問題 #26

For which of the following transactions do you receive an error message if the automatic account determination is set up incorrectly?

Note: There are 3 correct answers to this question.

- A. Material price change
- B. Goods receipt into blocked stock
- C. Stock transfer between company codes
- D. Purchasing info record price change
- E. Stock transfer posting between stock types

答案： B,C,E

解題說明：

Explanation

The automatic account determination is used to assign the correct general ledger accounts for the inventory postings. If the account determination is set up incorrectly, the system will issue an error message when posting a transaction that affects the inventory value or quantity. The transactions C, D, and E are examples of such transactions, as they involve stock movements between different valuation areas, stock types, or company codes. The transactions A and B do not affect the inventory value or quantity, as they only change the material master data or the purchasing info record. References: SAP Help Portal, SAP Community
