## C\_BCBAI\_2502 Trainingsmaterialien: SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite & C\_BCBAI\_2502 Lernmittel & SAP C\_BCBAI\_2502 Quiz

Sie können im Internet teilweise die Fragenkatalogen zur SAP C\_BCBAI\_2502 Zertifizierungsprüfung von Zertpruefung kostenlos herunterladen. Dann werden Sie mehr Vertrauen in unsere Produkte haben. Sie können sich dann gut auf Ihre SAP C\_BCBAI\_2502 Zertifizierungsprüfung vorbereiten. Schicken bitte schnell die Produkte von Zertpruefung in den Warenkorb.

## SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite C\_BCBAI\_2502 Prüfungsfragen mit Lösungen (Q38-Q43):

### 38. Frage

Which component of SAP AI is responsible for automating routine business tasks? Please choose the correct answer.

- A. SAP Intelligent RPA
- B. SAP Conversational AI
- C. SAP S/4HANA Cloud
- D. SAP AI Core

**Antwort: A**

Begründung:

SAP Intelligent RPA is the primary component of SAP AI responsible for automating routine business tasks, combining robotic process automation with AI capabilities. The correct answer is SAP Intelligent RPA, as it is explicitly designed for this purpose. SAP documentation states: "SAP Intelligent RPA automates repetitive business tasks such as data entry, document processing, and workflow execution by combining robotic process automation with AI capabilities." This solution enables organizations to "streamline routine tasks like invoice processing, order management, and data validation," reducing manual effort and improving efficiency. For example, SAP Intelligent RPA can "extract data from invoices and update financial systems automatically," as seen in SAP S/4HANA integrations.

The incorrect options are not focused on routine task automation. SAP Conversational AI handles natural language interactions, such as chatbots, not routine tasks. SAP AI Core is an infrastructure platform for AI model development, not task automation. SAP S/4HANA Cloud is a broad ERP system, not a specific automation component. SAP Intelligent RPA's role in automation, as evidenced by its use in SAP Business Technology Platform, confirms its suitability.

### 39. Frage

Which SAP AI-powered tool helps automate invoice processing and financial reconciliation?

Please choose the correct answer.

Response:

- A. SAP BusinessObjects Financial Consolidation
- B. SAP AI Business Services
- C. SAP Digital Assistant
- D. SAP Conversational AI

**Antwort: B**

### 40. Frage

A logistics company is looking to reduce delivery delays and improve inventory management. Which SAP AI-powered solutions should they implement? Note: There are 3 correct answers to this question.

- A. SAP AI Business Services
- B. SAP Predictive Analytics
- C. SAP BusinessObjects Planning
- D. SAP Digital Manufacturing Cloud
- E. SAP Cloud ERP

**Antwort: A,B,D**

Begründung:

For a logistics company aiming to reduce delivery delays and optimize inventory management, SAP offers AI-powered solutions that enhance supply chain efficiency and forecasting. The correct answers are SAP AI Business Services, SAP Predictive Analytics, and SAP Digital Manufacturing Cloud, as these solutions directly address logistics challenges with AI-driven capabilities.

SAP documentation highlights: "Create a risk-resilient and sustainable supply chain with built-in AI that is connected and contextualized. Enabling you to predict customer demand and adjust to change." SAP AI Business Services provide reusable AI capabilities, such as machine learning for demand forecasting and anomaly detection, which help "optimize supply chain operations by analyzing real-time data and market trends." SAP Predictive Analytics, embedded in solutions like SAP S/4HANA, supports "predicting customer demand and adjusting inventory levels" to minimize delays and overstocking. SAP Digital Manufacturing Cloud leverages AI to "optimize production scheduling and inventory management," ensuring efficient logistics operations by integrating real-time data from manufacturing and supply chain processes.

The incorrect options—SAP BusinessObjects Planning and SAP Cloud ERP—are not primarily AI-driven for logistics. SAP BusinessObjects Planning focuses on financial planning and analytics, not logistics-specific AI applications. SAP Cloud ERP, while encompassing AI capabilities, is too broad and not specifically tailored to logistics compared to the selected solutions. SAP's case study on Henkel illustrates how AI in SAP Business Technology Platform enhances supply chain resilience, supporting the relevance

of the chosen solutions.

#### 41. Frage

(How is extension building simplified in SAP S/4HANA? Note: There are 2 correct answers to this question.)

- A. By using a guided wizard
- B. By explaining legacy code
- C. By using Joule
- D. By using business context

**Antwort: A,D**

Begründung:

Comprehensive and Detailed Explanation From Exact Extract: Extension building in SAP S/4HANA is simplified by using a guided wizard in tools like SAP Build Code for step-by-step development, and by leveraging business context to ground extensions in relevant data and processes, ensuring clean core principles and seamless integration.

Exact extracts supporting this:

Guided wizard: "SAP Build has been designed as the optimal way to extend SAP S/4HANA Cloud... with guided processes."news.sap.com "Creating an SAP S/4HANA extension app in 60 minutes with guided wizards."community.sap.com

Business context: "Extend SAP S/4HANA in the cloud and on premise with ABAP-based extensions using business context."community.sap.com "This guide provides a simplified introduction to extending SAP's Enterprise Resource Planning (ERP) offerings using business context."help.sap.com Other options are incorrect because:

Option A: Joule assists in code generation and explanation but is not the primary method for simplifying extension building; wizards and context are emphasized.

Option D: Explaining legacy code is a Joule feature but applies more to migration than direct extension simplification in S/4HANA. Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: Based on SAP Community blog "SAP S/4HANA Extensibility - Simplified Guide for Beginners" and SAP Help Portal "Getting Started with Extensibility." These position guided wizards and business context as key simplifiers for extensions in S/4HANA, aligned with C\_BCBAI\_2502 certification.

#### 42. Frage

Which SAP solution helps businesses calculate and report the carbon footprint of their products?

Please choose the correct answer.

Response:

- A. SAP Sales and Distribution
- B. SAP BusinessObjects Financial Consolidation
- C. SAP Product Footprint Management
- D. SAP Cloud Platform Integration

**Antwort: C**

#### 43. Frage
