

UiPath UiPath-ABAv1 Fragenkatalog, UiPath-ABAv1 Fragen Und Antworten

2026 Die neuesten ZertSoft UiPath-ABAv1 PDF-Versionen Prüfungsfragen und UiPath-ABAv1 Fragen und Antworten sind kostenlos verfügbar: <https://drive.google.com/open?id=1NFOvICQ-56gZ1xKZVT4FjjSqZ5gjwhxD>

Viele Webseiten bieten UiPath UiPath-ABAv1 Zertifizierungsunterlagen und andere Unterlagen. Aber wir ZertSoft sind die einzige Website, die besten UiPath UiPath-ABAv1 Zertifizierungsunterlagen zu bieten. Mit der Hilfe von ZertSoft können Sie nur einmal UiPath UiPath-ABAv1 Zertifizierungsprüfung zu bestehen. Die UiPath UiPath-ABAv1 Prüfungsfragen und Testantworten von ZertSoft sind von reichen Erfahrungen und Kenntnissen gesammelt. Diese bieten Ihnen eine gute Chance, in IT-Industrie zu entwickeln.

UiPath UiPath-ABAv1 Prüfungsplan:

Thema	Einzelheiten
Thema 1	- UI Automation: UI Automation principles, including modern and classic design experiences, are discussed alongside utilizing modern recorder and input - output activities.
Thema 2	Integration Service: This topic explains Integration Service, use of integration service connectors, triggers, and the Integration Service Connector Builder.
Thema 3	Orchestrator: Understanding Orchestrator entities, tenant entities, provisioning robots, defining roles, and utilizing logging features are covered in this topic.
Thema 4	Logging: This topic addresses interpreting robot execution logs and implementing logging best practices during development for effective debugging and analysis.
Thema 5	Control Flow: Control Flow activities, workflow types, and Flowchart layouts are discussed here, along with the usage of IF, Flow Decision, Switch activities, While, Do While, and For Each.
Thema 6	Workflow Analyzer: This topic covers the use of Workflow Analysis, along with configuring Workflow Analyzer settings.
Thema 7	Object Repository: Creation, publication, and consumption of UI libraries with static and dynamic descriptors are covered in this section.
Thema 8	Data Manipulation: String manipulation, array operations, list initialization, dictionary usage, and DataTable operations are discussed in this topic.
Thema 9	Version Control Integration: It focuses on utilizing Git integration in Studio to add a project, clone a repository is explained, including common Git operations.

Thema 10	Working with Files and Folders: Creating, managing, and iterating through local files and folders are covered here.
Thema 11	Implementation Methodology: Understanding project implementation stages, interpreting PDDs and SDDs, and conducting peer reviews are discussed here.
Thema 12	Business Knowledge: This topic focuses on understanding business process automation (BPA) and its value proposition, as well as exploring key concepts related to business processes.
Thema 13	Email Automation: Handling emails via IMAP, POP3, SMTP, and integrating with Microsoft and Gmail are covered in this section. It also discusses the usage of Microsoft 365 and Gsuite packages.
Thema 14	Exception Handling: This topic covers using Try Catch, Throw, Rethrow, and Retry Scope activities.
Thema 15	Excel Automation: It explains Excel Automation principles and modern Excel integration including reading, writing, and manipulating Excel files. Additionally, the topic focuses on the usage of the Excel Workbook activities.

Wir machen UiPath-ABAv1 leichter zu bestehen!

Die Ausbildungsmaterialien zur UiPath UiPath-ABAv1 Zertifizierungsprüfung aus ZertSoft verfügen über hohe Genauigkeiten und große Reichweite, sie können nicht nur Ihre Kenntnisse, sondern auch Ihre Operationsfähigkeiten verbessern, so dass Sie zu einem Eliten in der IT-Branche werden und eine gut bezahlte Arbeit bekommen können. Bevor Sie unsere Ausbildungsmaterialien zur UiPath UiPath-ABAv1 Zertifizierungsprüfung kaufen, können Sie einige kostenlosen Prüfungsfragen und Antworten als Testversion herunterladen.

UiPath Certified Professional Automation Business Analyst Professional v1.0 UiPath-ABAv1 Prüfungsfragen mit Lösungen (Q105-Q110):

105. Frage

Which of the following statements would define the UAT planning phase in RPA?

- A. It is a phase during which a plan is developed for user acceptance testing of UiPath robots
- B. It is a phase during which UiPath software is tested for performance and reliability
- C. It is a phase during which employees are trained on how to use UiPath software
- D. It is a phase during which UiPath software is installed and configured

Antwort: A

Begründung:

The UAT (User Acceptance Testing) planning phase in RPA defines a crucial stage where a plan is developed for testing UiPath robots by end-users to ensure they meet the business requirements and perform as expected. This phase is essential for validating the functionality and reliability of the automation before it goes live.

Reference: UiPath training materials from the UiPath Academy.

106. Frage

For text assets, is there any character limit for the Global Value Field?

- A. Yes, this field allows for up to 1000000 characters
- B. Yes, this field allows for up to 4000 characters
- C. No, there is no such limit
- D. Yes, this field allows for up to 100000 characters

Antwort: B

Begründung:

For text assets in UiPath, there is a character limit for the Global Value Field, which allows for up to 4000 characters. This limit is important for managing data sizes and ensuring performance and stability within the UiPath Orchestrator environment. 107. Frage

By what step at most should the analysis of input and its future standardization be decided upon?

- A. During talks with the SME and Business Owner
- **B. During process analysis**
- C. During As-Is process documentation
- D. During To-Be process documentation

Antwort: B

Begründung:

The analysis of input and its future standardization should ideally be decided upon during the process analysis phase. This phase involves a detailed review of the current process inputs and outputs, identifying variations, and establishing standardization requirements. During process analysis, a thorough examination of all elements related to the workflow is conducted, which enables the identification of areas where standardization can lead to greater efficiency and consistency. Deciding on standardization at this stage helps ensure that the designed automation will be robust, scalable, and aligned with the organization's goals.

The information is based on the UiPath Automation Business Analyst Learning Plans and the Automation Business Analysis Fundamentals course available on the UiPath Academy, which addresses topics covered in the UiPath Automation Business Analyst (UiABA) certification exam

108. Frage

Which of the following is a relevant process metric during the requirements gathering stage?

- **A. Number of applications used**
- B. Expected increase in transaction volume
- C. Average Handling Time
- D. Process time dependencies

Antwort: A

Begründung:

During the requirements gathering stage, one of the relevant process metrics is the Number of applications used. This metric is important because it provides insight into the complexity of the process and the potential integration points required for automation. Understanding the number of applications involved in a process can help in assessing the scope of the automation project, the variety of interfaces that need to be worked with, and the level of effort required to automate the process¹.

References: The relevance of this metric is supported by UiPath's documentation on process metrics, which emphasizes the importance of identifying the number of applications used during the process discovery phase to ensure a comprehensive understanding of the process landscape¹.

109. Frage

What does a Business Logic Translation Table do?

- A. Capture every action performed by the SME on the application layer
- B. Process activities detailed at key stroke level with respective screen shots captured
- **C. List the business rules and use them as reference in the As-Is process description**
- D. Capture short video recordings

Antwort: C

Begründung:

A Business Logic Translation Table lists the business rules and uses them as a reference in the As-Is process description. This table is essential for translating complex business rules into understandable and actionable items that can be incorporated into the automated process, ensuring that all business requirements are met accurately.
