In this society, only by continuous learning and progress can we get what we really want. It is crucial to keep yourself survive in the competitive tide. Many people want to get a IIA-CIA-Part3 certification, but they worry about their ability. Using our products does not take you too much time but you can get a very high rate of return. Our IIA-CIA-Part3 Quiz guide is of high quality, which mainly reflected in the passing rate. We can promise higher qualification rates for our IIA-CIA-Part3 exam question than materials of other institutions.

IIA-CIA-Part3 certification exam is designed to test the knowledge and skills of candidates in various areas of internal auditing. IIA-CIA-Part3 Exam covers a broad range of topics, including the role of internal auditing in organizations, the principles of corporate governance, the management of risks, the use of technology in internal auditing, and the importance of effective communication. Passing the exam requires a solid understanding of these topics and their application in real-world scenarios.

IIA Business Knowledge for Internal Auditing Sample Questions (Q71-Q76):

NEW QUESTION # 71

Which of the following best describes a transformational leader, as opposed to a transactional leader?

- A. The leader intervenes only when performance standards are not met.
- B. The leader searches for deviations from the rules and standards and intervenes when deviations exist.
- C. The leader does not intervene to promote problem-solving
- **D. The leader intervenes to communicate high expectations.**

Answer: D

NEW QUESTION # 72

An employee's right to obtain postemployment benefits regardless of whether she remains employed is known as his/her.

- A. Defined benefit plan.
- B. Service cost.
- **C. Vested benefits.**
- D. Additional minimum liability.

Answer: C

Explanation:

Vested benefits are those earned postemployment benefits owed to any employee that are not contingent upon the employee's continued service. Whether benefits have vested affects the measurement of the employer's defined benefit obligation but not its existence. Moreover, vesting affects the accounting for past service cost. Past service cost is amortized as an expense over the average term until the benefits are vested.

NEW QUESTION # 73

The economic order quantity can be calculated using the following formula:

Which of the following describes how the optimal order size will change if the annual demand increases by 36 percent?

- A. Increase by about 7 percent.
- **B. Increase by about 17 percent.**
- C. Decrease by about 17 percent.
- D. Decrease by about 7 percent.

Answer: B

NEW QUESTION # 74

What is the number of production runs per year of computer chairs that would minimize the sum of carrying and setup costs for the coming year?

- **A. 0**
- B. 1
- C. 2

- D. 3

Answer: A

Explanation:

The EOQ minimizes the sum of carrying and setup costs. The EOQ is the amount at which carrying costs are equal to setup costs. Thus, plugging the data into the EOQ formula results in the following:

Thus, if each lot consists of 1,000 units, five production runs per year are needed to meet the 5,000-unit demand. At this level, setup costs will total US \$5,000 (5 × \$1,000). Carrying costs will also equal US \$5,000 (10 per unit carrying cost average inventory of 500 units).

Accordingly, total costs are minimized at US \$10,000. Jed Ryerson Computer Furniture, Inc. (RCF) manufactures a line of office computer chairs. The annual demand for the chairs is estimated to be 5,000 units. The annual cost to hold one unit in inventory is US \$10 per year, and the cost to initiate a production run is US \$1,000. There are no computer chairs on hand, and RCF has scheduled four equal production runs of computer chairs for the coming year, the first of which is to be run immediately. RCF has 250 business days per year, sales occur uniformly throughout the year, and production start-up is within one day. RCF is considering using the following formula for determining the economic order quantity (EOQ):

If A = cost to initiate a production run per purchase order D = annual unit demand K = cost of carrying one unit per year

NEW QUESTION # 75

If a corporation holds a forward contract for the delivery of government bonds in 6 months and, during those 6 months, interest rates decline, at the end of the 6 months the value of the forward contract will have:

- A. Remained constant.
D Any of the answers may be correct, depending on the extent of the decline in interest rates.
- **B. Increased.**
- C. Decreased.

Answer: B

Explanation:

Interest rate futures contracts involve risk-free bonds. When interest rates decrease over the period of a forward contract, the value of the bonds and the forward contract increase.

NEW QUESTION # 76

.....

Our IIA-CIA-Part3 exam questions generally raised the standard of practice materials in the market with the spreading of higher standard of knowledge in this area.
