NEW QUESTION # 162

You are evaluating an Azure environment for compliance. You need to design an Azure Policy implementation that can be used to evaluate compliance without changing any resources.

Which effect should you use in Azure Policy?

- A. Append
- B. Modify
- C. Disabled
- D. Deny

Answer: C

Explanation:

It has to be disabled since deny will send the compliance report as non-complaint.

This effect is useful for testing situations or for when the policy definition has parameterized the effect. This flexibility makes it possible to disable a single assignment instead of disabling all of that policy's assignments.

An alternative to the Disabled effect is enforcementMode, which is set on the policy assignment.

When enforcementMode is Disabled, resources are still evaluated.
