Free PDF Quiz Oracle - 1Z0-1067-25 - High-quality Question Oracle Cloud Infrastructure 2025 Cloud Ops Professional Explanations

Our Oracle Exam Questions greatly help Oracle Cloud Infrastructure 2025 Cloud Ops Professional (1Z0-1067-25) exam candidates in their preparation. Our Oracle Cloud Infrastructure 2025 Cloud Ops Professional (1Z0-1067-25) practice questions are designed and verified by prominent and qualified Oracle Cloud Infrastructure 2025 Cloud Ops Professional (1Z0-1067-25) exam dumps preparation experts. The qualified Oracle Cloud Infrastructure 2025 Cloud Ops Professional (1Z0-1067-25) exam questions preparation experts strive hard and put all their expertise to ensure the top standard and relevancy of 1Z0-1067-25 exam dumps topics.

Oracle 1Z0-1067-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Implementing Reliability and Business Continuity: This section of the exam focuses on ensuring system reliability and continuity. It covers implementing scalability and elasticity for handling workload demands, automating failover mechanisms for high availability, and applying data retention strategies for long-term storage and recovery.
Topic 2	<ul style="list-style-type: none"> Deploying and Managing Resources: This section of the exam covers the deployment and management of core OCI services. It focuses on manual provisioning, using the OCI Command Line Interface (CLI) for managing resources, and utilizing infrastructure as code to create consistent and repeatable deployments.
Topic 3	<ul style="list-style-type: none"> Optimizing Cost and Performance: This section of the exam covers strategies for optimizing cost and performance in OCI. It includes implementing cost-saving measures, improving resource efficiency, and setting budgets and compartment quotas to manage cloud expenditures effectively.
Topic 4	<ul style="list-style-type: none"> Managing Identity and Security: This section of the exam focuses on securing cloud environments. It includes implementing security best practices for tenancy, managing encryption keys and secrets, and enforcing least-privilege access control policies to protect sensitive resources.

Oracle Cloud Infrastructure 2025 Cloud Ops Professional Sample Questions (Q25-Q30):

NEW QUESTION # 25

You have been contracted by a local e-commerce company to assist with enhancing their online shopping application. The application is currently deployed in a single Oracle Cloud Infrastructure (OCI) region. The application utilizes a public load balancer, application servers in a private subnet, and a database in a separate, private subnet. The company would like to deploy another set of similar infrastructure in a different OCI region that will act as standby site. In the event of a failure at the primary site, all customers should be routed to the failover site automatically. After deploying the additional infrastructure within the second region, how should you configure automated failover requirements? (Choose the best answer.)

- A. Deploy a new load balancer in the primary region. Create one backend set for the primary application servers and a second backend set for the standby application servers. Create a listener for the primary backend set with a timeout of 3 minutes. Create a listener for the secondary backend set with a timeout of 10 minutes.
- **B. Create a failover policy in the Traffic Management service. Set the IP address of the public load balancer for the primary site in answer pool 1. Set the IP address of the public load balancer for the secondary site in answer pool 2. Define a health check to monitor both sites.**
- C. Create a load balancer policy in the Traffic Management service. Configure one answer for each site. Set the answer for the primary site with a weight of 10 and the answer for the secondary site with a weight of 100.
- D. Create a new A record in DNS that points to the public load balancer at the secondary site. Create a CNAME for the sub-domain failover that will resolve to the new A rec-ord. Inform customers to prepend the website URL with failover if the primary site is unavailable.

Answer: B

NEW QUESTION # 26

You run a large global application with 90% of customers based in the US and Canada. You want to be able to test a new feature and allow a small percentage of users to access the new version of your application. What Oracle Cloud Infrastructure Traffic Management steering policy should you utilize? (Choose the best answer.)

- A. Geolocation steering
- **B. Load Balancer**
- C. ASN steering
- D. IP Prefix steering

Answer: B

NEW QUESTION # 27

You are working as a Cloud Operations Administrator for your company. They have different Oracle Cloud Infrastructure (OCI) tenancies for development and production work-loads. Each tenancy has resources in two regions uk-london-1 and eu-frankfurt-1. You are asked to manage all resources and to automate all the tasks using OCI Command Line Inter-face (CLI). Which is the most efficient method to manage multiple environments using OCI CLI? (Choose the best answer.)

- A. Create environment variables for the sets of credentials that align to each combination of tenancy, region, and environment.
- B. Run oci setup config to create new credentials for each environment every time you want to access the environment.
- C. Use different bash terminals for each environment.
- D. Use OCI CLI profiles to create multiple sets of credentials in your config file, and refer-ence the appropriate profile at runtime.

Answer: D

NEW QUESTION # 28

Which option contains the essential components of the Oracle Cloud Infrastructure Notifications service? (Choose the best answer.)

- A. An ALARM with a name unique across the tenancy, a SUBSCRIPTION, and a MET-RIC with the measurement of interest.
- B. A TOPIC with a name unique across the compartment, a SUBSCRIPTION, and a MESSAGE where content is published.
- C. An ALARM with a name unique across the compartment, a SUBSCRIPTION, and a METRIC with the measurement of interest.
- D. A TOPIC with a name unique across the tenancy, a SUBSCRIPTION, and a MES-SAGE where content is published.

Answer: D

NEW QUESTION # 29

You are asked to implement the disaster recovery (DR) and business continuity requirements for Oracle Cloud Infrastructure (OCI) Block Volumes. Two OCI regions being used: a primary/source region and a DR/destination region. The requirements are: There should be a copy of data in the destination region to use if a region-wide disaster occurs in the source region * Minimize costs Which design will help you meet these requirements? (Choose the best answer.)

- A. Back up block volumes. Use Object Storage lifecycle management to automatically move backup objects to Archive Storage. Copy Archive Storage buckets from source region to destination at regular intervals.
- B. Clone block volumes. Copy block volume clones from source region to destination region at regular intervals.
- C. Back up block volumes. Copy block volume backups from source region to destination region at regular intervals.
- D. Clone block volumes. Use Object Storage lifecycle management to automatically move clone objects to Archive Storage. Copy Archive Storage buckets from source region to destination at regular intervals.

Answer: A

NEW QUESTION # 30

.....

First and foremost, the pass rate on our 1Z0-1067-25 exam dumps among our customers has reached as high as 98% to 100%, which marks the highest pass rate in the field, we are waiting for you to be the next beneficiary. Second, you can get our 1Z0-1067-25 practice dumps only in 5 to 10 minutes after payment, which enables you to devote yourself to study as soon as possible.
