As the old saying goes, Rome was not built in a day. For many people, it's no panic passing the HPE7-A06 exam in a short time. Luckily enough, as a professional company in the field of HPE7-A06 practice questions, our products will revolutionize the issue. The HPE7-A06 Study Materials that our professionals are compiling which contain the most accurate questions and answers will effectively solve the problems you may encounter in preparing for the HPE7-A06 exam.

You can free download HP HPE7-A06 exam demo to have a try before you purchase HPE7-A06 complete dumps. Instant download for HPE7-A06 trustworthy Exam Torrent is the superiority we provide for you as soon as you purchase. We ensure that our HPE7-A06 practice torrent is the latest and updated which can ensure you pass with high scores. Besides, Our 24/7 customer service will solve your problem, if you have any questions.

## New HP HPE7-A06 Exam Review, HPE7-A06 Exam Prep

In order to meet your different needs for HPE7-A06 exam dumps, three versions are available, and you can choose the most suitable one according to your own needs. All three version have free demo for you to have a try. HPE7-A06 PDF version is printable, and you can print them, and you can study anywhere and anyplace. HPE7-A06 Soft text engine has two modes to practice, and you can strengthen your memory to the answers through this way, and it can also install in more than 200 computers. HPE7-A06 Online Test engine is convenient and easy to learn, and you can have a general review of what you have learned through

the performance review.

## HPE Campus Access Switching Expert Written Exam Sample Questions (Q40-Q45):

### NEW QUESTION # 40

Drag and Drop Question

Place the steps in sequence.

What is the order of the recommended steps to troubleshoot an issue?

**Answer:**

Explanation:

Explanation:

First Identify the issue.

Analyze the symptoms and data.

Hypothesize the root cause.

Implement a fix.

Verify that the solution resolves the problem

Validate with stakeholders or production tests that the system is fully operational.

### NEW QUESTION # 41

A senior engineer from the network operations team has reported an intermittent problem where some PoE-powered devices are randomly losing power. During your investigation, you find that port 1 of the Acc-1 switch is currently presenting the behavior shown in the CLI output for the Acc-1.

```

switch# show power-over-ethernet brief
Status and Configuration Information for PoE
Power Status
Available: 370 W Reserved: 360.60 W Remaining: 9.40 W
Always-on PoE Enabled: none
Quick PoE Enabled: None
PoE Pwr Power Pre-std Alloc PSE Pwr PD Pwr PoE Port PD Cls Type
Port En Priority Detect Act Rsrvd Draw Status Sign
-----
1/1/1 Yes Low Off Class 0.0 W 0.0 W Denied None 4 2
1/1/2 Yes Critical Off Usage 1.6 W 1.5 W Delivering* Single 0 1
1/1/3 Yes High Off Class 54.0 W 25.5 W Delivering^ Dual 1/3 3
1/1/4 No Low On Usage 0.0 W 0.0 W Disabled None N/A N/A
*This port may go down in the event of a PSU failure.
^This port is power demoted due to user config or power availability.

```

What is a probable cause for poor 1/1/1 is denying PoE?

- A. PoE was manually disabled for port 1/1/1
- B. PoE port priority set to low
- C. This switch does not support PoE class 4.
- D. switch PoE power budget exceeded**

**Answer: D**

Explanation:

The output shows: Available: 370 W, Reserved: 360.60 W, Remaining: 9.40 W.

Port 1/1/1 has status "Denied" for PoE power delivery and is set to "Low" priority.

This means the PoE power budget is nearly exhausted and the switch cannot allocate more PoE power to additional ports, especially those with low priority.

**NEW QUESTION # 42**

A pair of CX 8325 series switches are configured in a VSX cluster. Which function is executed on both VSX members during normal operation?

- A. relays DHCP requests or serves DHCP offer
- B. replies to ARP requests with the cluster vMAC**
- C. routes PIM and PIM-DR
- D. periodically sends gratuitous ARP and broadcast hello packets

**Answer: B**

Explanation:

The question asks which function is executed on both VSX members (CX 8325 switches) during normal operation in a VSX cluster.

\* Analysis of Options:

\* Option A:Correct. Both VSX switches reply to ARP requests with the cluster's virtual MAC (vMAC) for SVIs configured with active-gateway, ensuring consistent Layer 3 forwarding.

\* Option B:Incorrect. PIM (Protocol Independent Multicast) and PIM-DR roles are typically handled by one switch, not both, in a VSX cluster.

\* Option C:Incorrect. DHCP relay or server functions are not necessarily performed by both switches simultaneously.

\* Option D:Incorrect. Gratuitous ARP and broadcast hello packets are typically sent by the primary switch or specific protocols, not both VSX members for all cases.

\* Why Option A is Correct:In a VSX cluster, the active-gateway feature allows both switches to respond to ARP requests for Switched Virtual Interfaces (SVIs) using a shared virtual MAC address (vMAC). This ensures seamless Layer 3 forwarding and high availability, as clients receive consistent ARP replies regardless of which VSX switch processes the request. The vsx-sync feature ensures the vMAC is synchronized, enabling both switches to perform this function during normal operation, as per HPE Aruba Networking's VSX architecture.

\* Relevance to Certification Objectives:

\* Network Resiliency and Virtualization (8%):Designing and troubleshooting VSX for redundancy and active-active forwarding.

\* Switching (19%):Implementing Layer 2/3 technologies, including ARP handling in VSX.

\* Routing (16%):Ensuring consistent Layer 3 operations in VSX environments.

References:

HPE Aruba Networking AOS-CX Configuration Guide: VSX Configuration, detailing active-gateway and vMAC usage.

HPE7-A06Study Guide: Covers VSX Layer 3 functions and ARP handling.

#### NEW QUESTION # 43

An OSPF router has learned a path to an external network by both an E1 and E2 advertisement, both routes having the same path cost.

Which path will the router prefer?

- A. The router will prefer the E2 path.
- B. The router will prefer the E1 path.
- C. The router will use both paths equally by means of ECMP.
- D. Both routes will be suppressed until the path conflict has been resolved.

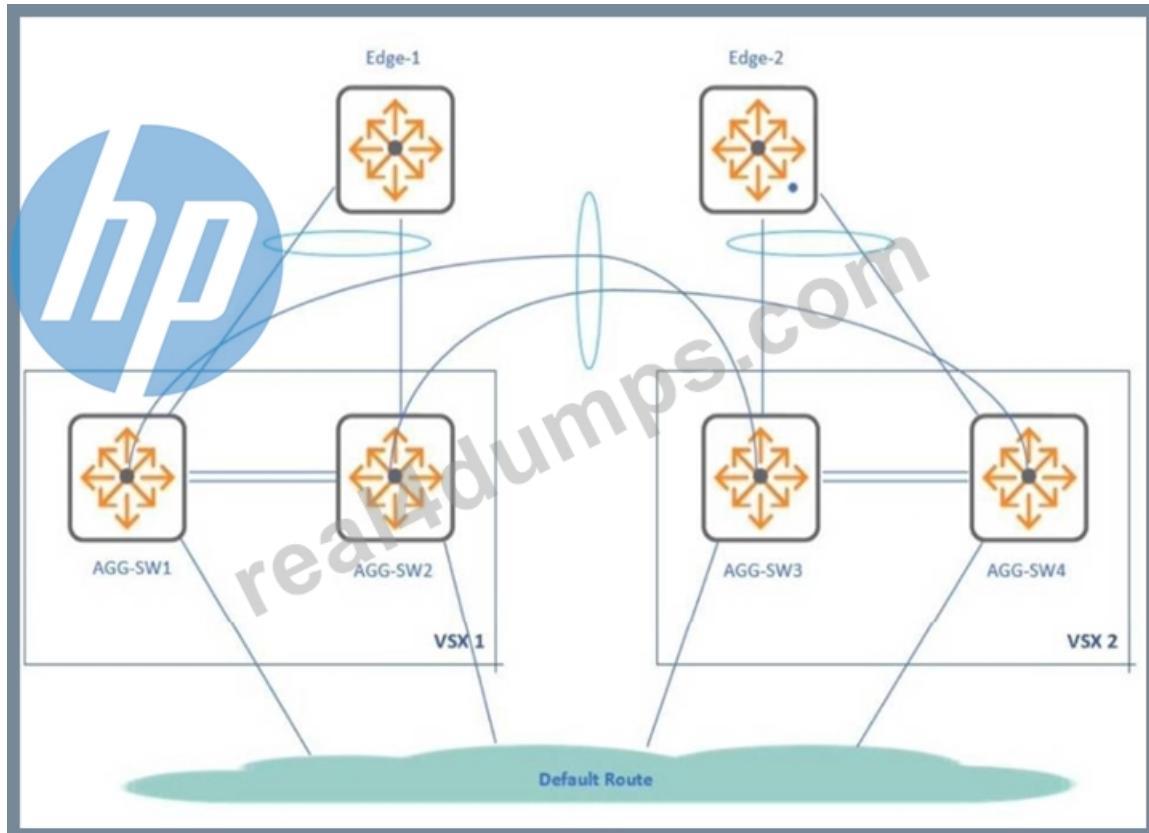

**Answer: B**

Explanation:

When both OSPF E1 (External Type 1) and E2 (External Type 2) routes exist to the same destination with equal cost, the router always prefers the E1 path. This is because E1 routes include both the external cost and the internal OSPF cost to reach the ASBR, making them more accurate for path selection.

#### NEW QUESTION # 44

Refer to the exhibit.

The customer has VSX clusters in two locations interconnected over an MC-LAG interface.

If active-gateway configuration uses the same virtual IP address and vMAC on each of the VSX nodes, what must you take into consideration?

- A. The configuration would end up in an async setup.
- B. Outbound traffic will be load-balanced over all VSX members for each session.
- C. Transit traffic will increase over the VSX interconnected MC-LAG.
- D. Each ARP request will result in four responses.

## Answer: D

Explanation:

With the same anycast gateway (virtual IP and vMAC) configured on both VSX clusters across the L2 MC-LAG interconnect, an ARP request for the gateway is seen by all four VSX nodes.

Since each node is configured to respond with the same vMAC, the client will receive multiple (four) ARP replies.

## NEW QUESTION # 45

.....

Do not worry because HP HPE7-A06 exams are here to provide you with the exceptional HP HPE7-A06 Dumps exams. HP HPE7-A06 dumps Questions will help you secure the HP HPE7-A06 certificate on the first go. As stated above, HPE Campus Access Switching Expert Written Exam resolve the issue the aspirants encounter of finding reliable and original certification Exam Questions.
