

Free PDF Quiz American Society of Microbiology - Accurate ABMM - Latest Study ABMM Questions

Sample Questions

American Board of Medical Microbiology

*The American Board of Medical Microbiology
©2013 American Society for Microbiology*

Rev. 05/18/2013

1. A patient with a history of travel to Somalia presents with an ulcerative lesion on his forearm. Biopsy revealed small, intracellular organisms. Which of the following is an appropriate medium for recovery of the organisms?
 - a. Diamond's medium
 - b. Fletcher's medium
 - c. Navy-MacNeal-Nicolle (NNN) medium
 - d. Eagle's minimal essential medium

Question tests Category 1.1 (Up-to-date practices)
2. According to the College of American Pathologists, which of the following is appropriate for laboratory procedure manuals?
 - a. A package insert is an acceptable substitute for a written procedure.
 - b. A manufacturer-generated CLIA procedure is not acceptable for use.
 - c. Procedure summaries are not acceptable to use at the bench.
 - d. Electronic copies of manuals are acceptable as long as backup is available.

Question tests Category 1.2 (Test protocols)
3. Which parasitologic procedures should be available on a 24-hour basis?
 - a. Blood films for *Plasmodium* species.
 - b. Ova and parasite examination for *Giardia lamblia*.
 - c. Baermann concentration for *Strongyloides stercoralis*.
 - d. Spentix tape examinations for *Potomavirus unimulans*.
4. The laboratory asks for your interpretation of a real-time PCR run. The positive control was negative and the negative control was positive. The tech wants to know how to proceed. What should you tell her?
 - a. The controls for the run did not display expected results; therefore, the entire run failed and must be repeated.
 - b. Report out the negatives; since at least one tube was positive, it demonstrates that amplification took place. Repeat any positives on the next run to ensure there was no contamination.
 - c. Report out the positive specimens, since at least one tube was negative and one was positive, demonstrating that amplification took place. Repeat negatives on the next run to make sure they all had mastermix added to them.
 - d. Report out all the specimens, since the reagents are expensive, and the negative and positive controls were clearly reversed.

Question tests Category 1.4 (Quality control)
5. In assessment of blood culture contamination rates, which of the following is generally recognized as the maximum acceptable rate?
 - a. 0%
 - b. 3%
 - c. 10%
 - d. 12%

Question tests Category 1.5 (Quality metrics/indicators)

Quiz American Society of Microbiology - ABMM - ABMM –High Pass-Rate Latest Study Questions

No matter how good the product is users will encounter some difficult problems in the process of use, and how to deal with these

problems quickly becomes a standard to test the level of product service. Our ABMM real exam materials are not exceptional also, in order to enjoy the best product experience, as long as the user is in use process found any problem, can timely feedback to us, for the first time you check our ABMM Exam Question performance, professional maintenance staff to help users solve problems. Our ABMM learning reference files have a high efficient product maintenance team, a professional staff every day real-time monitoring the use of the user environment and learning platform security, even in the incubation period, we can accurate solution for the user, for the use of the user to create a safer environment.

American Society of Microbiology ABMM Sample Questions (Q117-Q122):

NEW QUESTION # 117

A research laboratory is investigating the mechanism of action of a novel antiviral compound that inhibits the replication of a specific RNA virus. They find that the compound binds directly to the viral RNA-dependent RNA polymerase, preventing its elongation activity. This mechanism is most similar to that of:

- A. Oseltamivir
- **B. Ribavirin**
- C. Interferon-beta
- D. Acyclovir

Answer: B

NEW QUESTION # 118

A serum sample from an asymptomatic patient screened for syphilis yields a reactive Rapid Plasma Reagin (RPR) test result with a titer of 1:16, but a non-reactive Treponema pallidum particle agglutination (TP-PA) test. What is the most likely interpretation of these findings?

- A. Successfully treated past syphilis infection
- **B. Biological false positive (BFP) RPR reaction**
- C. Prozone phenomenon in the TP-PA test
- D. Early primary syphilis (before treponemal antibodies develop)

Answer: B

NEW QUESTION # 119

During the processing of stool specimens for ova and parasite examination, the formalin-ethyl acetate concentration procedure primarily serves to:

- **A. Separate parasites from fecal debris and concentrate them**
- B. Selectively culture protozoan trophozoites
- C. Stain parasite nuclei for easier identification
- D. Preserve parasite morphology and kill bacteria

Answer: A

NEW QUESTION # 120

A patient develops a severe diarrheal illness after consuming raw oysters. Stool cultures grow a Gram-negative, comma-shaped bacterium that is oxidase-positive and grows on thiosulfate-citrate-bile salts-sucrose (TCBS) agar, producing green colonies. The MOST likely virulence factor contributing to the watery diarrhea is:

- **A. Cholera toxin-like enterotoxin**
- B. Shiga toxin
- C. Cytotoxin-associated gene A (CagA)
- D. Heat-labile toxin (LT)

Answer: A

NEW QUESTION # 121

A clinical microbiology laboratory is monitoring the emergence of antimicrobial resistance. The detection of a bacterial isolate with reduced susceptibility to multiple classes of antibiotics, often due to horizontal gene transfer of resistance determinants, is characteristic of:

- **A. A multidrug-resistant (MDR) organism.**
- B. An intrinsically resistant organism.
- C. A pan-susceptible organism.
- D. A naturally competent organism.

Answer: A

NEW QUESTION # 122

.....

Our ABMM prep material target all users and any learners, regardless of their age, gender and education background. We provide 3 versions for the clients to choose based on the consideration that all the users can choose the most suitable version to learn. The 3 versions each support different using method and equipment and the client can use the ABMM Exam Dump on the smart phones, laptops or the tablet computers. The clients can choose the version which supports their equipment on their hands to learn.
