CyberArk Defender - PAM Sample Questions (Q136-Q141):

NEW QUESTION # 136

You have been asked to turn off the time access restrictions for a safe. Where is this setting found?

- A. Vault
- B. RestAPI
- C. PrivateArk
- D. Password Vault Web Access (PVWA)

Answer: C

NEW QUESTION # 137

What is the purpose of the HeadStartInterval setting in a platform?

- A. It instructs the AIM Provider to 'skip the cache' during the defined time period
- **B. It instructs the CPM to initiate the password change process X number of days before expiration.**
- C. It alerts users of upcoming password changes x number of days before expiration.
- D. It determines how far in advance audit data is collected for reports

Answer: B

Explanation:

Explanation

The number of days before the password expires (according to the ExpirationPeriod parameter) that the CPM will initiate a password change process. This parameter is not relevant if the policy will be applied to a member of an account group.

NEW QUESTION # 138

Which one of the following reports is NOT generated by using the PVWA?

- **A. Sales List**
- B. Accounts Inventory
- C. Application Inventory
- D. Convince Status

Answer: A

Explanation:

Explanation

The PVWA can generate various reports on the privileged accounts and applications in the system, based on different filters and criteria. However, the Sales List report is not one of them. The Sales List report is generated by using the PrivateArk Client, and it provides a list of Safes and their properties according to location.
