

# Reliable PCCP Exam Syllabus - Pass Guaranteed Quiz 2026 PCCP: First-grade Palo Alto Networks Certified Cybersecurity Practitioner Valid Test Answers

BTW, DOWNLOAD part of Itcertking PCCP dumps from Cloud Storage: [https://drive.google.com/open?id=1ZSKzG3WkmU1GFg\\_kwBoCsDUDssypOoMf](https://drive.google.com/open?id=1ZSKzG3WkmU1GFg_kwBoCsDUDssypOoMf)

Clients always wish that they can get immediate use after they buy our PCCP Test Questions because their time to get prepared for the exam is limited. Our PCCP test torrent won't let the client wait for too much time and the client will receive the mails in 5-10 minutes sent by our system. Then the client can log in and use our software to learn immediately. It saves the client's time.

## Palo Alto Networks PCCP Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>• <b>Cybersecurity:</b>This section of the exam measures skills of a Cybersecurity Practitioner and covers fundamental concepts of cybersecurity, including the components of the authentication, authorization, and accounting (AAA) framework, attacker techniques as defined by the MITRE ATT&amp;CK framework, and key principles of Zero Trust such as continuous monitoring and least privilege access. It also addresses understanding advanced persistent threats (APT) and common security technologies like identity and access management (IAM), multi-factor authentication (MFA), mobile device and application management, and email security.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>• <b>Secure Access:</b> This part of the exam measures skills of a Secure Access Engineer and focuses on defining and differentiating Secure Access Service Edge (SASE) and Secure Service Edge (SSE). It covers challenges related to confidentiality, integrity, and availability of data and applications across data, private apps, SaaS, and AI tools. It examines security technologies including secure web gateways, enterprise browsers, remote browser isolation, data loss prevention (DLP), and cloud access security brokers (CASB). The section also describes Software-Defined Wide Area Network (SD-WAN) and Prisma SASE solutions such as Prisma Access, SD-WAN, AI Access, and enterprise DLP.</li> </ul>

Topic 3	<ul style="list-style-type: none"> <li>• Network Security: This domain targets a Network Security Specialist and includes knowledge of Zero Trust Network Access (ZTNA) characteristics, functions of stateless and next-generation firewalls (NGFWs), and the purpose of microsegmentation. It also covers common network security technologies such as intrusion prevention systems (IPS), URL filtering, DNS security, VPNs, and SSL</li> <li>• TLS decryption. Candidates must understand the limitations of signature-based protection, deployment options for NGFWs, cybersecurity concerns in operational technology (OT) and IoT, cloud-delivered security services, and AI-powered security functions like Precision AI.</li> </ul>

## Complete Reliable PCCP Exam Syllabus | Amazing Pass Rate For PCCP Exam | Correct PCCP: Palo Alto Networks Certified Cybersecurity Practitioner

As we all know, Itcertking's Palo Alto Networks PCCP exam training materials has very high profile, and it is also well-known in the worldwide. Why it produces such a big chain reaction? This is because Itcertking's Palo Alto Networks PCCP Exam Training materials is really good. And it really can help us to achieve excellent results.

### Palo Alto Networks Certified Cybersecurity Practitioner Sample Questions (Q175-Q180):

#### NEW QUESTION # 175

What are two advantages of security orchestration, automation, and response (SOAR)? (Choose two.)

- A. Scripting of manual tasks
- B. Long-term retention of logs
- C. Consistent incident handling
- D. Completely isolated system

**Answer: A,C**

Explanation:

Scripting of manual tasks - SOAR platforms automate repetitive, manual security tasks through playbooks and scripting, improving response time and efficiency.

Consistent incident handling - SOAR ensures that incidents are managed in a standardized and repeatable manner, reducing errors and improving compliance.

Isolated system and log retention are not core advantages of SOAR.

#### NEW QUESTION # 176

How does Cortex XSOAR Threat Intelligence Management (TIM) provide relevant threat data to analysts?

- A. It performs SSL decryption to give visibility into user traffic.
- B. It automates the ingestion and aggregation of indicators.
- C. It prevents sensitive data from leaving the network.
- D. It creates an encrypted connection to the company's data center.

**Answer: B**

Explanation:

Cortex XSOAR Threat Intelligence Management (TIM) is a platform that enables security teams to manage the lifecycle of threat intelligence, from aggregation to action. One of the key features of Cortex XSOAR TIM is that it automates the ingestion and aggregation of indicators from various sources, such as threat feeds, open-source intelligence, internal data, and third-party integrations. Indicators are pieces of information that can be used to identify malicious activity, such as IP addresses, domains, URLs, hashes, etc. By automating the ingestion and aggregation of indicators, Cortex XSOAR TIM reduces the manual effort and time required to collect, validate, and prioritize threat data. It also enables analysts to have a unified view of the global threat landscape and the impact of threats on their network. References: 1: Threat Intelligence Management

### NEW QUESTION # 177

Which statement describes a host-based intrusion prevention system (HIPS)?

- A. It scans a Wi-Fi network for unauthorized access and removes unauthorized devices.
- **B. It is installed on an endpoint and inspects the device.**
- C. It analyzes network traffic to detect unusual traffic flows and new malware.
- D. It is placed as a sensor to monitor all network traffic and scan for threats.

**Answer: B**

Explanation:

A Host-Based Intrusion Prevention System (HIPS) is installed directly on an endpoint device (such as a server or workstation) and monitors local system activity, including processes, file access, and system calls, to detect and prevent malicious behavior.

### NEW QUESTION # 178

Which security tool provides policy enforcement for mobile users and remote networks?

- **A. Prisma Access**
- B. Prisma Cloud
- C. Digital experience management
- D. Service connection

**Answer: A**

Explanation:

Prisma Access is a cloud-delivered security platform that provides policy enforcement, secure access, and threat prevention for mobile users and remote networks, ensuring consistent security regardless of location.

### NEW QUESTION # 179

Why is it important to protect East-West traffic within a private cloud?

- A. East-West traffic contains more session-oriented traffic than other traffic
- B. East-West traffic contains more threats than other traffic
- C. East-West traffic uses IPv6 which is less secure than IPv4
- **D. All traffic contains threats, so enterprises must protect against threats across the entire network**

**Answer: D**

Explanation:

East-West traffic is the lateral movement of data packets between servers within a data center, or across private and public clouds<sup>1</sup>. This type of traffic has grown substantially with the proliferation of data centers and cloud adoption, and it now surpasses the conventional North-South traffic that goes in or out of the network<sup>2</sup>. Therefore, it is important to protect East-West traffic from potential malicious actors and breaches, as threats can arise internally and move laterally without ever touching the traditional network perimeter<sup>1,2</sup>. By inspecting and monitoring all East-West traffic, organizations can effectively block the lateral movement of threat actors, increase network visibility, protect vital applications and data, and lower costs and risks for distributed operations<sup>2,3</sup>.
