Quiz SAP - High Pass-Rate C_BCBDC_2505 - SAP Certified Associate - SAP Business Data Cloud Exam Syllabus

In recent years, our C_BCBDC_2505 Test Torrent has been well received and have reached 99% pass rate with all our dedication. As a powerful tool for a lot of workers to walk forward a higher self-improvement, our C_BCBDC_2505 certification training continue to pursue our passion for advanced performance and human-centric technology. As a matter of fact, our company takes account of every client's difficulties with fitting solutions. As long as you need help, we will offer instant support to deal with any of your problems about our SAP Certified Associate - SAP Business Data Cloud guide torrent. Any time is available; our responsible staff will be pleased to answer your questions.

SAP Certified Associate - SAP Business Data Cloud Sample Questions (Q61-Q66):

NEW QUESTION # 61

What is the first action Allen (Business Analyst) takes when Natalie (Chief Finance Officer) reaches out to him for insights on working capital?

Please choose the correct answer.

Response:

- A. He develops a custom ML model.
- B. He shares the Data Product with SAP Databricks.
- C. He explores the available Intelligent Application in SAP Business Data Cloud Catalog.
- D. He reviews the details and installs the Intelligent Application.

Answer: C

NEW QUESTION # 62

Which of the following activities does SAP Business Data Cloud cockpit support? Note: There are 2 correct answers to this question.

- A. Discover and activate data products
- B. Debug authorization issues
- C. Enhance Analytic Models
- D. Configure SAP Business Data Cloud

Answer: A,D

Explanation:

The SAP Business Data Cloud (BDC) Cockpit serves as the central administrative and operational interface for managing the BDC environment. Among its core functionalities, it directly supports the ability to configure SAP Business Data Cloud. This includes setting up connections, managing spaces, configuring system parameters, and generally overseeing the platform's infrastructure. It provides administrators with the necessary tools to tailor the BDC environment to specific organizational needs. Additionally, the cockpit is instrumental in allowing users to discover and activate data products. Data products are pre-built, semantically rich data

assets that encapsulate business logic and data from various sources, offered within the BDC ecosystem. The cockpit acts as a marketplace or catalog where users can find relevant data products, understand their content, and activate them for use in their analytics and applications. While "Enhance Analytic Models" is done in tools like SAP Datasphere's Data Builder and debugging authorization issues might involve various tools, direct configuration and data product management are key features of the BDC Cockpit.

NEW QUESTION # 63

You want to combine external data with internal data via product ID. Although the data may be inconsistent, such as the external data contains the letter "O" where the internal data contains the digit 0, you still want to combine them. Which artifact should you use for matching?

- A. Graphical View
- **B. Intelligent Lookup**
- C. Analytic Model
- D. Entity Relationship Model

Answer: B

Explanation:

When faced with the challenge of combining data from different sources where the matching keys (like "Product ID") are inconsistent or contain variations (e.g., "O" vs. "0"), the recommended artifact in SAP Datasphere for such fuzzy or approximate matching scenarios is an Intelligent Lookup. An Intelligent Lookup (D) leverages machine learning capabilities to identify and map records that are semantically similar but not exact matches. Unlike standard joins in graphical views or SQL views which require precise key matches, Intelligent Lookups can handle data quality issues, typos, and variations, allowing you to successfully link disparate records that would otherwise be missed. This is particularly valuable when integrating data from external systems or legacy sources where perfect data standardization is not feasible, ensuring a more comprehensive and accurate combined dataset for analysis.

NEW QUESTION # 64

What elements make up the framework for viewing data in SAP Analytics Cloud?

There are 2 correct answers to this question.

Response:

- **A. Measures**
- **B. Dimensions**
- C. Properties
- D. Allocations

Answer: A,B

NEW QUESTION # 65

Which security features are inherent in SAP Business Data Cloud?

There are 2 correct answers to this question.

Response:

- **A. Data encryption at rest**
- B. Social media integration
- **C. Role-based access control**
- D. Built-in antivirus software

Answer: A,C

NEW QUESTION # 66

.....

Many companies arrange applicants to take certification exams since 1995 internationally such like Microsoft, Fortinet, Veritas, EMC, and HP. SAP C_BCBDC_2505 exam sample online was produced in 2001 and popular in 2008. So far many companies
