VMware 3V0-32.23 Exam Dumps - Smart Way To Get Success

If you are ready for the 3V0-32.23 exam for a long time, but lack of a set of suitable 3V0-32.23 learning materials, I will tell you that you are so lucky to enter this page. We are such 3V0-32.23 exam questions that you can use our products to prepare the exam and obtain your dreamed 3V0-32.23 certificates. We all know that if you desire a better job post, you have to be equipped with appropriate professional quality and an attitude of keeping forging ahead. And we can give what you need!

VMware Cloud Management and Automation Advanced Design Sample Questions (Q92-Q97):

NEW QUESTION # 92

At which stage of design is the high-level structure and major components of the solution determined?

- A. Conceptual design
- B. Detailed design
- C. Logical design
- D. Implementation design

Answer: A

NEW QUESTION # 93

IT Services would like to automate the allocation of software applications. The company uses a modern virtual desktop platform with software management capabilities, and the platform supports interoperability via a REST API.

The following requirements have been established for this project:

- Business users will use a self-service portal to request software added to their existing system.

- The requestor may select one or more software applications from a list during the request.
 - The software application list must be up-to-date.
 - The virtual desktop team will provide REST API calls needed to interface with the existing platform.
- Which three of these listed elements are required for this scenario? (Choose three.)

- A. Resource action
- B. Resource mapping
- C. vRealize Orchestrator workflow with script action
- D. External value definition
- E. Customization of XaaS form

Answer: A,B,C

NEW QUESTION # 94

A company is in the initial stage of planning a vRealize Automation project for its cloud datacenter. It wants to provide self-service provisioning of applications based on templates created by IT and application subject matter experts. Security policy will be predefined by the security team and applied dynamically as new application instances are provisioned. The existing private cloud infrastructure will be utilized to host this, along with existing Active Directory and other common infrastructure such as the enterprise IP address management system.

Which are two design constraints in this scenario? (Choose two.)

- A. There may be insufficient capacity.
- B. There are existing DNS and NTP servers.
- C. The existing IP address management system must be used.
- D. No further ESXi hosts can be added.

Answer: A,C

NEW QUESTION # 95

An organization wants to provide an automated self-service catalog to all departments within the organization.

The key stakeholders have asked for the platform to:

Be resilient to component failures.

Each department consume the same on-premises infrastructure.

Restrict visibility and management of virtual machines to only those in their respective departments.

Choose one design decision that will meet the business requirements.

- A. Deploy single node deployment and use projects to separate the departments.
- B. Deploy single node deployment and use tenants to separate the departments.
- C. Deploy multi-node deployment and use tenants to separate the departments.
- D. Deploy multi-node deployment and use projects to separate the departments.

Answer: D

Explanation:

A multi-node deployment provides resilience to component failures, and using projects allows you to restrict visibility and management of virtual machines to each department, while sharing the same on-premises infrastructure.

NEW QUESTION # 96

An architect has been tasked with designing a blueprint containing web, application and database machines utilizing NSX for networking.

Upon provisioning, network traffic must be automatically restricted to allow:

- The web server to communicate only to the application server
 - The application server to communicate to both the web and database servers
 - The database server to be blocked from communicating to the other servers
- Which two methods could the architect use to accomplish this? (Choose two.)

- A. Specify an appropriate security group in the blueprint and assign it to each machine.
- B. Add an appropriate security group to the blueprint from within the blueprint properties, under NSX Settings.

- C. Use an Event Broker subscription to ensure that provisioned machines are receiving the appropriate security group assignment.
- **D. Create or update an appropriate security group within NSX to include the provisioned machines.**
- E. Assign an appropriate security group to the entitled items or entitled service within the entitlement.

Answer: A,D

NEW QUESTION # 97

.....

Passing the 3V0-32.23 exam and obtaining the certification mean opening up a new and fascination phase of your professional career. Just imagine that what a brighter future will be with the 3V0-32.23 certification! You may be employed by a bigger enterprise and get a higher position. The income will be doubled for sure. And Our 3V0-32.23 study braindumps enable you to meet the demands of the actual certification exam within days. We can claim that with our 3V0-32.23 practice guide for 20 to 30 hours, you are able to attend the exam with confidence.
