How do you create country/region-specific fields (CSF) for a country that does NOT have pre-delivered Legal Entity CSF fields?

Note: There are 3 correct answers to this question.

- A. Update the field criteria of the association.**
- B. Create a composite association on the new generic object to Legal Entity.
- C. Create a new generic object.**
- D. Update the condition and condition values of the association.
- E. Create a composite association to the new generic object on Legal Entity.**

Answer: A,C,E

Explanation:

To create country/region-specific fields (CSF) for a country that does not have pre-delivered Legal Entity CSF fields, follow these steps:

Create a New Generic Object: Develop a new generic object to define the specific fields required for the country/region. This object will store the additional data fields pertinent to the Legal Entity.

Create a Composite Association to the New Generic Object on Legal Entity: Establish a composite association from the Legal Entity to the newly created generic object. This association links the Legal Entity to the country/region-specific fields, enabling the system to recognize and utilize these fields appropriately.

Update the Field Criteria of the Association: Modify the field criteria within the association to ensure that the new fields are correctly associated with the Legal Entity.
