

Valid 400-007 Exam Tutorial - 400-007 Top Questions

P.S. Free 2026 Cisco 400-007 dumps are available on Google Drive shared by Prep4sureGuide: https://drive.google.com/open?id=1cHLbODod7MC37kck5Njp8NidiJoa_ee0

The 400-007 web-based practice exam requires no installation so you can start your preparation instantly right after you purchase. With thousands of satisfied customers around the globe, questions of the Cisco Certified Design Expert (CCDE) Written Exam (400-007) exam dumps are real so you can pass the Cisco Certified Design Expert (CCDE) Written Exam (400-007) certification on the very first attempt. Hence, it reduces your chances of failure and you can save money and time as well. Cisco exam questions come in three formats i.e., web-based practice test, desktop practice test software, and PDF dumps.

In order to meet different needs of the candidates, three versions for 400-007 exam materials are available. You can choose the one you prefer for your training. 400-007 PDF version is printable, and you can print them into hard one if you like. 400-007 Soft test engine can install in more than 200 personal computers, it also support MS operating system. 400-007 Online Test engine can be convenient and easy to learn, it supports all web browsers, and you can have a general review of what you have learned through this version.

Free PDF Quiz 400-007 - Latest Valid Cisco Certified Design Expert (CCDE) Written Exam Exam Tutorial

Stop hesitating. If you want to experience our 400-007 exam dumps, hurry to click Prep4sureGuide.com to try our pdf real questions and answers. You can free download a part of the dumps. Before you make a decision to buy Prep4sureGuide exam questions and answers, you can visit Prep4sureGuide to know more details so that it can make you understand the website better. In addition, about FULL REFUND policy that you fail the 400-007 Exam, you can understand that information in advance. Prep4sureGuide.com is the website which absolutely guarantees your interests and can imagine ourselves to be in your position.

Cisco Certified Design Expert (CCDE) Written Exam Sample Questions (Q208-Q213):

NEW QUESTION # 208

Which action must be taken before new VoIP systems are implemented on a network to ensure that the network is ready to handle the traffic?

- A. Enable special requirements such as direct DID lines on pickup
- B. Evaluate bandwidth utilization and connection quality
- C. Make recommendations to limit the size of the half-open session table on routers
- D. Check if anomaly detection is enabled for SIP and H.323 on Layer 3 devices

Answer: A

NEW QUESTION # 209

Company XYZ has two routing domains in their network EIGRP and OSPF. The company wants to provide full reachability between the two domains by implementing redistribution on a router running both protocols. They need to design the redistribution in a way that the OSPF routers will see link costs added to external routes. How must the redistribution strategy be designed for this network?

- A. Redistribute using metric type 2 into OSPF
- **B. Redistribute using metric type 1 into OSPF**
- C. Redistribute using metric type 1 into EIGRP
- D. Redistribute using metric type 2 into EIGRP

Answer: B

Explanation:

<https://www.ciscopress.com/articles/article.asp?p=27573&seqNum=4#:~:text=Routes%20are%20redistributed%20in%20OSPF,shown%20in%20Figure%2014%2D2>

NEW QUESTION # 210

Refer to the exhibit.

The WAN network of the General Bank of Greece has experienced several outages It takes too long to activate a new branch site The networking department of the bank plans to upgrade the legacy end-of-life WAN network with a new flexible manageable, and scalable in-house solution The number of branches will increase exponentially in the next fiscal year The CTO states that the bank's main goal is OPEX reduction The network engineering team prepares a table to evaluate the available options Which WAN technology can be used for the solution?

- A. SD-WAN over L3VPN
- B. SD-WAN over L2VPN
- **C. Managed SD-WAN**
- D. DMVPN over L3VPN

Answer: C

NEW QUESTION # 211

Refer to the exhibit. OSPF is running as the IGP to provide reachability to all AS100 networks. R3 and R4 are the current ABRs at the boundary of OSPF Area0 and Area1. Now BGP must be deployed within AS100 because it will be receiving Internet routes from its eBGP peers (the service provider) connected to R1 and R2. What is an optimal solution for this deployment to configure BGP relationships and redistribute BGP learned routes into OSPF?

- A. A full mesh should be deployed between all the routers with mutual redistribution to take place at R1 and R2.
- B. Configuration should be set up with R1 and R2, and R3 in one sub AS, with and R4 in another, and redistribution at R1 and R2.
- C. R1, R2, R3 and R4 must be set up with a neighbor relationship with R5 only must not be a route reflector.
- **D. R5 should be configured as a route reflector for R1, R2, R3 and R4. BGP routes must be redistributed at R1 and R2 into OSPF.**

Answer: D

NEW QUESTION # 212

A business invests in SDN and develops its own SDN controller that, due to budget constraints, runs on a single controller. The controller actively places an exclusive lock on the configuration of the devices to ensure it is the only source of changes to the environment. What is the result if the controller fails?

- A. If a device fails, the configuration backup is unavailable-
- **B. All device configurations are in read-only mode until the controller is restored.**
- C. The control plane is unavailable until the controller is restored.
- D. Manual changes are only possible until the controller is restored
