Salesforce Certification Preparation for Advanced Administrator Sample Questions (Q85-Q90):

NEW QUESTION # 85
The administrator at Universal Containers does a soft launch of the Salesforce Authenticator app and allows users to optionally use it

to log in. The administrator would now like to look at how many users have successfully used it since it was rolled out.
What are two ways the administrator can get this information?
Choose 2 answers

- A. Run a session setting report, specifying login methods by user.
- B. Open the Login Access Policies in Setup which shows how many users are using MFA.
- C. The order of flow execution is unpredictabl
- D. Create a new view in Identity Verification History, specifying Method.

Answer: C

NEW QUESTION # 86
The administrator at Cloud Kicks built a flow in a sandbox. After testing and validating the flow, the administrator plant to promote the flow to the production environment with a change set.
Which three considerations should the administrator be aware of when moving flows with a change sat?
Choose 3 answers

- A. Flows ere automatically activated upon deployment.
- B. All flow dependencies are automatically added to the change set.
- C. Deploying or redeploying a flow with change sets creates a version of the flow in the destination org.
- D. Flow allows only one version of the flow when deployed with a change sat.
- E. Flows deployed are inactive and need to be manually activated.

Answer: B,C,E

Explanation:
Flows deployed with change sets are inactive by default and need to be manually activated in the destination org before they can run. Deploying or redeploying a flow with change sets creates a new version of the flow in the destination org, which preserves the previous versions and allows for rollback if needed. All flow dependencies, such as custom fields, objects, or variables, are automatically added to the change set when a flow is added

NEW QUESTION # 87
The administrator of Universal Containers is testing an approval process in a recently refreshed Developer Pro sandbox and is finding that none of the notification emails are being sent to the approvers.

- A. Opportunities that make up each forecast amount
- B. Forecast amount for each forecast category
- C. Forecast amount for other representatives on their team
- D. Forecast amount for each opportunity stage

Answer: B,D

NEW QUESTION # 89

Sales reps at AW Computing have been reporting that contact phone numbers sometimes revert book to on old value after being updated.

What should the administrator do to resolve this issue?

- A. Consolidate automation tools.
- B. Schedule Apex jobs.
- C. Delete all workflow rules.
- D. Add an invocable process.

Answer: A

Explanation:
One possible cause of unexpected changes to record values is having multiple automation tools that update the same field on the same object. This can create conflicts and overwrite each other's values. To resolve this issue, the administrator should consolidate automation tools and use only one tool per object and field combination. This can help avoid confusion and ensure consistent results.
