Free PDF Google - Cloud-Digital-Leader - Google Cloud Digital Leader – Valid Clearer Explanation

The clients at home and abroad strive to buy our Cloud-Digital-Leader test materials because they think our products are the best study materials which are designed for preparing the test Cloud-Digital-Leader certification. They trust our Cloud-Digital-Leader certification guide deeply not only because the high quality and passing rate of our Cloud-Digital-Leader qualification test guide but also because our considerate service system. They treat our Cloud-Digital-Leader study materials as the magic weapon to get the Cloud-Digital-Leader certificate and the meritorious statesman to increase their wages and be promoted.

Google Cloud Digital Leader Sample Questions (Q335-Q340):

NEW QUESTION # 335

Your organization is developing a plan for migrating to Google Cloud.

What is a best practice when initially configuring your Google Cloud environment?

- A. Create a project via Google Cloud Console per department in your company
- B. Make every member of your company the project owner
- C. Create projects based on team members' requests
- D. Define your resource hierarchy with an organization node on top

Answer: A

NEW QUESTION # 336

What is the purpose of an application programming interface (API)?

- A. To connect networks from different cloud providers
- B. To provide a set of instructions that allow computer programs to communicate with each other
- C. To manage multiple containerized workloads
- D. To provide cloud plugins for integrated development environments

Answer: B

Explanation:

An Application Programming Interface (API) is a set of protocols, routines, and tools that allow different software applications to communicate with each other. APIs provide the necessary instructions for one program to interact with another, enabling the integration of different systems and the development of new functionalities.

Option D: To provide a set of instructions that allow computer programs to communicate with each other is correct because it accurately describes the fundamental purpose of an API.

Google Cloud: Understanding APIs and their Use Cases

Google Cloud API Documentation: API Basics

NEW QUESTION # 337

You are working for a hospital that stores its medical images in an on-premises data room and it is provided that the hospitals want to use Cloud Storage for archival storage of these images. You are required to design and implement a solution where the hospital wants an automated process to up-load any new medical images to Cloud Storage. On the basis of this statements which of the following statement is correct.

- A. In the Cloud Console, go to Cloud Storage. Upload the relevant images to the appropriate bucket.
- B. Create a script that uses the gsutil command line interface to synchronize the on-premises storage with Cloud Storage. Schedule the script as a cron job.
- C. Create a Pub/Sub topic, and enable a Cloud Storage trigger for the Pub/Sub topic. Create an application that sends all medical images to the Pub/Sub topic.
- D. Deploy a Dataflow job from the batch template, "Datastore to Cloud Storage" Schedule the batch job on the desired interval.

Answer: B

Explanation:

Explanation

Using sync for new images implies that you will continue to use your onprem and keep synchronizing it forever, Sync just once for the old images, new images go directly to google cloud via pub/sub, and eventually get rid of the onprem.

NEW QUESTION # 338

An organization supplies electric car chargers in a nationwide network. They store customer and charging data in BigQuery. They want to efficiently upgrade and maintain their network to reduce waste and achieve their sustainability goals. How can Google Cloud services help the organization?

- A. Move data from BigQuery to Cloud Storage to reduce storage costs.
- B. Secure data access by using Identity and Access Management.
- C. Create a model in BigQuery to predict future maintenance schedules.
- D. Provide access to third-party developers by creating an API using Apigee.

Answer: C

Explanation:

The correct answer is D. Create a model in BigQuery to predict future maintenance schedules. Here's why:

* Context of the Question: The organization wants to use Google Cloud services to efficiently upgrade and maintain their network to reduce waste and achieve sustainability goals.

* Google Cloud Product Relevance:

* BigQuery is a fully managed data warehouse that supports SQL queries for analyzing large datasets. It also has built-in machine learning capabilities (BigQuery ML) that allow users to create and train models directly within the database using SQL.

* By creating a predictive model in BigQuery, the organization can analyze historical data to forecast future maintenance needs, optimize upgrade schedules, and minimize waste, aligning with their sustainability goals.

* Why Not Other Options:

* A. Secure data access by using Identity and Access Management: While IAM is important for securing access, it does not directly help with maintenance prediction or sustainability goals.

* B. Move data from BigQuery to Cloud Storage to reduce storage costs: This option focuses on cost savings, not on improving operational efficiency or achieving sustainability goals.

* C. Provide access to third-party developers by creating an API using Apigee: This is not directly related to the goal of optimizing maintenance and reducing waste.

Google Cloud Digital Leader References:

* Refer to BigQuery ML documentation to learn how to create and use machine learning models within BigQuery.

NEW QUESTION # 339

An organization has servers running mission-critical workloads on-premises around the world. They want to modernize their infrastructure with a multi-cloud architecture.

What benefit could the organization experience?

- A. Ability to disable regional network connectivity during cyber attacks
- B. Full management access to their regional infrastructure
- C. Reduced likelihood of system failure during high demand events
- D. Ability to keep backups of their data on-premises in case of failure

Answer: C

NEW QUESTION # 340

.....

Many companies have been lost through negligence of service on our Cloud-Digital-Leader study quiz. Some useless products may bring about an adverse effect, so choose our Cloud-Digital-Leader practice engine is 100 percent secure for their profession and usefulness and also our considerate after-sales services. We have built effective serviceability aids in the early resolution of customer-reported problems, which then may result in higher customer satisfaction and improved warm support of Cloud-Digital-Leader Exam Guide.
