What is more difficult is not only passing the Certificate of Cloud Security Knowledge v5 (CCSKv5.0) certification exam, but the acute anxiety and the excessive burden also make the candidate nervous to qualify for the Cloud Security Alliance CCSK Certification. If you are going through the same tough challenge, do not worry because Exams-boost is here to assist you.

From the Exams-boost platform, you will get the perfect match CCSK actual test for study. CCSK practice download pdf are researched and produced by Professional Certification Experts who are constantly using industry experience to produce precise, and logical CCSK Training Material. CCSK study material is constantly beginning revised and updated for relevance and accuracy. You will pass your real test with our accurate CCSK practice questions and answers.

Get the Best Accurate CCSK Latest Braindumps and Pass Exam in First Attempt

Our CCSK prep torrent will provide customers with three versions: PDF, soft and APP versions, each of them has its own advantages. Now I am going to introduce you the PDF version of CCSK test braindumps. It is well known to us that the PDF version is very convenient and practical. The PDF version of our CCSK Test Braindumps provide demo for customers. At the same time, if you use the PDF version, you can print our CCSK exam torrent by the PDF version; it will be very easy for you to take notes. I believe our CCSK test braindumps will bring you great convenience.

Cloud Security Alliance Certificate of Cloud Security Knowledge v5 (CCSKv5.0) Sample Questions (Q54-Q59):

NEW QUESTION # 54

What is the newer application development methodology and philosophy focused on automation of application development and deployment?

- A. SecDevOps
- **B. DevOps**
- C. BusOps
- D. Agile
- E. Scrum

Answer: B

NEW QUESTION # 55

Select the best definition of "compliance" from the options below.

- A. The process of completing all forms and paperwork necessary to develop a defensible paper trail.
- B. The diligent habits of good security practices and recording of the same.
- C. The timely and efficient filing of security reports.
- D. The development of a routine that covers all necessary security measures.
- **E. The awareness and adherence to obligations, including the assessment and prioritization of corrective actions deemed necessary and appropriate.**

Answer: E

NEW QUESTION # 56

Which of the following ISO Standard provides Code of practice for information security controls based on ISO/IEC 27002 for cloud services?

- A. ISO 27018
- B. ISO 27034
- **C. ISO 27017**
- D. ISO 27032

Answer: C

Explanation:

ISO 27017 provides Code of practice for information security controls based on ISO/IEC 27002 for cloud services.

NEW QUESTION # 57

In the context of IaaS, what are the primary components included in infrastructure?

- A. Network configuration tools, storage encryption, and virtualization platforms
- B. User authentication systems, application deployment services, and database management
- C. Load balancers, firewalls, and backup solutions
- **D. Compute, network, and storage resource pools**

Answer: D

Explanation:

Correct Option: B. Compute, network, and storage resource pools

In the Infrastructure as a Service (IaaS) model, the term "infrastructure" refers to the core physical and virtualized building blocks that form the basis of a cloud environment. These components are abstracted and pooled to offer on-demand provisioning to cloud consumers.

From the CSA Security Guidance v4.0 - Domain 1: Cloud Computing Concepts and Architectures:

"Infrastructure: The core components of a computing system: compute, network, and storage. The foundation that everything else is built on. The moving parts."

- Section 1.1.4 Logical Model, CSA Security Guidance v4.0

Furthermore:

"IaaS consists of a facility, hardware, an abstraction layer, an orchestration (core connectivity and delivery) layer to tie together the abstracted resources, and APIs to remotely manage the resources and deliver them to consumers."

- Section 1.1.3.1 Infrastructure as a Service, CSA Security Guidance v4.0 These are commonly referred to as resource pools, and form the foundation of what IaaS delivers: virtual machines (compute), virtual networks (networking), and object/block storage systems (storage).

Why the Other Options Are Incorrect:

- * A. Network configuration tools, storage encryption, and virtualization platforms# These are supporting technologies and security tools, not the actual infrastructure components that make up IaaS.
- * C. User authentication systems, application deployment services, and database management# These fall under PaaS (Platform as a Service) and SaaS. IaaS does not manage applications or authentication; it provides the foundation upon which these services run.
- * D. Load balancers, firewalls, and backup solutions# These are add-on services or features, not the core infrastructure components of IaaS. While often used alongside IaaS, they are not the essential building blocks of infrastructure.
- * Main Topic: Cloud Computing Concepts and Architectures
- * Source: CSA Security Guidance v4.0, Domain 1, Sections 1.1.3.1 & 1.1.4

NEW QUESTION # 58

In the cloud provider and consumer relationship, which entity manages the virtual or abstracted infrastructure?

- A. Only the cloud provider
- B. It is outsourced as per the entity agreement
- C. It is determined in the agreement between the entities
- **D. Both the cloud provider and consumer**
- E. Only the cloud consumer

Answer: D

NEW QUESTION # 59

.....

We promise during the process of installment and payment of our CCSK prep torrent, the security of your computer or cellphone can be guaranteed, which means that you will be not afraid of virus intrusion and personal information leakage. Besides we have the right to protect your email address and not release your details to the 3rd parties.
