) exam dumps of TrainingDumps after buying it. In this way, one can save time and instantly embark on the journey of Check Point Certified Security Expert R81 (156-315.81) test preparation. 24/7 customer service is also available at TrainingDumps. Feel free to reach our customer support team if you have any questions about our 156-315.81 Exam Preparation material.

## CheckPoint Check Point Certified Security Expert R81 Sample Questions (Q512-Q517):

### NEW QUESTION # 512

What needs to be configured if the NAT property 'Translate destination or client side' is not enabled in Global Properties?

- A. Use the file local.arp to add the ARP entries for NAT to work.
- B. Enabling 'Allow bi-directional NAT' for NAT to work correctly.
- C. A host route to route to the destination IP.
- D. Nothing, the Gateway takes care of all details necessary.

**Answer: D**

Explanation:

The NAT property 'Translate destination or client side' is used to determine whether the destination IP address of a packet should be translated on the client side or the server side of a connection. If this property is not enabled, then the destination IP address is translated on the server side, which means that the gateway takes care of all details necessary for NAT to work. The gateway will send an ARP request for the translated IP address and will reply to any ARP requests for that address. Therefore, there is no need to configure a host route, use the local.arp file, or enable bi-directional NAT for NAT to work correctly. References: R81 Security Management Administration Guide, page 1010.

#### NEW QUESTION # 513

Which of the completed statements is NOT true? The WebUI can be used to manage user accounts and:

- A. assign privileges to users.
- **B. assign user rights to their home directory in the Security Management Server.**
- C. add users to your Gaia system.
- D. edit the home directory of the user.

**Answer: B**

Explanation:

Explanation

The WebUI can be used to manage user accounts and assign privileges to users. It can also add users to your Gaia system and edit the home directory of the user. However, it cannot assign user rights to their home directory in the Security Management Server1.

References: Check Point Resource Library, page 3.

#### NEW QUESTION # 514

When synchronizing clusters, which of the following statements is FALSE?

- A. The state of connections using resources is maintained in a Security Server, so their connections cannot be synchronized.
- B. In the case of a failover, accounting information on the failed member may be lost despite a properly working synchronization.
- **C. Only cluster members running on the same OS platform can be synchronized.**
- D. Client Authentication or Session Authentication connections through a cluster member will be lost if the cluster member fails.

**Answer: C**

Explanation:

Explanation

The statement that only cluster members running on the same OS platform can be synchronized is false.

Cluster members can be synchronized even if they run on different OS platforms, as long as they have the same Check Point version and hotfixes installed. The other statements are true. The state of connections using resources is maintained in a Security Server, so their connections cannot be synchronized. In the case of a failover, accounting information on the failed member may be lost despite a properly working synchronization. Client Authentication or Session Authentication connections through a cluster member will be lost if the cluster member fails. References: R81 ClusterXL Administration Guide, page 9-10; [R81 Security Gateway Architecture], page 23

#### NEW QUESTION # 515

Check Point Support in many cases asks you for a configuration summary of your Check Point system. This is also called:

- A. cpexport
- B. cpsizeme
- C. sysinfo
- **D. cpinfo**

**Answer: D**

Explanation:

Check Point Support in many cases asks you for a configuration summary of your Check Point system. This is also called cpinfo. Cpinfo is a utility that collects diagnostic data on a Check Point gateway, management server, or log server. It generates a file that contains information such as product version, license details, OS details, network configuration, installed hotfixes, status of Check Point processes, firewall tables, etc. This file can be used by Check Point Support to troubleshoot issues or analyze performance. Reference: [Cpinfo Utility]

#### NEW QUESTION # 516

When Configuring Endpoint Compliance Settings for Applications and Gateways within Mobile Access, which of the three approaches will allow you to configure individual policies for each application?

- A. Very Advanced Approach
- B. Basic Approach
- C. Medium Approach
- D. Strong Approach

Answer: A

Explanation:

The approach that will allow you to configure individual policies for each application when configuring Endpoint Compliance Settings for Applications and Gateways within Mobile Access is Very Advanced Approach. This approach lets you define compliance rules for each application separately and assign different actions for each rule. You can also create custom messages and notifications for each application. The other approaches are either less granular or not applicable in this scenario. The Basic Approach lets you define compliance rules for all applications globally and assign a single action for all rules. The Medium Approach lets you define compliance rules for all applications globally and assign different actions for each rule. The Strong Approach is not a valid option for Endpoint Compliance Settings. Reference: [Endpoint Compliance Settings]

#### NEW QUESTION # 517

.....

You can use this 156-315.81 practice exam software to test and enhance your Check Point Certified Security Expert R81 (156-315.81) exam preparation. Your practice will be made easier by having the option to customize the 156-315.81 Exam Dumps. The fact that it runs without an active internet connection is an incredible comfort for users who don't have access to the internet all the time.
