CheckPoint Check Point Certified Security Expert R81 Sample Questions (Q38-Q43):

NEW QUESTION # 38

What is required for a site-to-site VPN tunnel that does not use certificates?

- **A. Pre-Shared Secret**
- B. RSA Token
- C. SecureID
- D. Unique Passwords

Answer: A

Explanation:

A pre-shared secret is a secret key that is shared between the two VPN peers before establishing a secure connection. It is used to authenticate the VPN peers and encrypt the VPN traffic. A pre-shared secret is required for a site-to-site VPN tunnel that does not use certificates, because certificates are another way of authenticating the VPN peers using public key cryptography. Without certificates, the VPN peers need to have a common secret key that only they know. References: Check Point R81 VPN Administration Guide, page 13

NEW QUESTION # 39

What is a best practice before starting to troubleshoot using the "fw monitor" tool?

- A. Clear the connections table
- **B. Disable SecureXL**
- C. Disable CoreXL
- D. Run the command: fw monitor debug on

Answer: B

Explanation:

A best practice before starting to troubleshoot using the fw monitor tool is to disable SecureXL. SecureXL is a performance acceleration solution that optimizes the packet flow through the Security Gateway. However, SecureXL can also bypass some inspection points and cause some packets to be invisible to fw monitor.

Therefore, disabling SecureXL can ensure that fw monitor captures all the relevant packets for troubleshooting purposes.

NEW QUESTION # 40

You have used the SmartEvent GUI to create a custom Event policy. What is the best way to display the correlated Events generated by SmartEvent Policies?

- **A. In the SmartConsole / Logs & Monitor --> open a new Tab and select External Apps / SmartEvent.**
- B. Select the Events tab in the SmartEvent GUI or use the Events tab in the SmartView web interface.
- C. In the SmartConsole / Logs & Monitor --> open the Logs View and use type:Correlated as query filter.
- D. Open SmartView Monitor and select the SmartEvent Window from the main menu.

Answer: A

Explanation:

The best way to display the correlated events generated by SmartEvent policies is to open a new tab in the SmartConsole / Logs & Monitor and select External Apps / SmartEvent. This will launch the SmartEvent GUI, which provides a comprehensive view of the network security events, including charts, reports, and timelines. The SmartEvent GUI can also be accessed from a web browser using the SmartView web interface¹. References: Check Point R81 SmartEvent Administration Guide

NEW QUESTION # 41
