The user can scout for answer and scout for score based on the answer templates we provide, so the universal template can save a lot of precious time for the user to study and pass the AP-219 Exam.

Salesforce Order Management Administrator Accredited Professional Sample Questions (Q58-Q63):

NEW QUESTION # 58

Which set of conditions is required for an Order Summary object to be created?

- A. An Order is created, its status is set to Draft, Create OrderSummaryFlow is installed and Create OrderSummary Flow is activated.
- **B. An Order is created, the Create Order Summary Process is installed and the Create Order Summary Process is active**
- C. An Order is created, its status is set to Activated. Create OrderSummary Flow is installed and Create OrderSummary Flow is activated.
- D. An Order is created, its status is set to Activated. Create OrderSummary Flow is installed and the Create OrderSummary Process is installed.

Answer: B

Explanation:

The Order Summary object is a custom object that stores information about an order, such as the total amount, the number of items, and the fulfillment status. The Order Summary object is created by a process called Create Order Summary Process, which runs

whenever an order is created or updated. The process calls a flow called Create OrderSummary Flow, which calculates the order summary fields and creates or updates the order summary record. The process and the flow are part of the Order Management package and must be installed and activated for the order summary object to be created. Reference: Order Management Lifecycle, Order Management Objects, Configure Order Management Flows

NEW QUESTION # 59

A customer orders 10 products. The products must be shipped to three different locations. Two of the orders are fulfilled at the same location. How many Fulfillment Orders would be created for this order?

- A. One Fulfillment Order per Fulfillment Location, totaling 2
- B. One Fulfillment Order per item in the order, totaling 10
- C. One Fulfillment Order per destination, totaling 3
- D. One Fulfillment Order

Answer: C

Explanation:

The number of Fulfillment Orders that would be created for this order is one per destination, totaling 3. A Fulfillment Order is a record that represents a group of products in an order that are fulfilled together from the same location. A Fulfillment Order has a lookup relationship to the Order Summary object, and it contains information such as the fulfillment location, delivery method, status, etc. The number of Fulfillment Orders created depends on three factors: Fulfillment Location, Delivery Method and Recipient Address. These factors determine how the Order Items are grouped and allocated to Fulfillment Orders based on routing rules and inventory availability. In this case, since the products must be shipped to three different locations, three Fulfillment Orders are created for each destination. NEW QUESTION # 60

Which three objects are likely to get created in Order Management as an order progresses through its lifecycle?

- A. rmaorder
- B. Replacement Order
- C. Fulfillment Order
- D. Return Order
- E. Change Order

Answer: C,D,E

Explanation:

Three objects that are likely to get created in Order Management as an order progresses through its lifecycle are:

Fulfillment Order. A Fulfillment Order is a record that represents a group of products in an order that are fulfilled together from the same location. A Fulfillment Order has a lookup relationship to the Order Summary object, and it contains information such as the fulfillment location, delivery method, status, etc.

Return Order. A Return Order is a record that represents a return request for an order or part of an order. A Return Order has a lookup relationship to both Order Summary and Change Order objects, and it contains information such as the return reason, status, date, etc.

Change Order. A Change Order is a record that represents a change request for an order or part of an order. A Change Order has a lookup relationship to the Order Summary object, and it contains information such as the change type, status, date, etc.

NEW QUESTION # 61

How can an administrator add visibility rules for the buttons in the Highlights Panel on the Order Summary record page?

- A. Navigate to the Order Summary object in Setup and modify the Highlights Panel visibility rules
- B. Modify the visibility rules of the Highlights Panel Actions in the page layout
- C. Create a custom Highlights Panel component

- **D. Modify the Lightning Record Page Highlights Panel using Dynamic Actions**

Answer: D

Explanation:

Dynamic Actions allow an administrator to add visibility rules for the buttons in the Highlights Panel on the Lightning Record Page. Dynamic Actions let you configure when and where actions appear on a record page based on criteria such as record field values, user permissions, or device type.

NEW QUESTION # 62

Users are reporting slow load times for Lightning Record Pages. How can an administrator analyze the performance?

- **A. Use the Analyze function in the Lightning Record Page editor**
- B. Run a performance analysis using the Developer Console
- C. Use Chrome DevTools
- D. Use the Page Layout Analysis tool in Setup

Answer: A

Explanation:

The Analyze function in the Lightning Record Page editor helps an administrator analyze the performance of a Lightning Record Page. It provides recommendations on how to improve the page load time, such as removing unused components, reducing the number of fields, or using conditional visibility rules.

NEW QUESTION # 63

.....
