Our MLA-C01 guide questions have helped many people obtain an international certificate. In this industry, our products are in a leading position in all aspects. If you really want to get an international certificate, our MLA-C01 training quiz is really your best choice. Of course, you really must get international certification if you want to stand out in the job market and get better jobs and higher salaries. With the help of our MLA-C01 Exam Materials, you can reach your dream.

If you are anxious about whether you can pass your exam and get the certificate, we think you need to buy our MLA-C01 study materials as your study tool, our product will lend you a good helping hand. If you are willing to take our MLA-C01 study materials into more consideration, it must be very easy for you to pass your exam in a short time. 99% people who have used our MLA-C01 Study Materials passed their exam and got their certificate successfully, it is no doubt that it means our MLA-C01 study materials have a 99% pass rate. So our product will be a very good choice for you.

### Real Amazon MLA-C01 Exams - MLA-C01 Exam

The APP version of our MLA-C01 study guide provides you with mock exams, time-limited exams, and online error correction and let you can review on any electronic device. So that you can practice our MLA-C01 exam questions on Phone or IPAD, computer as so on. At the same time, for any version, we do not limit the number of downloads and the number of concurrent users, you can even buy MLA-C01 Learning Materials together with your friends, which undoubtedly saves you a lot of overhead.

### Amazon AWS Certified Machine Learning Engineer - Associate Sample

## Questions (Q89-Q94):

### NEW QUESTION # 89

A company has historical data that shows whether customers needed long-term support from company staff. The company needs to develop an ML model to predict whether new customers will require long-term support. Which modeling approach should the company use to meet this requirement?

- A. Linear regression
- B. **Logistic regression**
- C. Anomaly detection
- D. Semantic segmentation

### Answer: B

Explanation:

Logistic regression is a suitable modeling approach for this requirement because it is designed for binary classification problems, such as predicting whether a customer will require long-term support ("yes" or "no").

It calculates the probability of a particular class and is widely used for tasks like this where the outcome is categorical.

### NEW QUESTION # 90

An ML engineer needs to merge and transform data from two sources to retrain an existing ML model. One data source consists of .csv files that are stored in an Amazon S3 bucket. Each .csv file consists of millions of records. The other data source is an Amazon Aurora DB cluster.

The result of the merge process must be written to a second S3 bucket. The ML engineer needs to perform this merge-and-transform task every week.

Which solution will meet these requirements with the LEAST operational overhead?

- A. Create a transient Amazon EMR cluster every week. Use the cluster to run an Apache Spark job to merge and transform the data.
- B. **Create a weekly AWS Glue job that uses the Apache Spark engine. Use DynamicFrame native operations to merge and transform the data.**
- C. Create an AWS Batch job that runs Apache Spark code on Amazon EC2 instances every week. Configure the Spark code to save the data from the EC2 instances to the second S3 bucket.
- D. Create an AWS Lambda function that runs Apache Spark code every week to merge and transform the data. Configure the Lambda function to connect to the initial S3 bucket and the DB cluster.

### Answer: B

### NEW QUESTION # 91

A medical company is using AWS to build a tool to recommend treatments for patients. The company has obtained health records and self-reported textual information in English from patients. The company needs to use this information to gain insight about the patients.

Which solution will meet this requirement with the LEAST development effort?

- A. **Use Amazon Comprehend Medical to summarize the data.**
- B. Use Amazon SageMaker to build a recurrent neural network (RNN) to summarize the data.
- C. Use the Amazon SageMaker Sequence-to-Sequence (seq2seq) algorithm to create a text summary from the data.
- D. Use Amazon Kendra to create a quick-search tool to query the data.

### Answer: A

### NEW QUESTION # 92

A company needs to use Retrieval Augmented Generation (RAG) to supplement an open source large language model (LLM) that runs on Amazon Bedrock. The company's data for RAG is a set of documents in an Amazon S3 bucket. The documents consist of .csv files and .docx files.

Which solution will meet these requirements with the LEAST operational overhead?

- A. Fine-tune an existing LLM by using an AutoML job in Amazon SageMaker. Configure the S3 bucket as a data source for the AutoML job. Deploy the LLM to a SageMaker endpoint. Use the endpoint to perform RAG queries.
- B. **Create a knowledge base for Amazon Bedrock. Configure a data source that references the S3 bucket. Use the Amazon Bedrock API to perform RAG queries.**
- C. Convert the data into vectors. Store the data in an Amazon Neptune database. Connect the database to Amazon Bedrock. Call the Amazon Bedrock API to perform RAG queries.
- D. Create a pipeline in Amazon SageMaker Pipelines to generate a new model. Call the new model from Amazon Bedrock to perform RAG queries.

**Answer: B**

#### NEW QUESTION # 93

An ML engineer has an Amazon Comprehend custom model in Account A in the us-east-1 Region. The ML engineer needs to copy the model to Account # in the same Region.

Which solution will meet this requirement with the LEAST development effort?

- A. Use Amazon S3 to make a copy of the model. Transfer the copy to Account B.
- B. **Create a resource-based IAM policy. Use the Amazon Comprehend ImportModel API operation to copy the model to Account B.**
- C. Create an AWS Site-to-Site VPN connection between Account A and Account # to transfer the model.
- D. Use AWS DataSync to replicate the model from Account A to Account B.

**Answer: B**

Explanation:

Amazon Comprehend provides the ImportModel API operation, which allows you to copy a custom model between AWS accounts. By creating a resource-based IAM policy on the model in Account A, you can grant Account B the necessary permissions to access and import the model. This approach requires minimal development effort and is the AWS-recommended method for sharing custom models across accounts.

#### NEW QUESTION # 94

.....

It is never too late to learn. You still have the chance to obtain the MLA-C01 certificate as long as you want. What is more, many people have harvested happiness and success after passing the MLA-C01 exam. Then you are available for various high salary jobs. You also can become lucky as long as you never give up hopes. Let us make it together. We will be your best friend on your way to get the MLA-C01 Certification with our excellent learning braindumps.
