

AZ-140 Valid Exam Answers - AZ-140 Exam Syllabus

P.S. Free 2026 Microsoft AZ-140 dumps are available on Google Drive shared by itPass4sure: https://drive.google.com/open?id=1pdNo5sp8MHZXXd7AaHqT4i-1rx_bN6uE

Not every company can make such a promise of "no help, full refund" as our itPass4sure. However, the AZ-140 exam is not easy to pass, but our itPass4sure have confidence with their team. Our itPass4sure's study of AZ-140 exam make our AZ-140 Exam software effectively guaranteed. You can download our free demo first to try out, no matter which stage you are now in your exam review, our products can help you better prepare for AZ-140 exam.

The AZ-140 certification exam is a great way for IT professionals to demonstrate their knowledge and skills in the field of Azure Virtual Desktop. Configuring and Operating Microsoft Azure Virtual Desktop certification is highly valued by employers, as it indicates that the candidate has the skills necessary to configure and operate Azure Virtual Desktop and can help organizations to effectively manage their virtual desktop environments. Additionally, it provides an opportunity for IT professionals to enhance their career prospects by demonstrating their expertise in a highly sought-after area.

Microsoft AZ-140 (Configuring and Operating Microsoft Azure Virtual Desktop) Exam is one of the most sought-after certifications for IT professionals who want to demonstrate their expertise in managing and operating virtual desktops on Microsoft Azure. AZ-140 exam measures an individual's knowledge and skills in configuring and managing the virtual desktop infrastructure, deploying and managing virtual machines, and securing the virtual desktop environment.

AZ-140 Exam Syllabus | Exam AZ-140 Vce Format

As you can see on our website, there are versions of the PDF, Software and APP online. PDF version of our AZ-140 study materials- it is legible to read and remember, and support customers' printing request. Software version of our AZ-140 exam questions-It support simulation test system and times of setup has no restriction. Remember this version support Windows system users only. App online version of AZ-140 Practice Engine -Be suitable to all kinds of equipment or digital devices.

Microsoft Configuring and Operating Microsoft Azure Virtual Desktop Sample Questions (Q201-Q206):

NEW QUESTION # 201

You have a Windows Virtual Desktop host pool that contains two session hosts. The Microsoft Teams client is installed on each session host.

You discover that only the Microsoft Teams chat and collaboration features work. The calling and meeting features are disabled. You need to ensure that users can set the calling and meeting features from within Microsoft Teams.

What should you do?

- A. Configure audio input redirection.
- **B. Install the Remote Desktop WebRTC Redirector Service.**
- C. Install the Teams Meeting add-in for Outlook.
- D. Configure Remote audio mode in the RDP Properties.

Answer: B

Topic 2, Contoso. Ltd

Case study

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the button to return to the question.

Overview

Contoso, Ltd. is a law firm that has a main office in Montreal and branch offices in Paris and Seattle. The Seattle branch office opened recently.

Contoso has an Azure subscription and uses Microsoft 365.

Existing Infrastructure. Active Directory

The network contains an on-premises Active Directory domain named contoso.com and an Azure Active Directory (Azure AD) tenant. One of the domain controllers runs as an Azure virtual machine and connects to a virtual network named VNET1. All internal name resolution is provided by DNS server that run on the domain controllers.

The on-premises Active Directory domain contains the organizational units (OUs) shown in the following table.

Name	Description
MontrealUsers	An OU for all the users in the Montreal office: The OU syncs to Azure AD by using Azure AD Connect.
ParisUsers	An OU for all the users in the Paris office: The OU syncs to Azure AD by using Azure AD Connect.
SeattleUsers	An OU for all the users in the Seattle office: The OU does NOT sync to Azure AD.

The on-premises Active Directory domain contains the users shown in the following table.

Name	Container	Member of
Operator1	Users	Domain Admins
Operator2	MontrealUsers	Users
Operator3	SeattleUsers	Server Operators

The Azure AD tenant contains the cloud-only users shown in the following table.

Name	Role
Admin1	Virtual Machine Contributor
Admin2	Desktop Virtualization Contributor
Admin3	Desktop Virtualization Session Host Operator
Admin4	Desktop Virtualization Host Pool Contributor

Existing Infrastructure. Network Infrastructure

All the Azure virtual networks are peered. The on-premises network connects to the virtual networks.

All servers run Windows Server 2019. All laptops and desktop computers run Windows 10 Enterprise.

Since users often work on confidential documents, all the users use their computer as a client for connecting to Remote Desktop

Services (RDS).

In the West US Azure region, you have the storage accounts shown in the following table.

Name	Account kind	Performance
storage1	StorageV2	Standard
storage2	StorageV2	Premium
storage3	BlobStorage	Standard
storage4	StorageV1	Premium

Existing Infrastructure. Remote Desktop Infrastructure

Contoso has a Remote Desktop infrastructure shown in the following table.

Office	Description
Montreal	A Windows Virtual Desktop deployment that runs Windows 10 Enterprise multi-session hosts. The deployment contains the following: <ul style="list-style-type: none">• A host pool named Pool1• An application group named Group1• A workspace named Workspace1• Virtual machines that have a prefix of Pool1
Seattle	An on-premises virtual machine-based RDS deployment that has personal desktops. The personal desktop virtual machines have a prefix of Pool2.
Paris	An on-premises virtual machine-based RDS deployment that has pooled desktops. The pooled desktop virtual machines have a prefix of Pool3. User profile disks are used to preserve the user state.

Requirements. Planned Changes

Contoso plans to implement the following changes:

- * Implement FSLogix profile containers for the Paris offices.
- * Deploy a Windows Virtual Desktop host pool named Pool4.
- * Migrate the RDS deployment in the Seattle office to Windows Virtual Desktop in the West US Azure region.

Requirements. Pool4 Configuration

Pool4 will have the following settings:

- * Host pool type: Pooled
- * Max session limit: 7
- * Load balancing algorithm: Depth-first
- * Images: Windows 10 Enterprise multi-session
- * Virtual machine size: Standard D2s v3
- * Name prefix: Pool4
- * Number of VMs: 5
- * Virtual network: VNET4

Requirements. Technical Requirements

Contoso identifies the following technical requirements:

- * Before migrating the RDS deployment in the Seattle office, obtain the recommended deployment configuration based on the current RDS utilization.
- * For the Windows Virtual Desktop deployment in the Montreal office, disable audio output in the device redirection settings.
- * For the Windows Virtual Desktop deployment in the Seattle office, store the FSLogix profile containers in Azure Storage.
- * Enable Operator2 to modify the RDP Properties of the Windows Virtual Desktop deployment in the Montreal office.
- * From a server named Server1, convert the user profile clicks to the FSLogix profile containers.
- * Ensure that the Pool1 virtual machines only run during business hours.
- * Use the principle of least privilege.

NEW QUESTION # 202

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Windows Virtual Desktop host pool named Pool1 that is integrated with an Azure Active Directory Domain Services

(Azure AD DS) managed domain.

You need to configure idle session timeout settings for users that connect to the session hosts in Pool1.

Solution: From an Azure AD DS-joined computer, you modify the AADDC Users GPO settings.

Does that meet the goal?

- A. No
- B. Yes

Answer: A

NEW QUESTION # 203

You have a Windows Virtual Desktop deployment.

You need to ensure that all the connections to the managed resources in the host pool require multi-factor authentication (MFA).

Which two settings should you modify in a conditional access policy? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

NEW

Conditional access policy

Control user access based on conditional access policy to bring signals together, to make decisions, and enforce organizational policies. [Learn more](#)

NEW QUESTION # 204

-

You have an Azure Virtual Desktop deployment.

You plan to create the host pools shown in the following table.

Name	Session host requirement
HostPool1	Compute optimized with a high CPU-to-memory ratio
HostPool2	Memory optimized with a high memory-to-CPU ratio
HostPool3	GPU optimized for graphic rendering and video editing

You need to recommend the virtual machine size for each host pool to meet the session host requirements.

Virtual machine size  Answer Area

A-Series	HostPool1:	Virtual machine size
B-Series	HostPool2:	Virtual machine size
E-Series	HostPool3:	Virtual machine size
F-Series		
N-Series		

Answer:

Explanation:

Virtual machine size	Answer Area
A-Series	HostPool1: F-Series machine size
B-Series	HostPool2: E-Series machine size
E-Series	HostPool3: N-Series machine size
F-Series	
N-Series	

NEW QUESTION # 205

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an Azure Virtual Desktop deployment.

You need to ensure that users are signed out automatically when they disconnect from a session.

Solution: From the Local Group Policy Editor, you configure the Session Time Limits settings.

Does this meet the goal?

- A. Yes
- B. No

Answer: A

NEW QUESTION # 206

.....

Life will always face a lot of choices. When we choose to work, we will also be selected by the job in reverse. And today, in an era of fierce competition, how can we occupy a place in a market where talent is saturated? The answer is a certificate. What the certificate main? All kinds of the test Microsoft certification, prove you through all kinds of qualification certificate, it is not hard to find, more and more people are willing to invest time and effort on the AZ-140 Study Materials, because get the test AZ-140
