High Pass-Rate GH-200 – 100% Free Pdf Format | GH-200 Valid Study Materials

You can also trust Microsoft GH-200 exam questions and start Microsoft GH-200 exam preparation. With the Microsoft GH-200 valid dumps you can get an idea about the format of real Microsoft GH-200 Exam Questions. These latest Microsoft GH-200

questions will help you pass the GitHub Actions GH-200 exam

Microsoft GitHub Actions Sample Questions (Q28-Q33):

NEW QUESTION # 28

Which workflow command would output the debug message "action successfully debugged"?

- A. `echo "::debug:action successfully debugged"`
- B. `echo :debug:message=action successfully debugged"`
- C. `echo "debug-action successfully debugged"`
- D. `echo ":debug:action successfully debugged:"`

Answer: A

Explanation:

The `::debug::` syntax is used to output debug messages in GitHub Actions workflows. This command will print the message "action successfully debugged" in the debug logs when the workflow runs.

NEW QUESTION # 29

As a developer, how can you identify a composite action on GitHub?

- A. The action's repository name includes the keyword "composite."
- B. The action's repository includes an `init.sh` file in the root directory.
- C. The action's repository includes `Dockerfile` and `package.json` files.
- D. The `action.yml` metadata file has the `runs.using` value set to `composite`.

Answer: D

Explanation:

`runs.using` for composite actions

Required: You must set this value to 'composite'.

Reference:

<https://docs.github.com/en/actions/reference/workflows-and-actions/metadata-syntax>

NEW QUESTION # 30

As a developer, you need to integrate a GitHub Actions workflow with a third-party code quality provider that uses the Checks API. How should you trigger a follow-up workflow?

- A. Add the `check_run` webhook event as a trigger for the workflow when the code quality integration is completed
- B. Add the `workflow_run` webhook event as a trigger for the workflow for the code quality integration name
- C. Add the `pull_request` webhook event as a trigger for the workflow when the code quality integration is synchronized
- D. Add the `deployment` webhook event as a trigger for the workflow when the code quality integration is completed

Answer: A

Explanation:

The `check_run` event is triggered when a check (such as a code quality check) completes, including when the status of a check changes. By adding this event as a trigger, you can initiate a follow-up workflow when the code quality integration finishes its checks.

Reference:

<https://docs.github.com/en/actions/reference/workflows-and-actions/events-that-trigger-workflows>

NEW QUESTION # 31

In which locations can actions be referenced by workflows? (Choose three.)

- A. an `.action` extension file in the repository
- B. a public NPM registry
- C. a published Docker container image on Docker Hub
- D. the `runs-on:` keyword of a workflow file

- E. the same repository as the workflow
- F. the repository's Secrets settings page
- G. a separate public repository

Answer: C,E,G

Explanation:

Actions can be stored in a separate public repository and referenced in workflows by specifying the repository and action name. Actions can also be stored in the same repository as the workflow and referenced directly by their path (e.g., `./github/actions/my-action`).

Actions can be packaged as Docker container images and published to Docker Hub. These can then be referenced in workflows by specifying the Docker image.

NEW QUESTION # 32

You need to create new workflows to deploy to an unfamiliar cloud provider. What is the fastest and safest way to begin?

- A. Use the actions/jenkins-plugin action to utilize an existing Jenkins plugin for the cloud provider.
- B. Create a custom action to wrap the cloud provider's CLI.
- C. Download the CLI for the cloud provider and review the associated documentation.
- D. Search GitHub Marketplace for actions created by GitHub.
- E. Search GitHub Marketplace for verified actions published by the cloud provider.

Answer: E

Explanation:

Searching the GitHub Marketplace for verified actions published by the cloud provider is the quickest and safest approach. Many cloud providers offer verified GitHub Actions that are maintained and optimized to interact with their services. These actions typically come with the correct configurations and best practices, allowing you to get started quickly without reinventing the wheel.

NEW QUESTION # 33

.....

As a matter of fact, long-time study isn't a necessity, but learning with high quality and high efficient is the key method to assist you to succeed.
