JN0-650 Simulated Test & JN0-650 Download

There are three effect versions of the date available for candidates who want to pass the JN0-650 exam. PDF, APP and Software, each version has its advantage, and each version is the most effect way. You can choose the most suitable version to learn. Of course, if you want to, you can choose more than one version to prepare your JN0-650 exam. Our exam materials allow you to prepare for the Real JN0-650 Exam and will help you with the self-assessment. If you like use paper to learn, you can print in PDF; if you like learn with electronic equipment, you can use our APP online version offline. Our Juniper practice test software will give you a real exam environment with multiple learning tools that allow you to do a selective study and will help you to get the job that you are looking for.

Juniper Enterprise Routing and Switching, Professional (JNCIP-ENT) Sample Questions (Q73-Q78):

NEW QUESTION # 73

Which two statements are true regarding auto-RP? (Choose two.)

- A. It requires both sparse and dense mode PIM.
- B. It requires PMI Sparse mode only.
- C. It uses flood and prune in the network.
- D. It requires PMI Dense mode only.

Answer: A,C

NEW QUESTION # 74

Which two statements are true regarding hierarchical policers? (Choose two.)

- A. Premium traffic must have an action of discard for out-of-profile traffic.
- B. Traffic must be classified as premium or non-premium before evaluation.
- C. Traffic is classified as premium or non-premium by the policer.
- D. Aggregate traffic must have an action of discard for out-of-profile traffic.

Answer: A,B

NEW QUESTION # 75

Which two statements are true regarding traffic forwarding in an OSPF environment? (Choose two.)

- A. Inter-area routes are always preferred over intra-area routes.
- B. The shortest cost path may not be chosen for forwarding.
- C. The shortest cost path is always chosen for forwarding.
- D. Intra-area routes are always preferred over inter-area routes.

Answer: B,D

NEW QUESTION # 76

You are asked to enforce user authentication using a captive portal before users access the corporate network. Which statement is correct in this scenario?

- A. When enabled, a captive portal must be applied to each individual interface.
- B. A captive portal can be bypassed using an allowlist command containing a device's IP address.
- C. All Web browser requests are redirected to the captive portal until authentication is successful.
- D. HTTPS is the default protocol for a captive portal.

Answer: C

NEW QUESTION # 77

Exhibit.

Referring to the exhibit, you see that the 0.0.0.0/0 route is coming from AS 64512. What is the command to achieve this task?

- A. show route receive-protocol bgp <peer ip>
- B. show route protocol bgp source-gateway <peer ip>
- C. show route receive-protocol bgp <peer ip> hidden
- D. show route protocol bgp next-hop < peer ip>

Answer: C

Explanation:

The exhibit shows a BGP routing process where an Import Policy is being applied to routes received in the RIB-IN. Specifically, Policy 1 states: "Reject 0.0.0.0/0 from AS 64512." In Junos OS, when a routing policy rejects a route, that route is not placed in the main routing table (inet.0) for active use. Instead, it becomes a hidden route. To verify that a specific peer is actually sending a route that is subsequently being rejected by your policy, you must use specific diagnostic commands:

* Understanding "Hidden" Routes: When a BGP route is received but fails to meet policy requirements (or has an unreachable next-

hop), Junos keeps it in the BGP RIB-IN but marks it as

"hidden." It will not appear in a standard show route command.

* Command Logic (Option D): The command show route receive-protocol bgp <peer ip> hidden allows an administrator to view all routes received from a specific neighbor, including those that were rejected by import policies.

* show route receive-protocol bgp <peer ip>: Shows only the routes that passed the import policy and were accepted into the table. Since the 0.0.0.0/0 route from AS 64512 is explicitly rejected in the exhibit, it would not show up here.

* Adding the hidden keyword is the essential step to see the rejected default route and verify that AS 64512 is indeed sending it before the policy drops it.

* Other Options:

* Option A is incorrect because it only shows accepted routes.

* Option B and C are used to filter the existing active routing table based on gateway or next-hop attributes, but they cannot show routes that have been rejected and excluded from that table.

NEW QUESTION # 78

.....

Our JN0-650 Study Materials include 3 versions: the PDF, PC and APP online. You can understand each version's merits and using method in detail before you decide to buy our JN0-650 study materials. For instance, PC version of our JN0-650 training quiz is suitable for the computers with the Windows system. It is a software application which can be installed and it stimulates the real exam's environment and atmosphere. It builds the users' confidence and can be practiced and learned at any time.

JN0-650 Simulated Test: <https://www.pass4surecert.com/Juniper/JN0-650-practice-exam-dumps.html>

The JN0-650 certificate stands out among the numerous certificates because its practicability and role to improve the clients' stocks of knowledge and practical ability, Juniper JN0-650 Real Dumps Free You need to purchase the practice exam, which is quite steep (\$99) but still it shows you how the exam will be and what to expect, Annual qualification examination, although content broadly may be the same, but as the policy of each year, the corresponding examination pattern grading standards and hot spots will be changed, as a result, the JN0-650 test prep can help users to spend the least time, you can know the test information directly what you care about on the learning platform that provided by us, let users save time and used their time in learning the new hot spot concerning about the knowledge content.
