

# 2026 NCP-CI-Azure: Nutanix Certified Professional - Cloud Integration - Azure (NCP-CI-Azure v6.7) Latest Preparation

BTW, DOWNLOAD part of It-Tests NCP-CI-Azure dumps from Cloud Storage: <https://drive.google.com/open?id=15vxs4LKFdRbyrQsxegKVtS5pH4WIsOQM>

With the rapid development of society, people pay more and more attention to knowledge and skills. So every year a large number of people take NCP-CI-Azure tests to prove their abilities. But even the best people fail sometimes. In addition to the lack of effort, may also not make the right choice. A good choice can make one work twice the result with half the effort, and our NCP-CI-Azure Study Materials will be your right choice.

## Nutanix NCP-CI-Azure Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Configuring an NC2 on Azure Environment: This section evaluates the skills of IT Administrators and emphasizes modifying cloud networking security to protect resources. Candidates will configure Nutanix networking settings and troubleshoot connectivity issues to ensure seamless communication within the cloud environment.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Planning an NC2 on Azure Deployment: This section of the exam measures the skills of IT Administrators and covers the preparation of the Azure cloud environment, including determining the appropriate Azure account and node types. It also involves subscribing to the NC2 service, which requires knowledge of authentication methods and organization naming conventions. Additionally, candidates must determine implementation requirements by evaluating deployment use cases and redundancy needs. Identifying networking requirements is crucial, focusing on connectivity options like VPN and CIDR ranges.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Managing an NC2 on Azure Environment: This section relates to skills in identifying management tasks for nodes and clusters. Candidates will monitor cluster health and cloud resource performance, ensuring that all components function efficiently. Understanding these management tasks is vital for maintaining operational integrity in a hybrid cloud environment.</li></ul>

Topic 4	<ul style="list-style-type: none"> <li>• <b>Deploying an NC2 on Azure Environment:</b> This section assesses the skills of Nutanix Cloud Operators and focuses on deploying the cloud cluster within the Azure environment. Candidates will learn to configure cloud provider networking effectively, ensuring that all necessary resources are correctly set up for deployment.</li> </ul>

## Pass Guaranteed Quiz Useful NCP-CI-Azure - Nutanix Certified Professional - Cloud Integration - Azure (NCP-CI-Azure v6.7) Preparation

In this era, everything is on the rise. Do not you want to break you own? Double your salary, which is not impossible. Through the Nutanix NCP-CI-Azure Exam, you will get what you want. It-Tests will provide you with the best training materials, and make you pass the exam and get the certification. It's a marvel that the pass rate can achieve 100%. This is indeed true, no doubt, do not consider, act now.

### Nutanix Certified Professional - Cloud Integration - Azure (NCP-CI-Azure v6.7) Sample Questions (Q45-Q50):

#### NEW QUESTION # 45

Which entity should be contacted for cloud hardware support (EC2 instances, VPC, etc) related to NC2?

- A. Partner
- B. Nutanix
- **C. Public Cloud Vendor**
- D. Internal IT Operations team

**Answer: C**

Explanation:

\* **Cloud Hardware Support:** For issues related to cloud hardware, such as EC2 instances or VPC configurations, the responsible entity is typically the public cloud vendor.

\* **Nutanix Responsibility:** Nutanix manages the software layer and integration aspects of the NC2 service, but the underlying hardware support is managed by the cloud provider (e.g., AWS, Azure).

\* **Support Process:**

\* **Public Cloud Vendor:** Contact the public cloud vendor for issues directly related to the hardware, as they own and manage the physical infrastructure.

\* **Nutanix:** For software and configuration issues specific to the NC2 service, contact Nutanix support.

\* **Conclusion:** For cloud hardware-related support, the appropriate contact is the public cloud vendor.

#### NEW QUESTION # 46

The cluster has the following configuration:

A Transit VPC exists as Default, but is additionally configured with a overlay-external-subnet-nonat overlay subnet The ERP for the Transit VPC is 10.1.1.0/25 A User VPC exists named User\_VPC\_Prod The ERP for the User VPC is 10.1.1.0/24 Outbound and inbound routes have been configured A User VM NO-NAT subnet has been configured in the User VPC The administrator has successfully created a VM and added the NIC associated with the NO-NAT subnet, but is not able to communication with other resources.

Which option will resolve this issue?

- **A. The ERP in the User VPC must be from a different CIDR range than the ERP in the transit VPC.**
- B. Ensure that the security groups associated with the VM allow traffic to and from the desired resources.
- C. Check that the network ACLs for the NO-NAT subnet are not blocking the necessary traffic.
- D. Verify that the route table associated with the User VPC has appropriate routes to the Transit VPC.

**Answer: A**

**Explanation:**

In this scenario, the issue arises from overlapping IP address ranges between the Transit VPC and the User VPC. Here's a detailed breakdown:

Understanding ERPs (Elastic Routing Prefixes):

The ERP for the Transit VPC is 10.1.1.0/25, which covers IP addresses from 10.1.1.0 to 10.1.1.127.

The ERP for the User VPC is 10.1.1.0/24, which covers IP addresses from 10.1.1.0 to 10.1.1.255.

IP Address Overlap:

Since 10.1.1.0/25 is a subset of 10.1.1.0/24, there is a significant overlap in the IP address ranges of these two ERPs.

This overlap can cause routing issues because the same IP address range is being used in both VPCs, leading to ambiguity in routing and communication.

Communication Issue:

When a VM in the User VPC tries to communicate with other resources, the network cannot accurately determine the correct route due to the overlapping IP address ranges.

This overlap prevents proper routing and results in the VM being unable to communicate with other resources as intended.

Resolution:

To resolve this issue, the ERPs must be in different CIDR ranges. This means the IP address ranges for the Transit VPC and the User VPC should not overlap.

For example, if the Transit VPC uses 10.1.1.0/25, the User VPC could use a different range such as 10.1.2.0/24 or any other range that does not overlap with 10.1.1.0/25.

By ensuring that the ERPs are in different CIDR ranges, the network can properly route traffic between the VPCs without any conflicts or ambiguities, thereby enabling the VM in the User VPC to communicate with other resources effectively.

**NEW QUESTION # 47**

What will be observed in the NC2 cluster when terminating a node from the Azure portal?

- **A. NC2 will mark the node as degraded.**
- B. NC2 will continue re-provisioning the node.
- C. NC2 will shutdown the node.
- D. NC2 will terminate the node from the cluster.

**Answer: A**

**Explanation:**

\* Node Termination Observation: When a node is terminated from the Azure portal, the NC2 cluster will detect that the node is no longer operational.

\* Marking as Degraded: NC2 will mark the node as degraded, indicating that the node is not functioning as expected. This status allows administrators to take necessary actions to resolve the issue, such as provisioning a new node or addressing the degradation cause.

**NEW QUESTION # 48**

An administrator must ensure that certain NC2 VMs can access Azure resources. The NC2 VM traffic must not traverse the internet.

How would the administrator achieve this?

- **A. By creating an Azure Private Endpoint for VMs in a Delegated Subnet**
- B. By creating an Azure Private Endpoint for VMs in a No-NAT network via vWAN.
- C. By creating an Azure Private Endpoint for VMs in the host-mgmt subnet.
- D. By creating an Azure Private Endpoint for VMs in a NAT network via vWAN.

**Answer: A**

**Explanation:**

Azure Private Endpoint: A Private Endpoint provides secure connectivity to Azure resources by enabling private access through the Azure backbone network. This ensures that the traffic does not traverse the internet, providing enhanced security and performance.

Delegated Subnet: By creating an Azure Private Endpoint for VMs in a delegated subnet, the administrator ensures that the VMs can access Azure resources directly and securely without using the public internet.

### NEW QUESTION # 49

An NC2 on Azure environment requires that outside networks are allowed to be routed to a Nutanix User VPC from outside the cluster when using a No-Nat path.

Which configuration will satisfy this requirement?

- A. Externally routable IP address which shares the same address space of the Native Azure Subnet
- B. Internally routable network address which shares the same address space of the Native Azure Subnet
- C. Externally routable IP address which shares the same address space of the Nutanix User VPC
- D. Internally routable network address which shares the same address space of the Nutanix setVPC

**Answer: C**

Explanation:

\* No-NAT Path Requirement: For a No-NAT path to function, the external networks must be able to route traffic directly to the Nutanix User VPC without translation.

\* Externally Routable IP Address: The externally routable IP address ensures that traffic from outside networks can reach the Nutanix User VPC.

\* Address Space Compatibility: Sharing the same address space as the Nutanix User VPC allows for seamless integration and communication between the external network and the User VPC.

### NEW QUESTION # 50

.....

As the quick development of the world economy and intense competition in the international, the world labor market presents many new trends: company's demand for the excellent people is growing. As is known to us, the NCP-CI-Azure certification is one mainly mark of the excellent. If you want to improve your correct rates of exam, we believe the best method is inscribed according to the fault namely this in appearing weak sports, specific aim ground consolidates knowledge is nodded. Our NCP-CI-Azure Guide Torrent will help you establish the error sets. We believe that it must be very useful for you to take your exam, and it is necessary for you to use our NCP-CI-Azure test questions.
