Users can evaluate our products by downloading free demo templates prior to formal purchase.

Salesforce Certified Data Architect Sample Questions (Q59-Q64):

NEW QUESTION # 59

Universal Container is using Salesforce for Opportunity management and enterprise resource planning (ERP) for order management. Sales reps do not have access to the ERP and have no visibility into order status.

What solution a data architect recommend to give the sales team visibility into order status?

- A. Build real-time integration to pull order line items into Salesforce when viewing orders.
- B. Leverage Canvas to bring the order management UI in to the Salesforce tab.
- C. leverage Salesforce Connect to bring the order line item from the legacy system to Salesforce.
- D. Build batch jobs to push order line items to Salesforce.

Answer: C

NEW QUESTION # 60

Universal Containers (UC) has implemented Sales Cloud and it has been noticed that Sales reps are not entering enough data to run insightful reports and dashboards. UC executives would like to monitor and measure data quality metrics. What solution addresses this requirement?

- A. Use third-party AppExchange tools to monitor and measure data quality.
- B. Generate reports to view the quality of sample data.
- C. Export the data to an enterprise data warehouse and use BI tools for data quality.
- D. Use custom objects and fields to calculate data quality.

Answer: A

Explanation:

Using third-party AppExchange tools to monitor and measure data quality can address the requirement of UC executives by providing features such as data cleansing, deduplication, validation, enrichment, and scoring. These tools can help improve the accuracy, completeness, and consistency of the data entered by sales reps.

NEW QUESTION # 61

A large telecommunication provider that provides internet services to both residence and business has the following attributes:

A customer who purchases its services for their home will be created as an Account in Salesforce.

Individuals within the same house address will be created as Contact in Salesforce.

Businesses are created as Accounts in Salesforce.

Some of the customers have both services at their home and business.

What should a data architect recommend for a single view of these customers without creating multiple customer records?

- A. Customers are created as Person Accounts and related to Business and Residential Accounts using the Account Contact relationship.
- B. Customers are created as Contacts and related to Business and Residential Accounts using the Account Contact Relationships.
- C. Customer are created as individual objects and relate with Accounts for Business and Residence accounts.
- D. Customers are created as Accounts for Residence Account and use Parent Account to relate Business Account.

Answer: B

NEW QUESTION # 62

As part of a phased Salesforce rollout, there will be 3 deployments spread out over the year. The requirements have been carefully

documented. Which two methods should an architect use to trace back configuration changes to the detailed requirements? Choose 2 answers

- A. Use the Force.com IDE to save the metadata files in source control.
- **B. Put the business purpose in the Description of each field.**
- **C. Maintain a data dictionary with the justification for each field.**
- D. Review the setup audit trail for configuration changes.

Answer: B,C

NEW QUESTION # 63

Two million Opportunities need to be loaded in different batches into Salesforce using the Bulk API in parallel mode. What should an Architect consider when loading the Opportunity records?

- A. Use the Name field values to sort batches.
- B. Create indexes on Opportunity object text fields.
- **C. Group batches by the AccountId field.**
- D. Order batches by Auto-number field.

Answer: C

Explanation:

Grouping batches by the AccountId field can improve the performance and avoid locking issues when loading Opportunity records using the Bulk API in parallel mode. This is because the AccountId field is indexed and can be used to distribute the records evenly across batches

NEW QUESTION # 64

.....
