Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert Sample Questions (Q137-Q142):

NEW QUESTION # 137

You are the product manager at an orange juice manufacturing company.

For every 1,000 pounds of orange juice, 20 pounds of orange pulp is created which can be sold or reused profitably. The cost is calculated as a weighted average between the quantity of orange juice that is reported as finished and the orange pulp based on the standard cost of each item.

You need to create the formula for orange juice that will produce orange pulp as a result of finishing a batch order.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

NEW QUESTION # 138

A company makes lubricants and greases used in the automotive industry. The company plans to implement Dynamics 365 Supply Chain Management.

The system must meet the following requirements:

- * Schedule the batch production of products.
- * Plan for inventory fluctuations of ingredients that are used across different products.
- * Schedule delivery of amounts of proprietary compounds used during production from vendors to keep production runs on schedule and eliminating excess stock on hand or delayed production.

You need to perform the initial setup of the company's Dynamics 365 environment.

At which level should you set up the items? To answer, drag the appropriate setup levels to the correct setup options. Each setup level may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

A company produces custom-made bicycles that offer many different configurations. Your standard bicycle, B-0001, is made with many common components such as a frame and wheels. Customers can choose between two frames: F-0001 or F-0009. Wheel W-0001 is only compatible with frame F-0001. You create the following configuration groups: Frames, Wheels. You need to ensure that users can only select valid combinations of frames and wheels. In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Explanation:

- 1 - Assign the Frames and Wheels configuration group to the frame...
- 2 - Create a new Bill of materials version with component lines....
- 3 - Add the Frames and Wheels configuration groups to the configuration route
- 4 - Configure the two bicycle configurations
