## Free PDF Quiz High Pass-Rate D-PST-DY-23 - New Dell PowerStore Deploy 2023 Exam Braindumps

It is acknowledged that high-quality service after sales plays a vital role in enhancing the relationship between the company and

customers. Therefore, we, as a leader in the field specializing in the {Examcode} exam material especially focus on the service after sales. In order to provide the top service after sales to our customers, our customer agents will work in twenty four hours, seven days a week. So after buying our D-PST-DY-23 Study Material, if you have any doubts about the {Examcode} study guide or the examination, you can contact us by email or the Internet at any time you like. We Promise we will very happy to answer your question with more patience and enthusiasm and try our utmost to help you out of some troubles. So don't hesitate to buy our {Examcode} test torrent, we will give you the high-quality product and professional customer services.

Preparing for the EMC D-PST-DY-23 exam requires a deep understanding of storage architecture, administration, and deployment. Candidates should have experience working with Dell EMC storage solutions, as well as a solid understanding of virtualization technologies such as VMware. In addition, candidates should be familiar with industry-standard storage protocols and technologies such as Fibre Channel, iSCSI, and NAS. With the right preparation and experience, candidates can Pass D-PST-DY-23 Exam and earn the Dell EMC Certified Specialist – PowerStore Deployment certification.

## EMC Dell PowerStore Deploy 2023 Exam Sample Questions (Q87-Q92):

### NEW QUESTION # 87

A storage administrator provisions a VMware file system from a NAS server configured with NFSv4.

What is the access requirement for the ESXi host?

- A. Read/Write
- B. Kerberos with Integrity
- **C. Read/Write, allow Root**
- D. Kerberos with Encryption

**Answer: C**

Explanation:

NFSv4 and ESXi Host Access

When provisioning a VMware file system (like a datastore) from a NAS server using NFSv4, the ESXi host needs specific permissions to function correctly:

Read/Write Access: This is fundamental. The ESXi host must be able to both read data from and write data to the datastore. This is essential for storing virtual machine files, writing logs, and managing the overall file system.

Allow Root Access: ESXi hosts require root-level access to the NFS datastore. This is critical for:

Creating and Managing VMDKs: Root access is necessary to create, delete, and modify virtual machine disk files (VMDKs) on the datastore.

Managing VM Files: The host needs root permissions to manage various virtual machine configuration files and logs stored on the datastore.

Maintaining File System Integrity: Root access allows the ESXi host to perform essential file system operations to ensure consistency and prevent data corruption.

Why Other Options Are Incorrect

A . Read/Write: While read/write access is necessary, it's not sufficient on its own. Root access is also required.

B . Kerberos with Integrity: Kerberos is a security protocol that can be used with NFSv4 for authentication, but it's not a basic access requirement for ESXi hosts. While Kerberos enhances security, it's not strictly mandatory for basic functionality.

C . Kerberos with Encryption: Similar to Kerberos with integrity, encryption adds another layer of security but isn't a fundamental requirement for ESXi host access to an NFSv4 datastore.

Important Considerations

NFS Owner: When configuring NFSv4 on PowerStore, you typically set the "NFS Owner" to "root" for ESXi hosts. This ensures that the host has the necessary permissions.

no\_root\_squash: On some NAS systems, you might need to configure the no\_root\_squash option in the NFS export settings. This option prevents the NAS server from mapping the root user on the ESXi host to a less privileged user, ensuring that the host retains root access to the NFS share.

Dell PowerStore Reference

PowerStore: Create a File System for NFS Exports: This document in the PowerStore documentation provides guidance on creating and configuring file systems for NFS exports, including details about setting NFS permissions and the NFS owner.

### NEW QUESTION # 88

Which drive configuration is available for the PowerStore ENS24 Expansion Enclosure?

- A. NVMe NVRAM
- B. SAS SSD

- C. NVMe SSD
- D. NVMe SCM

**Answer: C**

Explanation:

<https://www.dell.com/support/kbdoc/en-us/000205926/powerstore-how-to-install-a-nvme-expansion-enclosure>

#### **NEW QUESTION # 89**

Which component is responsible for managing the access of hosts to storage resources in PowerStore?

- A. Network switch
- B. Host initiator
- C. Storage processor
- D. Data node

**Answer: C**

#### **NEW QUESTION # 90**

Refer to the Exhibit.

□ Which port location in the graphic is used for network management connectivity on a PowerStore X?

- A. 0
- B. 1
- C. 2
- D. 3

**Answer: D**

#### **NEW QUESTION # 91**

A PowerStore user has a business need for file system snapshots of NAS Server NAS1 with the following attributes:

□ Taken M-F every 2 hours

□ Retention of 2 days

□ The snapshots must be accessible through the Previous Versions menu in Windows Using the PowerStore Simulator, make the appropriate configuration change.

When you have finished, continue to the next question.

**Answer:**

Explanation:

see the Explanation for the solution.

1. Launch the PowerStore Simulator and log in with the admin credentials.
2. On the left navigation pane, click Protection and then click Protection Policies.
3. Click Create Policy and enter a name and description for the policy, such as NAS1 Snapshot Policy.
4. Under Snapshot Rules, click Add Rule and configure the following settings:
  5. Name: Enter a name for the rule, such as NAS1 Snapshot Rule.
  6. Schedule: Select Custom and enter the following cron expression: 0 \*/2 \* \* 1-5. This expression means that the snapshots will be taken every 2 hours on Monday to Friday.
  7. Retention: Select Until and enter 2 days. This means that the snapshots will be deleted after 2 days.
  8. Access Type: Select Snapshot. This means that the snapshots will be accessible through the Previous Versions menu in Windows
  9. Click Save to create the snapshot rule and then click Next.
  10. Under Replication Rules, click Skip. This means that no replication rule will be added to the policy.
  11. Click Next and then click Finish to create the protection policy.
  12. On the left navigation pane, click Storage and then click File Systems.
  13. Select the file system that belongs to NAS Server NAS1 and click More Actions.
  14. Click Edit and then click Protection Policy.
  15. Select the protection policy that was created in the previous steps, such as NAS1 Snapshot Policy, and click Save.

16. Click Confirm to apply the protection policy to the file system.

## NEW QUESTION # 92

We have authoritative production team made up by thousands of experts helping you get hang of our Dell PowerStore Deploy 2023 Exam study question and enjoy the high quality study experience. We will update the content of D-PST-DY-23 test guide from time to time according to recent changes of examination outline and current policies, so that every examiner can be well-focused and complete the exam focus in the shortest time. We will provide high quality assurance of D-PST-DY-23 Exam Questions for our customers with dedication to ensure that we can develop a friendly and sustainable relationship.
