

PCCP試験の準備方法 | 素敵なPCCP的中率試験 | 100%合格率のPalo Alto Networks Certified Cybersecurity Practitioner試験時間

P.S.ShikenPASSがGoogle Driveで共有している無料の2026 Palo Alto Networks PCCPダウンロード: <https://drive.google.com/open?id=1yb2VSYoXISMWlGGLqQLOdJ6JfVSkpYAU>

PCCP学習クイズの最も注目すべき機能は、簡単かつ簡単に試験のポイントを学習し、認定コースの概要のコア情報を習得するのに役立つ最も実用的なソリューションを提供することです。それらの品質は、他の資料の品質よりもはるかに高く、PCCPトレーニング資料の質問と回答には、利用可能な最良のソースからの情報が含まれています。これらはテスト標準に関連しており、実際のテストの形式で作成されます。初心者であれ経験豊富な試験受験者であれ、当社のPCCPスタディガイドは大きなプレッシャーを軽減し、困難を効率的に克服するのに役立ちます。

Palo Alto Networks PCCP 認定試験の出題範囲:

トピック	出題範囲
トピック 1	<ul style="list-style-type: none">Endpoint Security: This domain is aimed at an Endpoint Security Analyst and covers identifying indicators of compromise (IOCs) and understanding the limits of signature-based anti-malware. It includes concepts like User and Entity Behavior Analytics (UEBA), endpoint detection and response (EDR), and extended detection and response (XDR). It also describes behavioral threat prevention and endpoint security technologies such as host-based firewalls, intrusion prevention systems, device control, application control, disk encryption, patch management, and features of Cortex XDR.
トピック 2	<ul style="list-style-type: none">Secure Access: This part of the exam measures skills of a Secure Access Engineer and focuses on defining and differentiating Secure Access Service Edge (SASE) and Secure Service Edge (SSE). It covers challenges related to confidentiality, integrity, and availability of data and applications across data, private apps, SaaS, and AI tools. It examines security technologies including secure web gateways, enterprise browsers, remote browser isolation, data loss prevention (DLP), and cloud access security brokers (CASB). The section also describes Software-Defined Wide Area Network (SD-WAN) and Prisma SASE solutions such as Prisma Access, SD-WAN, AI Access, and enterprise DLP.
トピック 3	<ul style="list-style-type: none">Cloud Security: This section targets a Cloud Security Specialist and addresses major cloud architectures and topologies. It discusses security challenges like application security, cloud posture, and runtime security. Candidates will learn about technologies securing cloud environments such as Cloud Security Posture Management (CSPM) and Cloud Workload Protection Platforms (CWPP), as well as the functions of a Cloud Native Application Protection Platform (CNAPP) and features of Cortex Cloud.

トピック 4	<ul style="list-style-type: none"> • Network Security: This domain targets a Network Security Specialist and includes knowledge of Zero Trust Network Access (ZTNA) characteristics, functions of stateless and next-generation firewalls (NGFWs), and the purpose of microsegmentation. It also covers common network security technologies such as intrusion prevention systems (IPS), URL filtering, DNS security, VPNs, and SSL • TLS decryption. Candidates must understand the limitations of signature-based protection, deployment options for NGFWs, cybersecurity concerns in operational technology (OT) and IoT, cloud-delivered security services, and AI-powered security functions like Precision AI.

PCCP試験時間 & PCCP参考書

一日も早く Palo Alto Networks の PCCP 試験に合格したい? ShikenPASS が提供した問題と解答は IT 領域のエリートたちが研究して、実践して開発されたものです。それは十年過ぎの IT 認証経験を持っています。ShikenPASS は全面的な認証基準のトレーニング方法を追求している。ShikenPASS の Palo Alto Networks の PCCP を利用した大勢の人々によると、Palo Alto Networks の PCCP 試験の合格率は 100 パーセントに達したのです。もし君が試験に関する問題があれば、私たちは最も早い時間で、解答します。

Palo Alto Networks Certified Cybersecurity Practitioner 認定 PCCP 試験問題 (Q142-Q147):

質問 # 142

Which type of LAN technology is being displayed in the diagram?

- A. Mesh Topology
- B. Spine Leaf Topology
- C. Bus Topology
- D. Star Topology

正解: A

解説:

The diagram displays a mesh topology, where each device is connected to every other device in the network.

This topology is characterized by the multiple connections each node has, ensuring there is no single point of failure and providing redundant paths for data transmission, enhancing the reliability and resilience of the network. Mesh topology is one of the types of LAN technology that uses ethernet or Wi-Fi to connect devices¹². References:

質問 # 143

What are two functions of User and Entity Behavior Analytics (UEBA) data in Prisma Cloud CSPM? (Choose two.)

- A. Assessing severity levels
- B. Detecting and correlating anomalies
- C. Unifying cloud provider services
- D. Identifying misconfigurations

正解: A、B

解説:

Assessing severity levels - UEBA data helps prioritize incidents by evaluating the risk and severity based on user and entity behavior.
Detecting and correlating anomalies - UEBA continuously analyzes activity to identify abnormal behavior and correlate anomalies that may indicate insider threats or compromised accounts.

質問 # 144

Which technology helps Security Operations Center (SOC) teams identify heap spray attacks on company-owned laptops?

- A. CSPM
- B. EDR
- C. ASM
- D. CVVP

正解: B

解説:

Heap spray attacks exploit memory management vulnerabilities by injecting malicious code into a program's heap to manipulate execution flow. Endpoint Detection and Response (EDR) platforms monitor memory and process behavior on endpoints, enabling the detection of such memory-based exploits through anomaly and behavior analysis. Palo Alto Networks' Cortex XDR equips SOC teams with the tools to detect, analyze, and respond to heap spray and other in-memory attacks on company laptops in real time. EDR's endpoint-centric visibility is crucial since heap spray attacks operate below network layers and often bypass traditional perimeter defenses.

質問 # 145

Which characteristic of serverless computing enables developers to quickly deploy application code?

- A. Using Container as a Service (CaaS) to deploy application containers to run their code.
- B. Using cloud service spot pricing to reduce the cost of using virtual machines to run their application code
- C. Uploading the application code itself, without having to provision a full container image or any OS virtual machine components
- D. Uploading cloud service autoscaling services to deploy more virtual machines to run their application code based on user demand

正解: C

解説:

"In serverless apps, the developer uploads only the app package itself, without a full container image or any OS components. The platform dynamically packages it into an image, runs the image in a container, and (if needed) instantiates the underlying host OS and VM and the hardware required to run them."

質問 # 146

You received an email, allegedly from a bank, that asks you to click a malicious link to take action on your account. Which type of attack is this?

- A. Phishing
- B. Spear phishing
- C. Spamming
- D. Whaling

正解: A

解説:

Phishing is a type of email attack where the attacker sends a lot of malicious emails in an untargeted way, pretending to be a trusted source, such as a bank or an online retailer, to trick users into revealing sensitive information, such as passwords or credit card numbers. Attackers use the information to steal money or to launch other attacks. A fake email from a bank asking you to click a link and verify your account details is an example of phishing¹ References:
