We are so popular for that we have a detailed and perfect customer service system. Firstly, only 5 to 10 minutes after the customer's online payment of VMCE_v12 actual exam is successful, you can receive an email from the customer service and immediately start learning. We also have dedicated staff to check and update VMCE_v12 Exam Questions every day, so you can get the latest information of VMCE_v12 exam materials whenever you buy it. Secondly, we provide 24-hour round-the-clock service to customers. We can solve any problems about VMCE_v12 study materials for you whenever and wherever you need it.

Veeam Certified Engineer v12 Sample Questions (Q116-Q121):

NEW QUESTION # 116

What is the primary benefit of configuring replica seeding?

- A. Deduplicated WAN traffic
- B. Compressed WAN traffic
- C. Encrypted WAN traffic
- D. Reduced WAN traffic

Answer: D

Explanation:

The primary benefit of configuring replica seeding in Veeam Backup & Replication is reduced WAN traffic.

Replica seeding allows for the initial replica to be created using a backup copy that is transported to the DR site, which significantly reduces the amount of data that needs to be transferred over the WAN during the initial replication process. References: Veeam Backup & Replication User Guide, Veeam Replica Seeding Guide

NEW QUESTION # 117

Which of the following statements regarding bottleneck statistics is true?

- A. Bottleneck statistics can show the following states: Source/Proxy/Network/Source WAN Accelerator/Target WAN Accelerator/Target/None
- **B. The percentages displayed will always add up to 100% in total.**
- C. The bottleneck statistics are only displayed when you have a problem in your backup infrastructure.
- D. Bottleneck statistics can show the following states: Source/Proxy/Network/Source WAN Accelerator/Target WAN Accelerator/Target

Answer: B

NEW QUESTION # 118

What should be implemented when backing up NAS file shares to ensure there is more than one copy of the data?

- A. Archive repository
- **B. Secondary copy**
- C. Backup repository
- D. Cache repository

Answer: B

Explanation:

When backing up NAS file shares, it's essential to ensure that more than one copy of the data exists to adhere to best practices for data protection, often referred to as the 3-2-1 Rule (3 total copies of your data, 2 of which are local but on different devices, and at least 1 copy offsite). Implementing a secondary copy of the data provides this additional layer of redundancy. In Veeam, this can be achieved by creating backup copy jobs, which ensure that there is a secondary copy of the data, possibly stored in a different location. This is not to be confused with the simple use of backup repositories, which are storage locations for primary backups, or with cache/archive repositories which serve different purposes in the backup process.

NEW QUESTION # 119

A physical Linux file server needs to be migrated to VMware ESXi. The server has several volumes: /dev/sda (60GB), /dev/sdb (1TB) and /dev/sdc (4TB). What is the quickest option to migrate the server?

- A. Export all disks, create an empty VM and attach the disks.
- **B. Perform Instant VM Recovery.**
- C. Perform Instant Disk Recovery for each volume.
- D. Create an empty VM and perform bare metal recovery inside the VM.

Answer: B

Explanation:

Explanation

from https://helpcenter.veeam.com/docs/backup/agents/integration_instant_restore_vsphere.html?ver=120

"Restore to vSphere VM The procedure of Instant Recovery for a Veeam Agent computer practically does not differ from the same procedure for a VM. The main difference from Instant Recovery is that you do not need to select the recovery mode, because Veeam Agent computers are always restored to a new location."

NEW QUESTION # 120

A Veeam administrator wants to diagnose known issues in the configuration and performance of backup infrastructure without involving Veeam Technical Support. What feature of Veeam One should the administrator use?

- A. Business View
- **B. Intelligent Diagnostics**
- C. Best Practices Analyzer
- D. Log Shipping Servers

Answer: B

Explanation:

For diagnosing known issues in the configuration and performance of the backup infrastructure without the direct involvement of

Veeam Technical Support, the administrator should utilize A:

Intelligent Diagnostics in Veeam One. Intelligent Diagnostics is a feature designed to proactively detect known issues within the Veeam backup infrastructure by analyzing the system's event logs, performance data, and configurations. It uses predefined patterns and rules derived from common issues identified by Veeam Support to provide early warnings and suggest corrective actions. This self-service approach enables administrators to address potential problems before they impact operations, enhancing the reliability and efficiency of the backup infrastructure.

NEW QUESTION # 121

.....

There are a lot of leading experts and professors in different field in our company. As a result, they have gained an in-depth understanding of the fundamental elements that combine to produce world class VMCE_v12 practice materials for all customers. So we can promise that our VMCE_v12 study materials will be the best study materials in the world. Our VMCE_v12 Exam Questions have a high quality.
