## EMEA-Advanced-Support Test Cram - Latest EMEA-Advanced-Support Test Practice

We stress the primacy of customers' interests, and make all the preoccupation based on your needs. We assume all the responsibilities our practice materials may bring. They are a bunch of courteous staff waiting for offering help 24/7. You can definitely contact them when getting any questions related with our EMEA-Advanced-Support practice materials. If you haplessly

fail the exam, we treat it as our blame then give back full refund and get other version of practice material for free.

## Fortinet EMEA Advanced Support Exam Sample Questions (Q42-Q47):

### NEW QUESTION # 42

Which statement is true about IPsec VPNs and SSL VPNs?

- **A. All of the above**
- B. Both SSL VPNs and IPsec VPNs are standard protocols
- C. Either a SSL VPN or an IPsec VPN can be established between an end-user workstation and a FortiGate device
- D. SSL VPN creates a HTTPS connection. IPsec does not

**Answer: A**

Explanation:

Both SSL VPN and IPsec VPN are standard protocols supported by FortiGate devices for secure remote access. SSL VPN typically uses HTTPS (TCP port 443) for encrypted communication, while IPsec uses protocols like IKE and ESP. Both can be configured between an end-user workstation (e.g., via FortiClient) and a FortiGate device, supporting various authentication methods. All options are correct, making D the correct answer. Exact extract: "SSL VPN technology uses the standard SSL/TLS protocol to provide a secure connection to the FortiGate unit. The FortiGate SSL VPN can be configured to use HTTPS..." and "IPsec VPNs use standardized protocols like IKE and ESP to create secure tunnels... FortiClient supports both IPsec and SSL VPN connections to FortiGate devices for remote access."

### NEW QUESTION # 43

What are source and destination MAC addresses of an ARP request?

- A. The source MAC is that of the sending device and the destination is a multicast address
- B. The source MAC is that of the sending device and the destination of the targeted device
- C. The source MAC is that of the forwarding switch and destination of the targeted device
- **D. The source MAC is that of the sending device and the destination MAC is a broadcast address**

**Answer: D**

Explanation:

An ARP (Address Resolution Protocol) request is broadcast to resolve an IP address to a MAC address. The source MAC is the sender's MAC address, and the destination MAC is the broadcast address (FF:FF:FF:FF:FF:FF) to reach all devices on the local network. Fortinet devices handle ARP for Layer 2 communication. Options B, C, and D are incorrect as switches don't originate ARP requests, the target's MAC is unknown, and ARP uses broadcast, not multicast. Exact extract: "In an ARP request, the source MAC address is that of the sending device, and the destination MAC address is the broadcast address (FF:FF:FF:FF:FF:FF), sent to all devices in the local network segment."

### NEW QUESTION # 44

In Active FTP who sends the PORT command?

- A. There is no PORT command in Active FTP
- B. Both
- **C. The FTP Client**
- D. The FTP Server

**Answer: C**

Explanation:

In Active FTP, the client sends the PORT command to the server, specifying an ephemeral port for the server to initiate the data connection back to the client. This distinguishes Active FTP from Passive FTP, where the server provides the port. The server does not send PORT, and the command is a key part of Active FTP. Exact extract: "In Active FTP, the client sends a PORT command to the server, specifying the IP address and port number for the data connection... The server then initiates the data connection to the client's specified port."

### NEW QUESTION # 45

Which of the following protocols operates at Layer 4

- A. ARP
- B. BGP
- **C. IPSEC**
- D. OSPF

**Answer: C**

Explanation:

IPsec operates at Layer 4 (Transport Layer) in the OSI model, providing secure communication via protocols like ESP and AH, which work with TCP or UDP. BGP and OSPF are Layer 3 (Network Layer) routing protocols, and ARP operates at Layer 2 (Data Link Layer). Fortinet's FortiGate uses IPsec for VPNs at Layer

4. Exact extract: "IPsec operates at the Transport Layer (Layer 4) to secure communications, encapsulating TCP or UDP packets... BGP and OSPF function at the Network Layer, while ARP resolves IP to MAC addresses at the Data Link Layer."

### NEW QUESTION # 46

Hybrid cloud means that

- A. One customer uses VMs with multiple different operating systems in the same cloud account
- B. Cloud provider provides both 32-bit and 64-bit virtual machines
- C. The cloud provider uses AMD, Intel and possibly also other CPU vendors
- **D. Some of the customer's systems are virtualized in the public cloud and some are in the local datacenter**

**Answer: D**

Explanation:

A hybrid cloud combines on-premises infrastructure (local datacenter) with public cloud resources, allowing workloads to operate across both environments for flexibility and scalability. Fortinet solutions like FortiGate- VM support hybrid cloud deployments. Option A refers to hardware diversity, C to OS variety, and D to architecture types, none of which define hybrid cloud. Exact extract: "Hybrid cloud is the combination of public cloud services with an on-premises private cloud or datacenter... This allows customers to run some systems in the public cloud and others in their local datacenter, managed seamlessly."

### NEW QUESTION # 47

.....

Companies can decide whether candidates are Fortinet qualified, or in other words, candidates' educational background and relating EMEA-Advanced-Support professional skills. Knowledge about a person and is indispensable in recruitment. That is to say, for those who are without good educational background, only by paying efforts to get an acknowledged EMEA-Advanced-Support Certification, can they become popular employees. So for you, the EMEA-Advanced-Support latest braindumps compiled by our company can offer you the best help.

**EMEA-Advanced-Support Test Cram:** <https://www.validtorrent.com/EMEA-Advanced-Support-valid-exam-torrent.html>

We offer updated and actual Fortinet EMEA-Advanced-Support Dumps questions that will be enough to get ready for the Fortinet EMEA-Advanced-Support test, Take it easy, Fortunately, I found ValidTorrent's Fortinet EMEA-Advanced-Support exam training materials on the Internet, Students can also get decent jobs after getting necessary certification in EMEA-Advanced-Support Test Cram, Our company has employed a lot of leading experts in the field to compile the EMEA-Advanced-Support exam question.

It shows how to configure alerts and metrics, If more points EMEA-Advanced-Support become a goal instead of a measure, human nature will kick in and the purpose of the measurements will be lost.

We offer updated and actual Fortinet EMEA-Advanced-Support Dumps Questions that will be enough to get ready for the Fortinet EMEA-Advanced-Support test, Take it easy, Fortunately, I found ValidTorrent's Fortinet EMEA-Advanced-Support exam training materials on the Internet.

**Fantastic Latest EMEA-Advanced-Support Exam Camp Help You to Get Acquainted with Real EMEA-Advanced-Support Exam Simulation**

Students can also get decent jobs after getting necessary certification in Fortinet NSE, Our company has employed a lot of leading experts in the field to compile the EMEA-Advanced-Support exam question.
