

Plat-Admn-201최신버전덤프자료 & Plat-Admn-201적 중을높은시험덤프공부

BONUS!!! Pass4Test Plat-Admn-201 시험 문제집 전체 버전을 무료로 다운로드하세요: <https://drive.google.com/open?id=1E0-Kkk0XrIFtFKK3GPNRSycN6O2HA5vO>

IT인증시험덤프자료를 제공해드리는 사이트는 너무나도 많습니다. 그중에서 대부분 분들이Pass4Test제품에 많은 관심과 사랑을 주고 계시는데 그 원인은 무엇일까요?바로Pass4Test에서 제공해드리는 덤프자료 품질이 제일 좋고 업데이트가 제일 빠르고 가격이 제일 저렴하고 구매후 서비스가 제일 훌륭하다는 점에 있습니다. Pass4Test 표 Salesforce인증Plat-Admn-201덤프를 공부하시면 시험보는데 자신감이 생기고 시험불합격에 대한 우려도 줄어들것입니다.

Salesforce Plat-Admn-201 시험요강:

주제	소개
주제 1	Service and Support Applications: This domain covers case management systems, including case assignment, queues, and automation through escalation rules, auto-response rules, and Einstein for Service.
주제 2	Agentforce AI: This domain introduces AI-powered agents in Salesforce, covering use cases, configuration in Agent Builder, security considerations, and troubleshooting agent permissions.
주제 3	Object Manager and Lightning App Builder: This domain focuses on Salesforce data architecture, including object relationships, field customization, page layout management, and understanding the implications of field deletions on dependent features.
주제 4	Sales and Marketing Applications: This domain addresses sales cycle management from leads to opportunities, including productivity features, lead automation, campaign management, forecasting, and Einstein for Sales capabilities.
주제 5	Configuration and Setup: This domain covers foundational administrative tasks including company settings, user interface configuration, user management with licenses and access controls, and implementing security measures through login restrictions and the Salesforce sharing model.

- Productivity and Collaboration: This domain addresses activity management, Chatter collaboration, Salesforce mobile app customization, and AppExchange applications including managed and unmanaged packages.

시험패스 가능한 Plat-Admn-201최신버전 덤프자료 덤프공부

Pass4Test의 도움을 받았다고 하면 우리는 무조건 최선을 다하여 한번에 패스하도록 도와드릴 것입니다. 또한 일년 무료 업뎃서비스를 제공합니다. 중요한 건 덤프가 갱신이 되면 또 갱신버전도 여러분 메일로 보내드립니다. 망설이지 마십시오. 우리를 선택하는 동시에 여러분은 Plat-Admn-201 시험고민을 하시지 않으셔도 됩니다. 빨리 우리덤프를 장바구니에 넣으시죠.

최신 Salesforce Certified Administrator Plat-Admn-201 무료 샘플문제 (Q56-Q61):

질문 # 56

A user is unable to relate a task to the Course custom object. What should a Platform Administrator do to allow tasks to be related to courses?

- A. Select Allow Activities on the Course object in Object Manager.
- B. Update the user's profile to grant them Edit access to the Task object.
- C. Create a sharing rule for the Course object to grant the user Read/Write access.
- D. Add the Open Activities related list to the Course page layout.

정답: A

설명:

For a custom object to support Tasks and Events, the "Allow Activities" setting must be enabled in the object's properties. When a Platform Administrator creates a custom object, this checkbox is often left unchecked by default³⁵. Enabling this feature allows the "Related To" (WhatId) field on a Task or Event to be linked to records of that custom object type³⁶. While adding the related list to the page layout (Option C) is a necessary step for visibility, it will not work if the underlying feature isn't enabled first³⁷. Sharing rules (Option A) and profile permissions (Option D) manage access to existing records but do not control whether the object is technically capable of having activities associated with it.

질문 # 57

A user at Northern Trail Outfitters is having trouble logging in to Salesforce. The user's login history shows that this person has attempted to log in multiple times and has been locked out of the organization. Which two steps should a Platform Administrator take to help the user log in to Salesforce?

- A. Log in as the user to unlock the user and reset the password.
- B. Reset password on the user's record detail page.
- C. Use the unlock button on the user's record detail page.
- D. Reset the password policies to allow the user to login.

정답: B,C

설명:

When a user is locked out of Salesforce due to too many incorrect login attempts, the Platform Administrator must take specific actions on the user's record detail page to restore access. First, the administrator should click the Unlock button¹⁹. This clears the lockout status immediately²⁰. Second, because the user likely forgot their credentials (causing the failed attempts), the administrator should use the Reset Password button²¹. This sends a temporary link to the user's email, allowing them to create a new password and log in successfully. "Logging in as the user" (Option A) is a troubleshooting tool for existing sessions but cannot bypass a lockout or change a password on the user's behalf. Changing "Password Policies" (Option D) would affect the entire organization and is not a valid way to help a single locked-out individual.

질문 # 58

One of the sales managers at Universal Containers will be going on leave for several months. The executives want to make sure the sales manager does not log in to Salesforce while on leave. What should a Platform Administrator do to ensure the user is not able to log in while on leave?

- A. Freeze the user's account.
- B. Restrict Login IP Addresses for the profile.
- C. Reassign the user's license during leave.
- D. Change the Login Hours for the profile.

정답: A

설명:

When a user needs to be temporarily prevented from logging in-but their records, role, and historical data need to remain intact-the best practice is to Freeze the user. Freezing an account stops the user from accessing the system immediately without "Deactivating" them. Deactivation can be problematic if the user is a "running user" for dashboards or is part of active hierarchy logic that might break if the account is disabled. Freezing is a simple "one-click" action on the user record. Reassigning the license (Option A) would require deactivating the user first. Changing login hours (Option B) or IP addresses (Option D) at the profile level would impact all users assigned to that profile, not just the individual manager on leave. Freezing provides a targeted and temporary solution for managing individual user access.

질문 # 59

Cloud Kicks needs to change the owner of a case when it has been open for more than 7 days. What should a Platform Administrator use to complete this requirement? 47

- A. Validation Rules
- B. Escalation Rules
- C. Assignment Rules
- D. Auto Response Rules

정답: B

설명:

Escalation Rules are designed specifically to perform actions when a Case record has remained in a certain state (like "Open") for a specified period. In this scenario, the Platform Administrator would set an escalation rule entry with the age set to 168 hours (7 days). When this time threshold is reached, the rule can automatically reassign the case to a new owner or a management queue⁵¹. Assignment Rules (Option C) are only triggered upon the initial creation of a record or when manually triggered by a user, and they do not have a built-in "timer" capability to fire days later⁵². Auto-Response Rules (Option B) are only for sending automated emails to customers, not for internal ownership changes⁵³. Validation Rules (Option D) are used to prevent data entry errors and cannot change record ownership⁵⁴.

질문 # 60

A Platform Administrator assigned a custom profile based on the Minimum Access named Salesforce profile to a group of new users and assigned them several existing permission sets. However, when the users log in, they do not see the Lightning interface. Which action should the administrator take to give the users access to the Lightning interface?

- A. Add Lightning component to a layout.
- B. Create a page in Lightning App Builder with the org as default.
- C. Assign a permission to enable Lightning Experience User.
- D. Enable the Enhanced Interface for User Access Policies.

정답: C

설명:

The "Minimum Access - Salesforce" profile is a very restrictive standard profile designed to provide no access by default, adhering to the principle of least privilege. One of the specific permissions that is not included in this profile is the Lightning Experience User permission. Without this system permission, users will be defaulted to the Salesforce Classic interface (or potentially blocked from any UI if no other access is granted). To resolve this, the Platform Administrator should either edit the custom profile or, preferably,
