

# HOT New EMT Exam Sample: Emergency Medical Technicians Exam - The Best NREMT Test EMT Engine

What's more, part of that Exam4Docs EMT dumps now are free: <https://drive.google.com/open?id=1vM-NraqV9jT01VUWApBoKunc7kPVB5B5>

With a high quality, we can guarantee that our EMT practice quiz will be your best choice. There are three different versions of our EMT guide dumps: the PDF, the software and the online. The three versions of our EMT learning engine are all good with same questions and answers. Our products have many advantages, I am going to introduce you the main advantages of our EMT Study Materials, I believe it will be very beneficial for you and you will not regret to use our products.

## How can you ready for Emergency Medical Technicians (EMT) Exam

**For Emergency Medical Technicians (EMT) Exam, there is a study guide**

**Emergency Medical Technicians (EMT): Get our quick guide if you don't have time to read all the page.**

The National Registry of Emergency Medical Technicians, or NREMT, is a nonprofit organization that helps maintain the skills, knowledge, and abilities of Emergency Medical Technicians (EMTs) in the United States. Although you probably know the important role EMUs play in our society, you may not be familiar with the proof required to become an emergency medical technician. NREMT manages a wide range of professional emergency medical tests, including First Aid, First Aid (EMR), First Aid Technicians (EMT), Advanced First Aid Technicians (AEMT), EMT -Intermediate / 99 (EMT- I / 99) and paramedics. Although the exams vary by type of emergency responder, they cover all the general knowledge and skills necessary to provide emergency medical services. In this guide, we'll cover everything you need to know about the EMT exam, including study tips, test content, scoring, the best NREMT practice exam, and much more.

**There are Candidates must know the topics before they start of preparation.**

Our Test Prep EMT exam dumps will include the following topics:

- Trauma 21%
- EMS Operations 12%
- Cardiology and Resuscitation 19%
- Airway, Respiration, and Ventilation 20%
- Medical / Obstetrics / Gynecology 28%

## 100% Pass Quiz NREMT - Pass-Sure New EMT Exam Sample

In recent years, the market has been plagued by the proliferation of EMT learning products on qualifying examinations, so it is extremely difficult to find and select our EMT test questions in many similar products. However, we believe that with the excellent quality and good reputation of our EMT Study Materials, we will be able to let users select us in many products. Our study materials allow users to use the EMT certification guide for free to help users better understand our products better.

### There is the cost of Test Prep EMT Exam

- The Test Prep EMT Exam is \$80.

## NREMT Emergency Medical Technicians Exam Sample Questions (Q95-Q100):

### NEW QUESTION # 95

A 24-year-old patient was involved in an MVC. The EMT is completing the patient care report. Which of the following statements indicate pertinent negatives? Select the two correct options.

- A. "The patient reported abdominal tenderness."
- B. "The patient reported no loss of consciousness."
- C. "The patient initially refused assessment."
- D. "The patient was disruptive and non-compliant with EMS."
- E. "The patient denied neck or back pain."

**Answer: B,E**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Pertinent negatives are findings that are not present, but would be clinically relevant if they were. For example:

\* "No neck or back pain" helps rule out spinal injury

\* "No loss of consciousness" informs head trauma assessment

Statements about behavior or initial refusal (B, E) may be documented under patient behavior or refusal, but they are not pertinent negatives. Positive findings like abdominal tenderness are pertinent positives.

### NEW QUESTION # 96

What components are necessary to maintain adequate perfusion? Select the three correct options.

- A. Intact microcirculation
- B. Low ventilation-perfusion ratio
- C. High alveolar pressure
- D. Hypoxic drive
- E. Patent airway
- F. Sufficient blood volume

**Answer: A,E,F**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Perfusion refers to delivery of oxygen and nutrients to tissues. It depends on three essential components:

\* Patent airway: Ensures oxygen reaches lungs

\* Intact microcirculation: Capillary-level exchange must function

\* Sufficient blood volume: Maintains blood pressure and oxygen transport Hypoxic drive relates to COPD physiology, not perfusion. High alveolar pressure (like from CPAP) may impede venous return, and a low ventilation-perfusion ratio means poor oxygenation efficiency, which negatively affects perfusion.

**NEW QUESTION # 97**

Which of the following sections are designated by command at an MCI? Select the three correct options.

- A. Planning
- B. Catering
- C. Logistics
- D. Finance
- E. Aviation
- F. Staging

**Answer: A,C,D**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In Incident Command System (ICS) for Mass Casualty Incidents (MCI), the four major sections are:

\* Planning: Collects data and develops response strategies

\* Logistics: Supplies and personnel

\* Finance/Administration: Cost tracking, contracts, compensation

Staging is a tactical location, not a management section. Catering and aviation are not command-level ICS designations unless part of specific tasks under logistics or operations.

**NEW QUESTION # 98**

Which of the following are nerve agents? Select the two answer options that are correct.

- A. Tabun
- B. Naloxone
- C. Metoprolol
- D. Atropine
- E. Sarin

**Answer: A,E**

Explanation:

Comprehensive and Detailed Explanation (Based on NREMT standards):

Nerve agents are highly toxic organophosphate chemicals that inhibit acetylcholinesterase, leading to excess acetylcholine accumulation and life-threatening cholinergic effects. NREMT hazardous materials education highlights recognition of these agents due to their rapid lethality.

Option C (Tabun) and D (Sarin) are correct. Both are internationally recognized nerve agents historically used in chemical warfare and terrorist attacks.

Option A (Naloxone) is an opioid antagonist, not a nerve agent.

Option B (Metoprolol) is a beta-blocker medication.

Option E (Atropine) is not a nerve agent; it is an antidote used to treat nerve agent poisoning.

NREMT emphasizes scene safety, recognition of toxidromes, and early antidote administration for nerve agent exposure.

**NEW QUESTION # 99**

A 78-year-old female tripped and fell while walking. Her left leg is rotated externally and shorter than her right leg. You should suspect

- A. Colles' fracture

- B. Pelvic fracture
- **C. Proximal femur fracture**
- D. Posterior hip dislocation

**Answer: C**

Explanation:

An externally rotated, shortened leg is a classic sign of a proximal femur fracture, specifically a femoral neck or intertrochanteric fracture, commonly seen in elderly fall patients. This presentation reflects muscle pull and fracture displacement.

\* Posterior hip dislocations cause internal rotation.

\* Pelvic fractures may cause instability but not specific leg rotation/shortening.

\* Colles' fracture is a distal radius (wrist) injury, unrelated to leg trauma.
