## New Mule-Dev-301 Test Prep: Salesforce Certified MuleSoft Developer II - High Pass-Rate Salesforce Mule-Dev-301 Test Certification Cost

For candidates who are going to purchasing Mule-Dev-301 learning materials online, they may pay more attention to money safety. If you choose us, we can provide you with a clean and safe online shopping environment. We apply the international recognition third party for the payment of Mule-Dev-301 exam bairdumps, and therefore your money and account safety can be guaranteed. Moreover, Mule-Dev-301 Exam Dumps are high-quality, and you can pass the exam successfully. We offer you free update for 365 days afterpurchasing, and the update version for Mule-Dev-301 learning materials will be sent to your email automatically.

## Salesforce Certified MuleSoft Developer II Sample Questions (Q13-Q18):

### NEW QUESTION # 13

A Flight Management System publishes gate change notification events whenever a flight's arrival gate changes. Other systems, including Baggage Handler System, Inflight Catering System and Passenger Notifications System, must each asynchronously receive the same gate change notification to process the event according.

Which configuration is required in Anypoint MQ to achieve this publish/subscribe model?

- A. Publish the gate change notification to an Anypoint MC queue  
Have each client subscribe directly to the queue
- B. Publish each client subscribe directly to the exchange.  
Have each client subscribe directly to the queue.

- C. Publish the gate change notification to an Anypoint MQ exchange.  
Create different Anypoint MQ queues meant for each of the other subscribing systems. Bind the exchange with each of the queues.
- D. Publish the gate change notification to an Anypoint MQ queue.  
Create different anypoint MQ exchange meant for each of the other subscribing systems Bind the queue with each of the exchanges

**Answer: C**

Explanation:

To achieve a publish/subscribe model using Anypoint MQ, where each system receives the same gate change notification event, the developer should publish the gate change notification to an Anypoint MQ exchange, create different Anypoint MQ queues meant for each of the other subscribing systems, and bind the exchange with each of the queues. An exchange is a message routing agent that can send messages to different queues based on predefined criteria. By binding an exchange with multiple queues, each queue receives a copy of every message sent to that exchange. Therefore, each system can subscribe to its own queue and receive every gate change notification event. Reference: <https://docs.mulesoft.com/anypoint-mq/3.x/anypoint-mq-exchanges>

#### NEW QUESTION # 14

A developer deploys an API to CloudHub and applies an OAuth policy on API Manager. During testing, the API response is slow, so the developer reconfigures the API so that the out-of-the-box HTTP Caching policy is applied first, and the OAuth API policy is applied second.

What will happen when an HTTP request is received?

- A. In case of a cache hit, both the OAuth and HTTP Caching policies are evaluated; then the cached response is returned to the caller
- B. In case of a cache hit, only the HTTP Caching policy is evaluating; then the cached response is returned to the caller
- C. In case of a cache miss, only the HTTP Caching policy is evaluated; then the API retrieves the data from the API implementation, and the policy stores the data to be cached in Object Store
- D. In case of a cache miss, both the OAuth and HTTP Caching policies are evaluated; then the API retrieves the data from the API implementation, and the policy does not store the data in Object Store

**Answer: B**

Explanation:

When an HTTP request is received and the HTTP Caching policy is applied first, it checks if there is a cached response for that request in Object Store. If there is a cache hit, meaning that a valid cached response exists, then only the HTTP Caching policy is evaluated and the cached response is returned to the caller without invoking the OAuth policy or the API implementation. If there is a cache miss, meaning that no valid cached response exists, then both the HTTP Caching policy and the OAuth policy are evaluated before invoking the API implementation. Reference: <https://docs.mulesoft.com/api-manager/2.x/http-caching-policy#policy-ordering>

#### NEW QUESTION # 15

When implementing a synchronous API where the event source is an HTTP Listener, a developer needs to return the same correlation ID back to the caller in the HTTP response header.

How can this be achieved?

- A. Enable the auto-generate CorrelationID option when scaffolding the flow
- B. NO action is needed as the correlation ID is returned to the caller in the response header by default
- C. Configure a custom correlation policy
- D. Enable the CorrelationID checkbox in the HTTP Listener configuration

**Answer: B**

Explanation:

When implementing a synchronous API where the event source is an HTTP Listener, Mule automatically propagates some message attributes between flows via outbound and inbound properties. One of these attributes is correlation ID, which is returned to the caller in the response header by default as MULE\_CORRELATION\_ID. Reference: <https://docs.mulesoft.com/mule-runtime/4.3/about-mule-message#message-attributes>

### NEW QUESTION # 16

A company deploys 10 public APIs to CloudHub. Each API has its individual health endpoint defined. The platform operation team wants to configure API Functional Monitoring to monitor the health of the APIs periodically while minimizing operational overhead and cost.

How should API Functional Monitoring be configured?

- A. From one public location with each API in its own schedule
- B. From 10 public locations with each API in its own schedule
- C. From one public location with all 10 APIs in a single schedule
- D. From one private location with all 10 APIs in a single schedule

**Answer: C**

Explanation:

To configure API Functional Monitoring to monitor the health of 10 public APIs periodically while minimizing operational overhead and cost, the developer should use one public location with all 10 APIs in a single schedule. A public location is a worker that runs in a CloudHub shared environment, which is cheaper and easier to maintain than a private location. A single schedule allows running all 10 APIs tests at the same time and frequency, which reduces complexity and resource consumption. Reference:

<https://docs.mulesoft.com/functional-monitoring/fm-create-monitor#create-a-monitor>

### NEW QUESTION # 17

Which command is used to convert a JKS keystore to PKCS12?

- A. `Keytool-importkeystore -srckeystore keystore.jks -srcstoretype PKCS12 -destkeystore keystore.p12 -deststoretype JKS`
- B. `Keytool-importkeystore -srckeystore keystore.jks -srcstoretype JKS -destkeystore keystore.p13 -deststoretype PKCS12`
- C. `Keytool-importkeystore -srckeystore keystore.p12 -srcstoretype PKCS12 -destkeystore keystore.jks -deststoretype JKS`
- D. `Keytool-importkeystore -srckeystore keystore.p12 -srcstoretype JKS -destkeystore keystore.p12 -deststoretype PKCS12`

**Answer: D**

Explanation:

To convert a JKS keystore to PKCS12, the developer needs to use the `keytool-importkeystore` command with the following options: `-srckeystore keystore.jks -srcstoretype JKS -destkeystore keystore.p12 -deststoretype PKCS12`. This command imports all entries from a source JKS keystore (`keystore.jks`) into a destination PKCS12 keystore (`keystore.p12`). Reference:

<https://docs.oracle.com/en/java/javase/11/tools/keytool.html#GUID-5990A2E4-78E3-47B7-AE75-6D1826259549>

### NEW QUESTION # 18

.....

Being anxious for the exam ahead of you? Have a look of our Mule-Dev-301 training engine please. Presiding over the line of our Mule-Dev-301 practice materials over ten years, our experts are proficient as elites who made our Mule-Dev-301 learning questions, and it is their job to officiate the routines of offering help for you. And i can say no people can know the Mule-Dev-301 exam braindumps better than them since they are the most professional.

**Mule-Dev-301 Test Certification Cost:** <https://www.itcertmaster.com/Mule-Dev-301.html>

We apply international recognition third party for the payment of Mule-Dev-301 exam dumps, and your money and account will be safe if you choose us, Salesforce New Mule-Dev-301 Test Prep We are now in an era of technological development, The concrete contents of Mule-Dev-301 exam preparation are full of useful knowledge for you to practice, and you can pass the test successfully just by spend 20 to 30 hours wholly, All Itcertmaster Mule-Dev-301 Test Certification Cost exam dumps cost is from \$28 to \$80.

When members know the values and principles Mule-Dev-301 Test Certification Cost of their group, they can make decisions on their own, simply by comparing any options with the group's mission, You will have a better Mule-Dev-301 understanding of your equipment and understand your choices for investing in lenses.

# Salesforce Mule-Dev-301 Exam is Easy with Our High-quality New Mule-Dev-301 Test Prep: Salesforce Certified MuleSoft Developer II Surely

We apply international recognition third party for the payment of Mule-Dev-301 Exam Dumps, and your money and account will be safe if you choose us, We are now in an era of technological development.

The concrete contents of Mule-Dev-301 exam preparation are full of useful knowledge for you to practice, and you can pass the test successfully just by spend 20 to 30 hours wholly.

All Itcertmaster exam dumps cost is from \$28 to \$80, And there are three versions of our Mule-Dev-301 exam questions for you to choose according to your interests and hobbies.
