Oracle Guided Learning Project Management Foundations Associate - Rel 1 Sample Questions (Q43-Q48):

NEW QUESTION # 43

What action might you take based on results from the Search Terms dashboard?

- A. Remove a guide.
- B. Remove a display group.
- **C. Add a display group.**
- D. Unpublish a guide.

Answer: C

Explanation:

The Search Terms dashboard tracks what users search for in the OGL console, revealing gaps or unmet needs in content accessibility. If users frequently search for topics not easily found, adding a display group (option C) can organize related content more effectively, improving discoverability. Unpublishing (option A) or removing (option B) a guide addresses content status, not search behavior, while removing a display group (option D) might worsen accessibility. Adding a display group aligns with proactive

enhancement based on search insights, ensuring users find relevant guides more efficiently—a practical response rooted in user-driven data.

NEW QUESTION # 44

Which is not a key issue to consider when capturing screenshots of OGL items?

- A. Data privacy
- **B. Activation conditions**
- C. Default images
- D. Multi-language deployments

Answer: B

Explanation:

When capturing screenshots for OGL items, key issues include default images (option A) for consistency, multi-language deployments (option B) for text accuracy, and data privacy (option C) to avoid sensitive information. Activation conditions (option D), which govern when guides appear, are unrelated to screenshot content or capture process. This distinction ensures screenshots are relevant and secure, with activation being a separate configuration concern.

Which type of project document is an integral part of your Change Management documentation?

- A. Business Impact Analysis
- **B. Communications Plan**
- C. Business Process Documentation

A Communications Plan is integral to Change Management documentation in OGL projects, as it outlines how changes are communicated to stakeholders. While Business Impact Analysis (option A) and Business Process Documentation (option D) support change management, they are not core components. Fusion Security Roles (option B) is technical documentation, not change-focused.
