NEW QUESTION # 17
Your procurement organization has a requirement to include order information from a sales order with their purchase order documents. Service mappings can be used to help meet their specific integration requirements for their supply chain tools.
If you need to integrate objects from a sales order with a purchase order, which three supply chain modules would be required?

- A. Business Process Management Cloud
- B. Procurement Cloud
- C. Supply Planning Cloud
- D. Order Management Cloud
- E. Supply Chain Orchestration Cloud

Answer: B,D,E

Explanation:
Service mappings are used to integrate Order Management with other Oracle applications by mapping attributes from a sales order to a purchase order. Service mappings enable you to pass order information from a sales order to a purchase order document, such as supplier, item, quantity, price, and so on. To use service mappings, you need three supply chain modules: Supply Chain Orchestration Cloud, Procurement Cloud, and Order Management Cloud. Supply Chain Orchestration Cloud is the module that creates and manages the purchase order document based on the sales order information. Procurement Cloud is the module that provides the functionality to manage suppliers, purchase agreements, and requisitions. Order Management Cloud is the module that captures and fulfills the sales order.

NEW QUESTION # 18
Your organization requires you to include Extensible Flexfield values into your sales order approval rules.
Which three order entities support the use of Extensible Flexfield attributes in approval rules for sales orders?

- A. Process
- B. Fulfillment Line
- C. Delivery
- D. Line
- E. Header

Answer: B,D,E

Explanation:
Extensible Flexfield attributes are custom attributes that you can add to Order Management entities to capture additional information that is specific to your business needs. You can use these attributes in approval rules for sales orders to define conditions and actions based on the values of the attributes. The order entities that support the use of Extensible Flexfield attributes in approval rules for sales orders are Header, Line, and Fulfillment Line. These entities have predefined Extensible Flexfield categories that you can configure and deploy in the Setup and Maintenance work area. You can also access and update these attributes in the Order Management work area.
