### SAP Certified Associate - Data Analyst - SAP Analytics Cloud Sample Questions (Q51-Q56):

#### NEW QUESTION # 51

You are entering values for several expense accounts in a data table. Which data entry mode must you use to process the data with a delay defined in System Administration?

- A. Mass
- B. Fluid**
- C. Single

**Answer: B**

#### NEW QUESTION # 52

You input new data for a private version in a story. What must you do to ensure the new data is added to the model?

- A. Send
- B. Nothing
- C. Publish**
- D. Save

**Answer: C**

Explanation:

When inputting new data for a private version in a story in SAP Analytics Cloud, it is necessary to "Publish" the data to ensure it is added to the model. Publishing the private version commits the changes to the underlying model, making the new data visible and accessible to other users according to their permissions. This step is crucial for ensuring that the updated data is incorporated into the shared model for further analysis and decision-making.

### NEW QUESTION # 53

You are using a live connection for a model. Where can you define data security?

- A. Source system
- B. Data access control
- C. SAP Analytics Cloud model
- D. SAP Analytics Cloud role

**Answer: A**

Explanation:

When using a live connection in SAP Analytics Cloud, data security is defined and managed within the source system. This approach leverages the existing security protocols and permissions set up in the source system, ensuring that data governance and access controls remain consistent and are centrally managed. Users accessing data through SAP Analytics Cloud with a live connection will be subject to the same security constraints and permissions as if they were accessing the data directly from the source system. This integration ensures a unified security model, simplifying administration and ensuring data security and compliance.

### NEW QUESTION # 54

In which types of data source can you concatenate data? Note: There are 3 correct answers to this question.

- A. Data analyzer insight
- B. Embedded data set
- C. Imported data model
- D. Standalone dataset
- E. Live data model

**Answer: B,C,D**

Explanation:

In SAP Analytics Cloud, data concatenation can be performed on Embedded datasets, Standalone datasets, and Imported data models. This process involves combining data from multiple sources or tables into a single dataset or model, providing a unified view of the data. This is particularly useful for analyses that require a comprehensive dataset compiled from various data sources.

### NEW QUESTION # 55

You have a story in My Files. You want your colleague to review and comment on the story. What must you do?

- A. Include the story in a Discussion
- B. Add a Comment widget to the story
- C. Create a Review task for the story
- D. Share with View access

**Answer: D**

### NEW QUESTION # 56
