SAP C_WME_2506 시험요강:

주제	소개
주제 1	Advancing your Skills in Building WalkMe Solutions: This section of the exam tests the advanced competencies of functional and business analysts in designing more complex and customized WalkMe solutions within SAP platforms. It requires a deeper understanding of user segmentation, advanced rules and triggers, performance optimization, and the use of analytics to refine user experiences. Candidates are expected to demonstrate their ability to design scalable and impactful guidance that aligns with SAP business processes and drives user adoption across the enterprise.

주제 2	Getting Started with Building WalkMe Solutions: This section of the exam evaluates the capabilities of WalkMe implementers and focuses on the practical aspects of creating and configuring WalkMe solutions. It includes understanding the WalkMe Editor, planning solution flows, creating Smart Walk-Thrus, Launchers, and ShoutOuts, and managing end-user guidance effectively. Candidates should be comfortable building initial WalkMe experiences that improve SAP usability and provide contextual help for users navigating SAP applications.
주제 3	Starting your Digital Adoption Journey: WalkMe Fundamentals: This section of the exam measures the skills of SAP project managers and covers the foundational concepts of digital adoption within SAP environments using WalkMe. Candidates are expected to understand the value of digital adoption platforms, the basic components of WalkMe, and how these tools align with business goals. The section emphasizes knowledge of the user experience within SAP and the ability to identify opportunities for improving digital workflows through in-app guidance and automation.

C_WME_2506덤프문제은행 덤프는 SAP Certified Associate - WalkMe Digital Adoption Consultant 시험패스의 최고의 공부자료

DumpTOP의 SAP인증 C_WME_2506시험덤프는 고객님의 IT자격증을 취득하는 꿈을 실현시켜 드리는 시험패스의 지름길입니다. SAP인증 C_WME_2506덤프에는 실제시험문제의 거의 모든 문제를 적중하고 습니다. DumpTOP의 SAP인증 C_WME_2506덤프가 있으면 시험패스가 한결 간편해집니다.

최신 SAP Certified Associate C_WME_2506 무료샘플문제 (Q22-Q27):

질문 # 22

Which of the following is a capability of WalkMe's Smart Walk-Thrus?

- A. Blocking users from making changes to the software
- B. Removing unused applications from the tech stack
- C. Preventing users from interacting with pop-ups
- D. Providing step-by-step on-screen guidance in real time

정답: D

질문 # 23

You're getting ready to plan your next build.

What data/section in Insights can you use to help you determine which content your end users may need you to build next?

- A. Text and Multilanguage
- B. What Users Are Searching For
- C. Total Menu Opens
- D. Activity Log

정답: B

질문 # 24

Which of the options below is a use case for when to use jQuery?

Note: There are 3 correct answers to this question.

- A. If the WalkMe element selector algorithm is not consistently identifying your element.
- B. To grab a dynamic value from an on screen element and incorporate it into a ShoutOut for a personalized experience.
- C. To close the WalkMe menu and start an Onboarding task.
- D. To target a very specific element on your website.

- E. To redesign the entire layout of the WalkMe balloons.

정답: A,B,D

질문 # 25

Which is the syntax that you type into the developer console to check your jQuery selectors using WalkMe?

- A. `wnjQuery("InsertSelectorHere")`
- B. `WMjQuery InsertSelectorHere`
- C. `jQuery("InsertSelectorHere")`
- D. `walkmejQuery("InsertSelectorHere")`

정답: A

설명:

WalkMe provides a custom jQuery wrapper, `wnjQuery`, to test and validate jQuery selectors within the WalkMe environment. This wrapper ensures that selectors are evaluated in the context of WalkMe's framework, accounting for its specific DOM interactions and configurations. To check a jQuery selector, Builders type `wnjQuery("InsertSelectorHere")` into the browser's developer console, replacing `InsertSelectorHere` with the desired selector (e.g., `wnjQuery("#myButton")`). This returns the matched elements, confirming the selector's accuracy.

The other options are incorrect:

- * `WMjQuery InsertSelectorHere(A)` is not a valid syntax and lacks proper formatting.
- * `walkmejQuery("InsertSelectorHere")(B)` uses incorrect capitalization and naming.
- * `jQuery("InsertSelectorHere")(C)` uses standard jQuery, which may not account for WalkMe's specific environment.

Extract from Official WalkMe Documentation:

Per the WalkMe Editor User Guide (SAP WalkMe Digital Adoption Consultant Study Guide, Section 2.7:

jQuery Selectors):

"To test jQuery selectors in the WalkMe environment, use the `wnjQuery` function in the browser's developer console. Syntax: `wnjQuery("selector")`. This ensures compatibility with WalkMe's framework and accurate element targeting." The course *Advancing Your Skills in Building WalkMe Solutions* explains:

"When troubleshooting or validating jQuery selectors, always use `wnjQuery("selector")` in the developer console to ensure the selector works within WalkMe's context, as standard jQuery may produce inconsistent results." Option D, `wnjQuery("InsertSelectorHere")`, is the correct syntax.

References:

SAP WalkMe Digital Adoption Consultant Study Guide, Section 2.7: jQuery Selectors.

WalkMe Editor User Guide, "Testing jQuery Selectors" Section.

Course: *Advancing Your Skills in Building WalkMe Solutions*, Module 10: Advanced Selector Techniques.

질문 # 26

What does WalkMe's UI Intelligence feature do?

- A. It eliminates the need for data collection
- B. It blocks users from entering incorrect data
- C. It forces users to complete forms without assistance
- D. It analyzes form interactions and provides actionable insights

정답: D

설명:

WalkMe's UI Intelligence feature analyzes form interactions and provides actionable insights by tracking how users engage with forms (e.g., fields skipped, errors made). This data, available in WalkMe Insights, helps organizations identify friction points, optimize form designs, and improve user completion rates, enhancing overall digital adoption.

The other options are incorrect:

- * Forcing form completion(A) is not a WalkMe function; it focuses on guidance.
- * Blocking incorrect data(B) is partially true for Validation SmartTips, but not UI Intelligence's role.
- * Eliminating data collection(D) is false; UI Intelligence relies on data collection.

Extract from Official WalkMe Documentation:

Per the SAP WalkMe Digital Adoption Consultant Study Guide (Section 3.7: UI Intelligence):

"UI Intelligence analyzes user interactions with forms, providing insights into completion rates and errors to optimize form usability

"UI Intelligence delivers actionable insights by tracking form interactions, helping organizations address user challenges and improve process efficiency." Option C accurately describes the UI Intelligence feature.
