Quiz 2026 Professional Microsoft Interactive SC-300 Practice Exam

If you are craving for getting promotion in your company, you must master some special skills which no one can surpass you. To suit your demands, our company has launched the SC-300 exam materials especially for office workers. For on one hand, they are busy with their work, they have to get the SC-300 Certification by the little spread time. On the other hand, it is not easy to gather all of the exam materials by themselves. So our SC-300 study questions are their best choice.

Earning the Microsoft SC-300 Certification can be a valuable addition to a professional's resume, as it demonstrates a high level of expertise in identity and access management in Microsoft Azure. Certification holders can take on key roles such as Identity and Access Administrator, Security Administrator, or Cloud Security Engineer. Additionally, the certification serves as a prerequisite for the Microsoft Certified: Security, Compliance, and Identity Fundamentals certification, which covers a broader range of security and compliance concepts in Microsoft Azure.

Microsoft Identity and Access Administrator Sample Questions (Q153-Q158):

NEW QUESTION # 153

SIMULATION

Task 3

You need to add the LinkedIn application as a resource to the Sales and Marketing access package. The solution must NOT remove any other resources from the access package.

Answer:

Explanation:

See the Explanation for the complete step by step solution

Explanation:

To add the LinkedIn application as a resource to the Sales and Marketing access package without removing any other resources, you can follow these steps:

Sign in to the Microsoft Entra admin center:

Ensure you have the role of Global Administrator or Identity Governance Administrator.

Navigate to Entitlement Management:

Go to Identity governance > Entitlement management > Access packages 1.

Select the Sales and Marketing access package:

Find and select the Sales and Marketing access package to modify it.

Add a new resource:

Within the access package details, select Resources.

Click on + Add resource.

Search for and select the LinkedIn application from the list of available resources.

Configure the resource role:

Assign the appropriate role for the LinkedIn application that users in the Sales and Marketing access package will have.

Review and update the access package:

Ensure that the LinkedIn application has been added as a resource.

Confirm that no other resources have been removed from the access package.

Save the changes:

After reviewing, save the changes to the access package.

Communicate the update:

Notify the relevant users about the addition of the LinkedIn application to their access package.

By following these steps, you will successfully add the LinkedIn application to the Sales and Marketing access package without affecting the other resources.

NEW QUESTION # 154

You have an Azure Active Directory (Azure AD) tenant named contoso.com.

All users who run applications registered in Azure AD are subject to conditional access policies.

You need to prevent the users from using legacy authentication.

What should you include in the conditional access policies to filter out legacy authentication attempts?

- A. a sign-in risk condition
- **B. a client apps condition**
- C. a user risk condition
- D. a cloud apps or actions condition

Answer: B

Explanation:

Directly blocking legacy authentication

The easiest way to block legacy authentication across your entire organization is by configuring a Conditional Access policy that applies specifically to legacy authentication clients and blocks access.

Conditional Access policies apply to all client apps by default Client apps.

By default, all newly created Conditional Access policies will apply to all client app types even if the client apps condition is not configured.
