- C. Convert any articles containing HTML into plain text before importing because HTML is NOT supported to any article field types.
- D. Verify that each article type has field level security on all fields set to read only prior to import, in order to prevent any loss of data.

Answer: A

Explanation:

Explanation

Ensuring that each existing article type has a corresponding knowledge article type that matches its structure and content is a factor that a consultant should consider as part of the migration strategy for Knowledge articles. An article type is a template that defines the layout, fields, and data categories for an article. An article type can be customized to suit different types of content or audiences. When migrating articles from an external database to Salesforce Knowledge, it is important to ensure that there is a matching article type for each existing article type in Salesforce Knowledge, so that the articles can be imported without losing any information or formatting.
