The software is designed for use on a Windows computer. This software helps hopefuls improve their performance on subsequent attempts by recording and analyzing Designing Cisco Enterprise Wireless Networks (300-425) exam results. Like the actual Cisco 300-425 certification exam, Designing Cisco Enterprise Wireless Networks (300-425) practice exam software has a certain number of questions and allocated time to answer. Any questions or concerns can be directed to the PassTorrent support team, who are available 24/7. However, the Designing Cisco Enterprise Wireless Networks (300-425) exam questions software product license must be validated before use.

The Cisco 300-425 certification exam offers a great opportunity for Cisco professionals to demonstrate their expertise and knowledge level. In return, they can become competitive and updated with the latest technologies and trends. To do this they just need to enroll in Designing Cisco Enterprise Wireless Networks (300-425) certification exam and have to put all efforts and resources to pass this challenging 300-425 exam. You should also keep in mind that to get success in the Cisco 300-425 exam is not an easy task.

300-425 Prep Torrent - 300-425 Latest Questions & 300-425 Vce Guide

For the office worker, they are both busy in the job or their family; for the students, they possibly have to learn or do other things. But if they use our 300-425 test prep, they won't need so much time to prepare the exam and master exam content in a short time. What they need to do is just to spare 1-2 hours to learn and practice every day and then pass the exam with 300-425 Test Prep easily. It costs them little time and energy.

Cisco Designing Cisco Enterprise Wireless Networks Sample Questions (Q60-Q65):

NEW QUESTION # 60

An engineer is designing a network deployment for a technology company. The company has four buildings with access points that must provide seamless wireless coverage and client roaming. The customer data center must have two WLCs and the core switches for the network. Which type of wireless architecture must be used?

- A. cloud
- B. autonomous
- C. centralized
- D. distributed

Answer: C

NEW QUESTION # 61

An engineer designed a new wireless network for an enterprise customer. The customer is concerned that some wireless features may not be available because the bill of materials has only Base and no WPlus licenses for the Cisco WLC version 8. What is the reason for the engineer to take this approach regarding the licenses?

- A. ForceExtend AP needs a WPlus license.
- B. To have all the features, plus licenses must be installed on the WLC.
- C. CAPWAP Data Encryption licenses are required for this feature.
- D. All WLC features are available because WPLUS license is now included in the Base license.

Answer: D

NEW QUESTION # 62

An engineer is performing a predictive wireless design for a medical treatment environment, which requires data and voice services. What is the minimum requirement for the design?

- A. continuous -72 dBm coverage from one access point
- B. overlapping -72 dBm coverage from two access points
- C. overlapping -67 dBm coverage from two access points
- D. continuous -67 dBm coverage from one access point

Answer: D

Explanation:

So -67dBm covers both Data & Voice with a single AP

NEW QUESTION # 63

A wireless engineer must optimize RF performance for multiple buildings with multiple types of construction and user density. Which two actions must be taken? (Choose two.)

- A. Enable DTPC on the network.
- B. Configure Flexconnect groups for each building.
- C. Configure AP groups for each area type.
- D. Configure WMM profiles for each building.
- E. Configure RF profiles for each area type.

Answer: C,E

Explanation:

To optimize RF performance across different buildings and user densities: C. Configure AP groups for each area type - This allows for customized settings for APs serving different areas. D. Configure RF profiles for each area type - RF profiles enable the customization of RF parameters to suit the specific needs of each building or area type.

The official Cisco ENWLSD 300-425 certification guide will provide more information on RF optimization strategies.

NEW QUESTION # 64

A customer asks an engineer to explain the concept of mobility domains and mobility groups. Which statement does the engineer respond with?

- A. If WLCs are in the same mobility domain, they communicate with each other. Mobility groups constrain the distribution of security context of a client and also constrain AP fail-over between controllers.
- B. A mobility group does not constrain the distribution of security context of a client and also does not constrain AP fail-over between controllers when the WLC are in the same mobility domain.
- C. If WLCs are in the same mobility domain, they communicate with each other but, if an anchor WLC is present it must be in the same mobility domain for communication to be possible.
- D. WLCs do not need to be in the same mobility domain to communicate with each other. Mobility groups constrain the distribution of security context of a client and also constrain AP fail-over between controllers.

Answer: A
