For the office worker, they are both busy in the job or their family; for the students, they possibly have to learn or do other things. But if they use our CPRE-FL_Syll_3.0 test prep, they won't need so much time to prepare the exam and master exam content in a short time. What they need to do is just to spare 1-2 hours to learn and practice every day and then pass the exam with CPRE-FL_Syll_3.0 Test Prep easily. It costs them little time and energy.

The CPRE-FL_Syll_3.0 Certification program is administered by the International Requirements Engineering Board (IREB), a non-profit organization that is dedicated to promoting the development of high-quality requirements engineering practices. IREB Certified Professional for Requirements Engineering. Foundation Level certification program is recognized by a wide range of organizations and institutions around the world and is highly regarded in the software development industry.

ISQI IREB Certified Professional for Requirements Engineering. Foundation Level Sample Questions (Q152-Q157):

NEW QUESTION # 152

Which definition best characterizes the term "traceability" in terms of requirements engineering? (2 Points)

- A. Monitoring of progress in requirements elicitation
- B. Traceability of the effort for the elicitation of requirements, beginning with the elicitation of the documentation right to the point of requirements acceptance
- C. Ability to analyze requirements for contradictory content, especially between the requirements specifications and the test cases
- D. Level of stabilisation between the elicited and approved requirements
- E. Traceability of the requirements, along with the associated documents, from the requirements elicitation to the implementation

Answer: E

NEW QUESTION # 153

A participatory RE process is commonly used in agile environments and is iterative. Besides being iterative, this process should also be:

- A. Prescriptive and customer-specific
- B. Explorative and market-oriented
- C. Explorative and customer-specific
- D. Prescriptive and market-oriented

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

CPRE describes typical facet combinations. Participatory RE involves close collaboration between customer stakeholders and the development team, as seen in agile projects. It is inherently iterative-requirements emerge and evolve through sprints-and explorative, because understanding deepens over time. It is also customer-specific: the system is built primarily for one customer organization. Prescriptive processes, in contrast, aim at fixed upfront specifications and are more aligned with contractual or market-oriented product development. Hence, the correct facet combination for participatory RE is explorative, iterative and customer-specific (option A).

NEW QUESTION # 154

You are to create a requirements specification for an internet banking software. The system shall perform bank credit transfers and therefore receives from the user, among other information, the bank identification code and the name of the bank. Now things have changed so that only the bank identification code must be entered by the user and the bank name is no longer required. On which

part of your documentation do you most likely have to work in order to incorporate this change? (2 Points)

- A. As a change in the goals has been communicated, the goals in the specification must be updated.
- B. You have to adjust the class model and/or the data model, which describe the structure of the system's input and output data.
- C. If it is about inputs and outputs of the system, this change has to be worked into the context diagram.
- D. Nowhere, since this is a detail for the architecture.
- E. In the chapter in which the states of the system are described.

Answer: A,C

NEW QUESTION # 155

Your company works intensively with models in requirements engineering and uses UML for the description of models. Which three capabilities should a modeling tool possess in order to be able to create traceable models in the requirements engineering? (3 Points)

- A. The modeling tool creates reports suitable for management
- B. The model is exported in the XML format
- C. The models are checked for conformity with the UML definition
- D. The model elements can be stored under version control
- E. Model elements can be linked via hyperlinks
- F. Every model element must possess an ID

Answer: B,D,E

NEW QUESTION # 156

Choose the right sentence regarding the types of views:

- A. A selective view presents a subset of the available data (attributes) for the requirements.
- B. Projective views provide information on a carefully chosen subset of requirements.
- C. All the other options are wrong.
- D. An aggregating view presents summaries, totals, or averages derived from a group of requirements.

Answer: D
