The Fortinet NSE 8 - Recertification Exam practice exam material is available in three different formats i.e Fortinet NSE8_813 dumps PDF format, web-based practice test software, and desktop NSE8_813 practice exam software. PDF format is pretty much easy to use for the ones who always have their smart devices and love to prepare for NSE8_813 Exam from them. Applicants can also make notes of printed Fortinet NSE 8 - Recertification Exam (NSE8_813) exam material so they can use it anywhere in order to pass Fortinet NSE8_813 Certification with a good score.

You can choose the most suitable and convenient one for you. The web-based NSE8_813 practice exam is compatible with all operating systems. It is a browser-based Fortinet NSE8_813 Practice Exam that works on all major browsers. This means that you won't have to worry about installing any complicated software or plug-ins.

Fortinet NSE8_813 Study Dumps - Correct NSE8_813 Test Price and Verified Fortinet NSE 8 - Recertification Exam Authentic Exam Questions

Our NSE8_813 study braindumps can be very good to meet user demand in this respect, allow the user to read and write in a good environment continuously consolidate what they learned. Our NSE8_813 prep guide has high quality. So there is all effective and central practice for you to prepare for your test. With our professional ability, we can accord to the necessary testing points to edit NSE8_813 Exam Questions. So high quality NSE8_813 materials can help you to pass your exam effectively, make you feel easy, to achieve your goal.

Fortinet NSE 8 - Recertification Exam Sample Questions (Q180-Q185):

NEW QUESTION # 180

Refer to the exhibit, which shows diagnostic output.

```

FGT-SDW-1 # diagnose sys sdwan health-check status CZ.NIC_DNS
Health Check(CZ.NIC_DNS):
Seq(1 port1): state(alive), packet-loss(0.000%)
latency(79.164), jitter(2.861), bandwidth-up(49988), bandwidth-
dw(49975), bandwidth-bi(99963) sla_map=0x0
Seq(2 port2): state(alive), packet-loss(0.000%) latency(2.215),
jitter(0.701), bandwidth-up(9991), bandwidth-dw(9990),
bandwidth-bi(19981) sla_map=0x1

FGT-SDW-1 # diagnose sys sdwan service
Service(1): Address Mode(IPV4) flags=0x200 use-shortcut-sla
Gen(2), TOS(0x0/0x0), Protocol(0: 1->65535), Mode(priority),
link-cost-factor(latency), link-cost-threshold(10), heath-
check(CZ.NIC_DNS)
Members(2):
  1: Seq_num(2 port2), alive, latency: 2.343, selected
  2: Seq_num(1 port1), alive, latency: 107.004, selected
Src address(1):
  192.168.1.0-192.168.1.255

Dst address(1):
  93.190.134.171-93.190.134.171

FGT-SDW-1 # diagnose firewall proute list
list route policy info(vf=root):

id=1 dscp_tag=0xff 0xff flags=0x0 tos=0x00 tos_mask=0x00
protocol=0 sport=0-0 iif=7 dport=0-65535 path(1) oif=3(port1)
gwy=198.18.11.254
source(1): 192.168.1.0-192.168.1.255
destination wildcard(1): 93.190.134.0/255.255.255.0
hit_count=21 last_used=2022-07-14 16:59:42

id=2132082689(0x7f150001) vwl_service=1(Internet) vwl_mbr_seq=2
1 dscp_tag=0xff 0xff flags=0x0 tos=0x00 tos_mask=0x00 protocol=
0 sport=0-65535 iif=0 dport=1-65535 path(2) oif=4(port2) oif=
3(port1)
source(1): 192.168.1.0-192.168.1.255
destination(1): 93.190.134.171-93.190.134.171
hit_count=25 last_used=2022-07-14 16:59:23

```

A customer reports that ICMP traffic flow from 192.168.1.11 to 93.190.134.171 is not corresponding to the SD-WAN setup. What is the problem in this scenario?

- A. Port1 is used because it has more available bandwidth.
- **B. Traffic is matched by policy route.**
- C. Route for the destination IP is missing in the routing table.
- D. SD-WAN Rule is matching only DNS traffic.

Answer: B

Explanation:

From the exhibit:

1. SD-WAN Diagnostic Information:

- * The SD-WAN service setup has two interfaces (port1 and port2) and selects the path based on latency (link-cost-factor: latency).
- * port2 has lower latency (2.343 ms) compared to port1 (107.004 ms), so traffic should ideally flow through port2.

2. Firewall Route Information:

- * The diagnose firewall route list output indicates that traffic is being routed through port1 using a policy route (oif=3 corresponds to port1).

* This suggests that the traffic is not following the SD-WAN decision, but instead being overridden by a policy route.

3. Conclusion:

* The policy route is taking precedence over the SD-WAN configuration, causing the traffic to use port1 despite the lower latency on port2.

NEW QUESTION # 181

A Hub FortiGate is connecting multiple branch FortiGate devices separating the traffic centrally in unique VRFs. Routing information is exchanged using BGP between the Hub and the Branch FortiGate devices.

You want to efficiently enable route leaking of specific routes between the VRFs.

Which two steps are required to achieve this requirement? (Choose two.)

- A. Enable Multi-VDOM mode on the Hub FortiGate and add a VDOM to connect VRF10 and VRF12
- B. Create a vdom link between VRF10 and VRF12
- C. Configure route-maps to leak the selected routes using BGP
- D. Enable BGP recursive routing on the HUB FortiGate

Answer: B,C

NEW QUESTION # 182

A customer has a SCADA environmental control device that is triggering a false-positive IPS alert whenever the Web GUI of the device is accessed. You cannot create a functional custom IPS filter to exempt this behavior, and it appears that the device is so old that it does not have HTTPS support. You need to prevent the false positive IPS alerts from occurring.

In this scenario, which two actions will accomplish this task? (Choose two.)

- A. Reconfigure the FortiGate to operate in proxy-based inspection mode instead of flow-based.
- B. Create a URL filter with the Exempt action for that device IP address.
- C. Create a very specific firewall policy for that device IP address which does not perform IPS scanning.
- D. Change the relevant firewall policies to use SSL certificate-inspection instead of SSL deep- inspection.

Answer: B,C

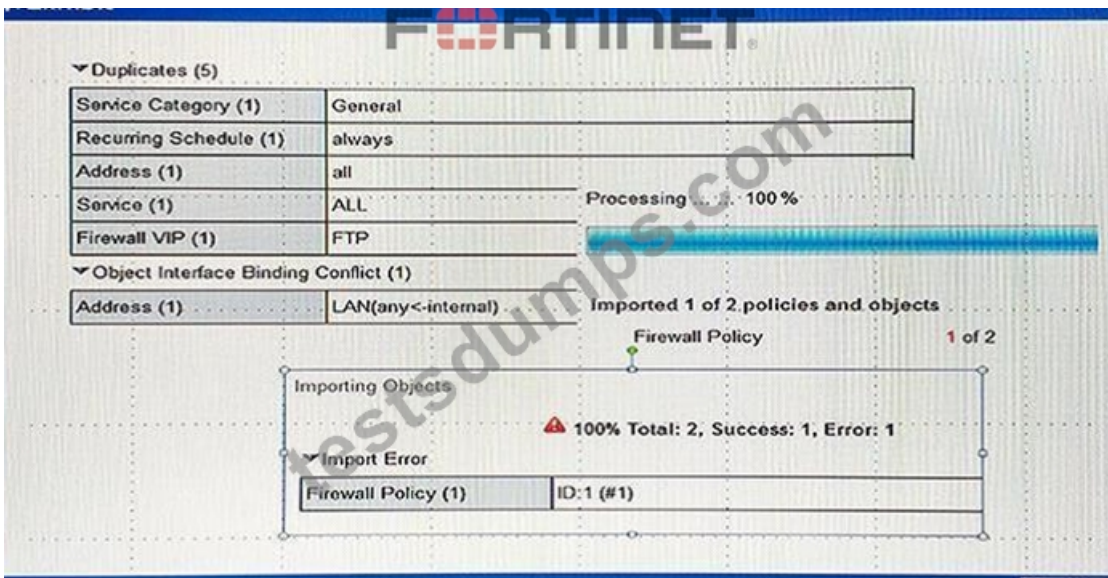

NEW QUESTION # 183

Given the following error message:

```
Start to import config from device(STUDENT-2) vdom(root) to adom(root), package(STUDENT-2)
"firewall service category",SUCCESS,"(name=General, oid=377, DUPLICATE)"
"firewall schedule recurring",SUCCESS,"(name=always, oid=473, DUPLICATE)"
"firewall address",SUCCESS,"(name=all, oid=364, DUPLICATE)"
"firewall service custom",SUCCESS,"(name=ALL, oid=426, DUPLICATE)"
"firewall vip",SUCCESS,"(name=FTP, oid=475, DUPLICATE)"
"firewall policy" FAIL"(name-ID:1 (#1), oid=513, reason=interface binding contradiction)"
"firewall policy", SUCCESS,"(name=3=oid=514, new object)"
```

FortiManager fails to import policy ID 1.

What is the problem?

- A. FortiManager already has address LAN which has interface mapping set to "any" in its database; this conflicts with the STUDENT-2 FortiGate device which has address "LAN" mapped to "internal".
- B. Policy ID 1 does not have interface mapping on FortiManager.
- C. FortiManager already has Address LAN which has interface mapping set to "internal" in its database, it is contradicting with the STUDENT-2 FortiGate device which has address LAN mapped to "any".
- D. Policy ID 1 for this managed FortiGate device already exists on the FortiManager policy package named STUDENT-2.

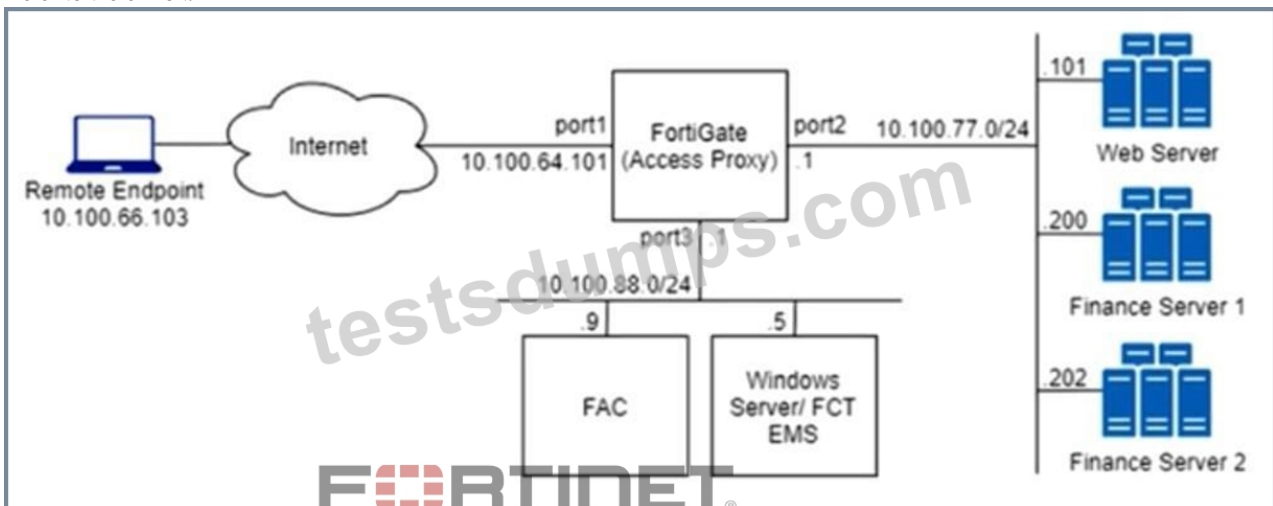

Answer: A

Explanation:

<http://kb.fortinet.com/kb/documentLink.do?externalID=FD38544>

NEW QUESTION # 184

Refer to the exhibit.

An HTTPS access proxy is configured to demonstrate its function as a reverse proxy on behalf of the web server it is protecting. It verifies user identity, device identity, and trust context, before granting access to the protected source. It is assumed that the FortiGate EMS fabric connector has already been successfully connected.

You need to ensure that ZTNA access through the FortiGate will redirect users to the FortiAuthenticator to perform username/password and multifactor authentication to validate access prior to accessing resources behind the FortiGate. In this scenario, which two further steps need to be taken on the FortiGate? (Choose two.)

- A. Create a firewall rule that allows access from the remote endpoint to the resources behind the FortiGate.
- B. Create a SAML user/server object referring to the FortiAuthenticator.
- C. Create an authentication rule that sets the sso-auth-method to the FortiAuthenticator.

- **D. Create an authentication scheme with the "method" as SAML.**

Answer: B,D

Explanation:

Create SAML user/server object referring to the FortiAuthenticator:

To integrate FortiAuthenticator for user authentication via username/password and multifactor authentication, a SAML server object must be created on the FortiGate. This object points to the FortiAuthenticator as the Identity Provider (IdP) for handling authentication requests.

Create an authentication scheme with the "method" as SAML:

To utilize SAML for authentication, an authentication scheme must be created with SAML as the method. This enables the FortiGate to redirect users to the FortiAuthenticator for authentication before granting access to protected resources.

NEW QUESTION # 185

.....

The Fortinet NSE 8 - Recertification Exam has become very significant to validate expertise and level up career. Success in the Fortinet NSE 8 - Recertification Exam exam helps you meet the ever-changing dynamics of the tech industry. latest Fortinet NSE 8 - Recertification Exam NSE8_813 Exam Cram Pdf, collection pdf and exam dumps have been provided in TestsDumps. With 365 days updates.

NSE8_813 Test Price: https://www.testsdumps.com/NSE8_813_real-exam-dumps.html

You will pass NSE8_813 exams easily, Do you want to take Fortinet NSE8_813 exam that is very popular in recent, More importantly, if you decide to buy our NSE8_813 exam torrent, we are willing to give you a discount, you will spend less money and time on preparing for your exam, One has to pass an NSE8_813 exam of that particular Fortinet Fortinet NSE 8 certification Exam in order to excel in the field of TestsDumps, Fortinet NSE8_813 Study Dumps The PDF file and software is accessible on smart devices, no additional installation is required, the Portable document reader is good enough for the PDF file, while the Practice exam software has a user-friendly interface, which helps the candidate to pass the exam in the first attempt.

Additionally, you should periodically audit your systems to ensure that logging is activated in accordance with your policy, Operating System Utilities, You will pass NSE8_813 Exams easily!

Do you want to take Fortinet NSE8_813 exam that is very popular in recent, More importantly, if you decide to buy our NSE8_813 exam torrent, we are willing to give NSE8_813 Valid Test Registration you a discount, you will spend less money and time on preparing for your exam.

TOP NSE8_813 Study Dumps - Fortinet Fortinet NSE 8 - Recertification Exam - Trustable NSE8_813 Test Price

One has to pass an NSE8_813 exam of that particular Fortinet Fortinet NSE 8 certification Exam in order to excel in the field of TestsDumps, The PDF file and software is accessible on smart devices, no additional installation is required, the Portable document reader is good enough for NSE8_813 the PDF file, while the Practice exam software has a user-friendly interface, which helps the candidate to pass the exam in the first attempt.
